Part 10
Infectious Waste Management Act

Part Cross-References
Report of unprotected exposure to disease, 50-16-702.

75-10-1001. Short title. This part may be cited as the "Infectious Waste Management Act".
History: En. Sec. 1, Ch. 483, L. 1991.

75-10-1002. Purpose. The purpose of this part is to protect the public health, safety, and welfare of the citizens of Montana by developing and implementing infectious waste management policies that are reasonable, cost-effective, aesthetically pleasing, and environmentally acceptable.

History: En. Sec. 2, Ch. 483, L. 1991.

75-10-1003. Definitions. As used in this part, the following definitions apply:

(1) "Disposal" or "dispose" has the meaning provided in 75-10-203.

(2) "Generate" or "generation" means to produce infectious waste.

(3) "Infectious" means capable of producing disease. To be infectious, the following four factors simultaneously must be present:

(a) virulence, which is the ability of microorganisms to cause disease;

(b) dose, which is microorganisms in a quantity sufficient to cause infection;

(c) portal of entry, which is an opening or route of access into a human body; and

(d) host susceptibility, which means the host's natural resistance is incapable of preventing infection.

(4) "Infectious waste" means waste capable of producing infectious disease. Infectious waste includes but is not limited to:

(a) cultures and stocks of infectious agents and associated biologicals;

(b) human pathological waste, including tissues, organs, and body parts removed during surgery or an autopsy;

(c) free-flowing waste human blood and products of blood, including serum, plasma, and other blood components and items soaked or saturated with blood; and

(d) sharps that have been used in patient care, medical research, or industrial laboratories.

(5) "Intermediate point" means a place where infectious waste is not treated or disposed of.

(6) "Person" means an individual, firm, partnership, company, association, corporation, city, town, local government entity, federal agency, or any other governmental or private entity, whether organized for profit or not.

(7) "Sharps" means any discarded health care article that may cause punctures or cuts, including but not limited to:

(a) broken glass that may be contaminated with blood;

(b) needles; and

(c) scalpel blades.

(8) "Steam sterilization" means a treatment method for infectious waste using saturated steam within a pressure vessel (known as a steam sterilizer, autoclave, or retort) at a time, for a period of time, and at a temperature sufficient to kill infectious agents within the waste.

(9) "Storage" or "store" means to hold for a temporary period.

(10) "Transport" or "transportation" means to move infectious waste from the point of generation to any intermediate point or to the point of ultimate treatment or disposal.

(11) "Treat" or "treatment" means to apply a method, technique, or process, including incineration, designed to render infectious waste sterile.

History: En. Sec. 3, Ch. 483, L. 1991; amd. Sec. 209, Ch. 418, L. 1995; amd. Sec. 2, Ch. 97, L. 2007.

75-10-1004. Prohibition. (1) Except as provided in subsection (2), a person may not generate, treat, store, transport, or dispose of infectious waste in a manner not authorized under the provisions of this part or rules adopted under the provisions of this part.

(2) The prohibition in subsection (1) does not apply to the generation of infectious waste by an individual in reasonable association with the individual's household operations.

History: En. Sec. 4, Ch. 483, L. 1991; amd. Sec. 3, Ch. 97, L. 2007.

75-10-1005. Management standards — procedures for storage, transportation, treatment, and disposal. (1) Infectious waste must be separated from ordinary waste at the point of origin and stored until the waste is rendered noninfectious in separate, distinct containers with biohazard warning labels in compliance with the following procedures:

(a) Sharps must be contained for storage, transportation, treatment, and subsequent disposal in leakproof, rigid, puncture-resistant containers that must be taped closed or capped securely to prevent loss of contents.

(b) Infectious waste other than sharps must be contained in moisture-proof disposable containers or bags of a strength sufficient to prevent ripping, tearing, or bursting under normal conditions of use. The bags must be securely tied to prevent leakage or expulsion of solid or liquid wastes during storage, handling, and transportation.

(2) To inhibit the spread of infectious agents, infectious waste must be stored prior to treatment in a secured area that prevents access by unauthorized personnel and must be clearly marked or labeled as infectious.

(3) Handling of infectious waste must be done in a manner to prevent compaction or other mechanical manipulation that might cause the release of infectious agents.

(4) (a) Treatment and disposal of infectious waste must be accomplished through the following methods:

(i) incineration with complete combustion that reduces infectious waste to carbonized or mineralized ash;

(ii) steam sterilization that renders infectious waste noninfectious; or

(iii) sterilization by standard chemical techniques or by any scientifically proven techniques approved by state and federal authorities.

(b) Liquid or semisolid infectious waste may be discharged into a sewer system that provides secondary treatment or into a primary treatment sewage system if waste is first sterilized by chemical treatment. A subsurface disposal system installed and operated in accordance with state or local sanitary regulations is, for the purpose of this subsection (b), a sewer system providing secondary treatment.

(c) Fetal remains or recognizable body parts other than teeth must be disposed of by incineration or interment.

(5) If infectious waste has been rendered noninfectious by one of the methods listed in subsection (4) and is no longer biologically hazardous, it may be mixed with and disposed of with ordinary waste in the following manner:

(a) Steam-sterilized waste must be labeled identifying it as such with heat sensitive tape or bagged in marked autoclavable bags.

(b) Chemically treated waste or waste otherwise treated under subsection (4)(a)(iii) must be appropriately labeled.

(6) Infectious waste may be transported by the generator, a municipal solid waste service, or a regulated commercial hauler to an offsite treatment facility if the waste is confined in a leakproof, noncompacting, fully enclosed vehicle compartment.

(7) (a) Infectious waste that has been treated by one of the methods in subsection (4) may be disposed of in a properly operated landfill licensed under 75-10-221.

(b) Untreated infectious waste may be disposed of at a licensed, properly operated landfill until April 1, 1993, if it is buried in a separate area without compaction and with minimum disturbance.

(8) An employee who handles or manages infectious waste must receive training provided by the employer that is adequate to ensure safe performance of duties.

(9) Generators and transporters of infectious waste shall develop a contingency plan to handle spills and equipment failure.

History: En. Sec. 5, Ch. 483, L. 1991.

75-10-1006. Generation licensing and regulation — rulemaking authority. (1) A person that is required to obtain a license from a board or department of the state to operate a health care facility, as defined in 50-5-101, or to engage in a profession or occupation:

(a) may not generate infectious waste, store infectious waste at a place where infectious waste is generated, or transport infectious waste from the point of generation to an intermediate point without a license; and

(b) shall comply with the rules adopted under this part by the board or department responsible for licensing that person.

Part 13
Methamphetamine Contamination — Indoor Property Decontamination Standards

75-10-1301. Finding and purpose. The legislature finds that some properties are being contaminated with hazardous chemical residues created by the manufacture of methamphetamine. Innocent members of the public may be harmed when they are unknowingly exposed to these residues if the properties are not decontaminated prior to any subsequent rental, sale, or use of the properties. Remediation of properties has been frustrated by the lack of a decontamination standard. The purpose of this part is to protect the public health, safety, and welfare by providing specific cleanup standards and authorizing the department to establish a voluntary program that will provide for a property decontamination process that will meet state standards.

History: En. Sec. 1, Ch. 461, L. 2005.

75-10-1302. Definitions. Unless the context requires otherwise, in this part, the following definitions apply:

(1) "Department" means the department of environmental quality provided for in 2-15-3501.

(2) (a) "Inhabitable property" means any building or structure used as a clandestine methamphetamine drug lab that is intended to be primarily occupied by people, either as a dwelling or a business, including a storage facility, mobile home, or recreational vehicle, that may be sold, leased, or rented for any length of time.

(b) The term does not mean any water system, sewer system, land, or water outside of a building or structure described in subsection (2)(a).

(3) "Surface material" means any porous or nonporous substance common to the interior of a building or structure, including but not limited to ceilings and walls, window coverings, floors and floor coverings, counters, furniture, heating and cooling duct work, and any other surfaces to which inhabitants of the building or structure may be exposed.

History: En. Sec. 2, Ch. 461, L. 2005.

75-10-1303. Decontamination standards — rulemaking authority — samples. (1) The decontamination standard for methamphetamine inside inhabitable property is less than or equal to 0.1 micrograms of methamphetamine per 100 square centimeters of surface material unless a different standard is adopted by the department by rule to protect human health. The department may adopt standards by rule for precursors to methamphetamine that are consistent with the standard for methamphetamine.

(2) (a) The department may by rule establish the number and locations of surface material samples to be collected based on the circumstances of the contamination and acceptable testing methods.

(b) In the absence of a rule described in subsection (2)(a), at least three samples must be collected from the surface material most likely to be contaminated at each property.

History: En. Sec. 3, Ch. 461, L. 2005.

75-10-1304. Contractor certification — department authority. (1) The department is authorized to establish by rule minimum standards for the training and certification of contractors and their employees who are to perform the assessment or remediation of inhabitable property contaminated by methamphetamine residues.

(2) The department may train and test or may approve courses to train and test contractors and their employees in the proper methods of assessing, remediating, and testing inhabitable property contaminated by methamphetamine residues. If the department conducts the training and testing of contractors and their employees, it may adopt rules to provide for the assessment of reasonable fees to cover the state's costs of providing the training and testing.

(3) The department shall establish by rule procedures for the certification of contractors and their employees, including procedures for the decertification of contractors and their employees for cause. The rules may provide for the assessment of reasonable fees to cover the cost of the contractor certification program.

(4) Any contractor and the contractor's employees certified to perform the remediation of inhabitable property in any other state are approved for certification in Montana unless the department determines that the certification process in the other state is not substantially similar to the minimum certification standards established by the department.

(5) The department shall maintain a list of certified contractors and shall make the list available to local health officials, law enforcement officials, and the public.

History: En. Sec. 4, Ch. 461, L. 2005.

75-10-1305. Occupant notice by owner of inhabitable property — immunity. (1) An owner of inhabitable property that is known by the owner to have been used as a clandestine methamphetamine drug lab shall notify in writing any subsequent occupant or purchaser of the inhabitable property of that fact if the inhabitable property has not been remediated to the standards established in 75-10-1303 by a contractor who is certified in accordance with 75-10-1304.

(2) An owner or an owner's agent referred to in subsection (1) may provide notice to a subsequent occupant or purchaser that the owner or the owner's agent has submitted:

(a) documentation to the department by a contractor who is certified pursuant to 75-10-1304 that the inhabitable property has been remediated to the standards established in 75-10-1303; or

(b) documentation by a certified contractor that the property meets the decontamination standards without decontamination.

(3) Notice as required or authorized in this section must occur before agreement to a lease or sale of the inhabitable property.

(4) If the department has confirmed that the decontamination standard provided for in 75-10-1303 has been met and if notice has been given as provided in subsections (2) and (3), the owner and the owner's agent are not liable in any action brought by a person who has been given notice that is based on the presence of methamphetamine in an inhabitable property.

(5) The immunity provided for in subsection (4) does not apply to an owner or an owner's agent who caused the methamphetamine contamination.

History: En. Sec. 5, Ch. 461, L. 2005.

75-10-1306. Reporting requirements. (1) Whenever a state or local law enforcement agency becomes aware that an inhabitable property has been contaminated by its use as a clandestine methamphetamine drug lab, the agency shall report the contamination to the department and to the local health officer.

(2) The department shall maintain a list of inhabitable property that has been reported as contaminated, and the list must be made available to the public through a website except as provided in subsection (3).

(3) Upon confirmation by the department that an inhabitable property has been properly remediated to the standards established in 75-10-1303 or that the inhabitable property meets the decontamination standards without decontamination, the department shall remove the inhabitable property from the list required in subsection (2). The department shall provide written notification to the local health officer and the property owner of record when the documentation shows that the inhabitable property has been properly assessed or remediated.

(4) The department may adopt rules establishing reasonable requirements for the sufficiency of documentation to be provided by a certified contractor.

(5) Notwithstanding any other provision of law, once an inhabitable property has been removed from the list required in subsection (2), a property owner, landlord, or real estate agent is not required to report or otherwise disclose the past contamination.

History: En. Sec. 6, Ch. 461, L. 2005.

75-11-201. Short title. This part may be cited as the "Montana Underground Storage Tank Installer and Inspector Licensing and Permitting Act".

History: En. Sec. 1, Ch. 594, L. 1989; amd. Sec. 1, Ch. 506, L. 1999.

75-11-202. Intent, findings, and purpose. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted the Montana Underground Storage Tank Installer and Inspector Licensing and Permitting Act. It is the legislature's intent that the requirements of this part provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) Leaking underground storage tank systems have been identified as a significant source of underground contamination and as a potential hazard for fire and explosion. Government and industry studies show that a major cause of leaking underground storage tanks is improper installation or closure. Proper installation, closure, and inspection require specialized knowledge, training, and experience.

(3) To protect the health of Montana citizens and the quality of state waters and other natural resources, it is the intent of the legislature to require permits for the installation or closure of underground storage tank systems; to limit the conduct of these activities to persons with demonstrated competence, training, and experience; and to provide for permitting, licensing, and inspection activities.

History: En. Sec. 2, Ch. 594, L. 1989; amd. Sec. 1, Ch. 200, L. 1993; amd. Sec. 2, Ch. 506, L. 1999; amd. Sec. 18, Ch. 361, L. 2003.

Petroleum Storage Tank Cleanup

Part Cross-References

Petroleum Tank Release Compensation Board, 2-15-2108.
Hazardous waste management, Title 75, ch. 10, part 4.

75-11-301. Intent, findings, and purposes. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted this part. It is the legislature's intent that the requirements of this part provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) The legislature finds that the use of petroleum products stored in tanks contributes significantly to the economic well-being and quality of life of Montana citizens.

(3) The legislature finds that leaks, spills, and other releases of petroleum products from storage tanks endanger public health and safety, ground water quality, and other state resources.

(4) The legislature finds that current administrative and financial resources of the public and private sectors are inadequate to address problems caused by releases from petroleum storage tanks and need to be supplemented by a major program of release detection and corrective action.

(5) The legislature finds that proper funding for the program is through a petroleum storage tank cleanup fee paid by persons who use and receive the benefits of petroleum products. The legislature further finds that this general use fee, provided for in 75-11-314, is intended solely to support a program to pay for corrective action and damages caused by releases from petroleum storage tanks. The general use fee is collected from distributors for administrative convenience and is not intended as a method for collecting highway revenue pursuant to the provisions of Article VIII, section 6, of the Montana constitution.

(6) The purposes of this part are to:

(a) protect public health and safety and the environment by providing prompt detection and cleanup of petroleum tank releases;

(b) provide adequate financial resources and effective procedures through which tank owners and operators may undertake and be reimbursed for corrective action and payment to third parties for damages caused by releases from petroleum storage tanks;

(c) assist certain tank owners and operators in meeting financial assurance requirements under state and federal law governing releases from petroleum storage tanks; and

(d) provide tank owners with incentives to improve petroleum storage tank facilities in order to minimize the likelihood of accidental releases.

75-11-303 through 75-11-306 reserved.

75-11-307. Reimbursement for expenses caused by release. (1) Subject to the availability of money from the fund under subsection (6), an owner or operator who is eligible under 75-11-308 and who complies with 75-11-309 and any rules adopted to implement those sections must be reimbursed by the board from the fund for the following eligible costs caused by a release from a petroleum storage tank:

(a) corrective action costs as required by a department-approved corrective action plan, except that if the corrective action plan:

(i) addresses releases of substances other than petroleum products from an eligible petroleum storage tank, the board may reimburse only the costs that would have reasonably been incurred if the only release at the site was the release of the petroleum or petroleum products from the eligible petroleum storage tank; or

(ii) includes the establishment of a petroleum mixing zone, as defined in 75-11-503, the board may reimburse the cost of an easement established pursuant to 75-11-508(3)(a); and

(b) compensation paid to third parties for bodily injury or property damage. The board may not reimburse for property damage until the corrective action is completed.

(2) An owner or operator may not be reimbursed from the fund for the following expenses:

(a) corrective action costs or the costs of bodily injury or property damage paid to third parties that are determined by the board to be ineligible for reimbursement;

(b) costs for bodily injury and property damage, other than corrective action costs, incurred by the owner or operator;

(c) penalties or payments for damages incurred under actions by the department, board, or federal, state, local, or tribal agencies or other government entities involving judicial or administrative enforcement activities and related negotiations;

(d) attorney fees and legal costs of the owner, the operator, or a third party;

(e) costs for the repair or replacement of a tank or piping or costs of other materials, equipment, or labor related to the operation, repair, or replacement of a tank or piping;

(f) expenses incurred before April 13, 1989, for owners or operators seeking reimbursement from the petroleum tank release cleanup fund and expenses incurred before May 15, 1991, for owners or operators seeking reimbursement from the petroleum tank release cleanup fund for a tank storing heating oil for consumptive use on the premises where it is stored or for a farm or residential tank with a capacity of 1,100 gallons or less that is used for storing motor fuel for noncommercial purposes;

(g) expenses exceeding the maximum reimbursements provided for in subsection (4);

(h) costs for which an owner or operator has received reimbursement or payment from an insurer or other third party; and

(i) expenses for work completed by or on behalf of the owner or operator more than 5 years prior to the owner's or operator's request for reimbursement. This limitation does not apply to claims for compensation paid to third parties for bodily injury or property damage. The running of the 5-year limitation period is suspended by an appeal of the board's denial of eligibility for reimbursement. If a written request for hearing is filed under 75-11-309, the suspension of the 5-year limitation period is effective from the date of the board's initial eligibility denial to the date on which the initial eligibility denial is overturned or reversed by the board, a district court, or the state supreme court, whichever occurs latest. The board may grant reasonable extensions of this limitation period if it is shown that the need for the extension is not due to the negligence of the owner or operator or agent of the owner or operator.

(3) An owner or operator may designate a person as an agent to receive the reimbursement if the owner or operator remains legally responsible for all costs and liabilities incurred as a result of the release.

(4) Subject to the availability of funds under subsection (6):

(a) for releases eligible for reimbursement from the fund that are discovered and reported on or after April 13, 1989, from a tank storing heating oil for consumptive use on the premises where it is stored or from a farm or residential tank with a capacity of 1,100 gallons or less that is used for storing motor fuel for noncommercial purposes, the board shall reimburse an owner or operator for:

(i) 100% of the eligible costs, up to a maximum total reimbursement of $500,000, for properly designed and installed double-walled tank system releases that were discovered and reported on or after October 1, 1993, and before October 1, 2009; or

(ii) 50% of the first $10,000 of eligible costs and 100% of subsequent eligible costs, up to a maximum total reimbursement of $495,000 for all other releases; and

(b) for all other releases eligible for reimbursement from the fund that are discovered and reported on or after April 13, 1989, the board shall reimburse an owner or operator for:

(i) 100% of the eligible costs, up to a maximum total reimbursement of $1 million, for properly designed and installed double-walled tank system releases that were discovered and reported on or after October 1, 1993, and before October 1, 2009; or

(ii) 50% of the first $35,000 of eligible costs and 100% of subsequent eligible costs, up to a maximum total reimbursement of $982,500 for all other releases.

(5) If an insurer pays or reimburses an owner or operator for costs that qualify as eligible costs under subsection (1), the costs paid or reimbursed by the insurer:

(a) are considered to have been paid by the owner or operator toward satisfaction of the 50% share requirements of subsection (4)(a)(ii) or (4)(b)(ii) if the owner or operator receives the payment or reimbursement before applying for reimbursement from the board;

(b) are not reimbursable from the fund; and

(c) except for the amount considered to have been paid by the owner or operator pursuant to subsection (5)(a), are considered to have been reimbursed from the fund for purposes of determining when the board has paid the maximum amount payable from the fund under subsection (4)(a)(ii) or (4)(b)(ii).

(6) If the fund does not contain sufficient money to pay approved claims for eligible costs, a reimbursement may not be made and the fund and the board are not liable for making any reimbursement for the costs at that time. When the fund contains sufficient money, eligible costs must be reimbursed subsequently in the order in which they were approved by the board.

(iii) an underground storage tank, as defined in 75-11-503, that the board determines was unknown to both the property owner and the department prior to its discovery if the owner applies to the department for a closure permit in accordance with 75-11-212 within 30 days of the date upon which the owner first had knowledge of the tank and closes the tank in accordance with the requirements of the permit before the permit expires; and

(c) the release was an accidental release.

(2) An owner or operator is not eligible for reimbursement from the petroleum tank release cleanup fund for expenses caused by releases from the following petroleum storage tanks:

(a) a tank located at a refinery or a terminal of a refiner;

(b) a tank located at an oil and gas production facility;

75-11-309. Procedures for reimbursement of eligible costs — corrective action plans. (1) An owner or operator seeking reimbursement for eligible costs and the department shall comply with the following procedures:

(a) If an owner or operator discovers or is provided evidence that a release may have occurred from the owner's or operator's petroleum storage tank, the owner or operator shall immediately notify the department of the release and conduct an initial response to the release in accordance with state and federal laws and rules to protect the public health and safety and the environment.

(b) Except for a tank for which a permit is sought under 75-11-308(1)(b)(iii) and that is closed within 120 days of discovery of the release, following discovery of the release, the petroleum storage tank must remain in compliance with applicable state and federal laws and rules that the board determines pertain to prevention and mitigation of petroleum releases.

(c) The owner or operator shall conduct a thorough investigation of the release, report the findings to the department, and, as determined necessary by the department, prepare and submit for approval by the department a corrective action plan that conforms with state, tribal (when applicable), and federal corrective action requirements.

(d) (i) The department shall review the corrective action plan and forward a copy to a local government office and, when applicable, a tribal government office with jurisdiction over a corrective action for the release. The local or tribal government office shall inform the department if it wants any modification of the proposed plan.

(ii) Based on its own review and comments received from a local government, tribal government, or other source, the department may approve the proposed corrective action plan, make or request the owner or operator to modify the proposed plan, or prepare its own plan for compliance by the owner or operator. A plan finally approved by the department through any process provided in this subsection (1)(d) is the approved corrective action plan.

(iii) After the department approves a corrective action plan, a local government or tribal government may not impose different corrective action requirements on the owner or operator.

(e) A corrective action plan prepared by the owner, operator, or department for any petroleum storage tank release may include the establishment of a petroleum mixing zone as defined in 75-11-503.

(f) The department shall notify the owner or operator of its approval of a corrective action plan and shall promptly submit a copy of the approved corrective action plan to the board. Upon review, the board may request that the corrective action plan be amended pursuant to 75-11-508 to include a petroleum mixing zone. If the department finds that the conditions for establishment of a petroleum mixing zone in 75-11-508 are satisfied, the corrective action plan must be amended to include a petroleum mixing zone.

(g) The owner or operator shall implement the corrective action plan or plans approved by the department until the release is resolved. The department may oversee the implementation of the plan, require reports and monitoring from the owner or operator, undertake inspections, and otherwise exercise its authority concerning corrective action under Title 75, chapter 10, part 7, Title 75, chapter 11, part 5, and other applicable law and rules.

(h) (i) The owner or operator shall document in the manner required by the board all expenses incurred in preparing and implementing the corrective action plan. The owner or operator shall submit claims and substantiating documents to the board in the form and manner required by the board.

(ii) The board shall review each claim and determine if the claims are actual, reasonable, and necessary costs of responding to the release and implementing the corrective action plan.

(iii) If the board requires additional information to determine if a claimed cost is actual, reasonable, and necessary, the board may request comment from the department and the owner or operator.

(iv) If the department determines that an owner or operator is failing to properly implement a corrective action plan, it shall notify the board.

(i) The owner or operator shall document, in the manner required by the board, any payments to a third party for bodily injury or property damage caused by a release. The owner or operator shall submit claims and substantiating documents to the board in the form and manner required by the board.

(j) In addition to the documentation in subsections (1)(h) and (1)(i), when the release is claimed to have originated from a properly designed and installed double-walled tank system, the owner or operator shall document, in the manner required by the board, the following:

(i) the date that the release was discovered; and

(ii) that the originating tank was part of a properly designed and installed double-walled tank system.

(2) If an owner or operator is issued an administrative order for failure to comply with requirements imposed by or pursuant to Title 75, chapter 11, part 5, or rules adopted pursuant to Title 75, chapter 11, part 5, all reimbursement of claims submitted after the date of the order must be suspended. Upon a written determination by the department that the owner or operator has returned to compliance with the requirements of Title 75, chapter 11, part 5, or rules adopted pursuant to Title 75, chapter 11, part 5, suspended and future claims may be reimbursed according to criteria established by the board. In establishing the criteria, the board shall consider the effect and duration of the noncompliance.

(3) The board shall review each claim received under subsections (1)(h) and (1)(i), make the determination required by this subsection, inform the owner or operator of its determination, and, as appropriate, reimburse the owner or operator from the fund. Before approving a reimbursement, the board shall affirmatively determine that:

(a) the expenses for which reimbursement is claimed:

(i) are eligible costs; and

(ii) were actually, necessarily, and reasonably incurred for the preparation or implementation of a corrective action plan approved by the department or for payments to a third party for bodily injury or property damage; and

(b) the owner or operator:

(i) is eligible for reimbursement under 75-11-308; and

(ii) has complied with this section and any rules adopted pursuant to this section. Upon a determination by the board that the owner or operator has not complied with this section or rules adopted pursuant to this section, all reimbursement of pending and future claims must be suspended. Upon a determination by the board that the owner or operator has returned to compliance with this section or rules adopted pursuant to this section, suspended and future claims may be reimbursed according to criteria established by the board. In establishing the criteria, the board shall consider the effect and duration of the noncompliance.

(4) (a) If an owner or operator disagrees with a board determination under subsection (3), the owner or operator may submit a written request for a hearing before the board.

(b) A written request for a hearing must be received by the board within 120 days after notice of the board's determination is served on the owner or operator by certified mail. The notice of determination must advise the owner or operator of the 120-day time limit for submitting a written request for a hearing to the board. Not less than 50 days or more than 60 days after the board serves the notice of determination, the board shall serve on the owner or operator a second notice by certified mail advising the owner or operator of the deadline for requesting a hearing. Service by certified mail is complete on the date shown on the certified mail receipt.

(c) If a written request is received within 120 days, the hearing must be held at a meeting of the board or as otherwise permitted under the Montana Administrative Procedure Act no later than 120 days following receipt of the request or at a time mutually agreed to by the board and the owner or operator.

(d) If a written request is not received within 120 days, the determination of the board is final.

(5) The board shall obligate money for reimbursement of eligible costs of owners and operators in the order that the costs are finally approved by the board.

(6) (a) The board may, at the request of an owner or operator, guarantee in writing the reimbursement of eligible costs that have been approved by the board but for which money is not currently available from the fund for reimbursement.

(b) The board may, at the request of an owner or operator, guarantee in writing reimbursement of eligible costs not yet approved by the board, including estimated costs not yet incurred. A guarantee for payment under this subsection (6)(b) does not affect the order in which money in the fund is obligated under subsection (5).

(c) When considering a request for a guarantee of payment, the board may require pertinent information or documentation from the owner or operator. The board may grant or deny, in whole or in part, any request for a guarantee.

(2) If a petroleum mixing zone is included in a corrective action plan, it may be established only when:

(a) all source material has been removed to the maximum extent practicable;

(b) the extent of petroleum contamination has been defined;

(c) natural breakdown or attenuation is occurring within the plume; and

(d) no further corrective action is reasonably required at the site.

(3) The boundary of a petroleum mixing zone established in accordance with this section must be contained within the:

(a) boundary of the property on which the petroleum release originated unless a recorded easement on an adjoining property allows the petroleum mixing zone to extend onto the adjoining property; and

(b) unconfined aquifer.

(4) Monitoring of a petroleum mixing zone may not be required unless there is a unique, overriding, site-specific, impact-related reason to require monitoring.

The inspector may not be:

(a) the owner or operator of the tank;

(b) an employee of the owner or operator; or

(c) for the first inspection required by this subsection (1) and for a period of 3 years after the installation or modification of the tank was completed, the installer who installed or modified the tank and whose name or signature was on the permit required by 75-11-212.

(7) If the inspection report indicates violations, the owner or operator shall correct the violations and obtain a followup inspection. Followup inspection reports must be provided to the owner or operator and to the department.

(8) A person may not place a regulated substance in an underground storage tank unless the owner or operator has been issued a valid permit from the department for the tank. Permits must be issued for a term of 3 years. The department may not issue or renew a permit unless the owner or operator has filed with the department an inspection report by a licensed inspector. Prior to issuing or renewing a permit, the department shall determine, on the basis of the inspection report and other relevant information, whether the operation and maintenance of the tank were in compliance with this part and rules adopted pursuant to this part on the date of inspection.

(9) The department may determine to not issue or not renew a permit for a tank if the department finds that there has been significant noncompliance with this part or with rules, permits, or orders issued pursuant to this part. If the department proposes to not issue or not renew a permit, it must have a written notice letter served personally or by certified mail on the owner or operator informing the owner or operator of the reason for the action. The owner or operator may request a hearing before the board. The hearing request must be in writing and

must be filed with the board no later than 30 days after the service of the notice letter. The contested case provisions of the Montana Administrative Procedure Act, provided for in Title 2, chapter 4, part 6, apply to a hearing conducted under this section.

(2) (a) An employee or agent of the department, at any reasonable time and upon presentation of credentials, may enter upon and inspect any property, premises, or place at which:

(i) regulated substances are or have been stored in underground storage tanks if the department has reason to suspect that the tanks are not in compliance with the provisions of this part or rules adopted under this part; or

(ii) records pertinent to the regulated substances activities are maintained.

(b) The employee or agent of the department may have access to and may copy any records relating to the regulated substances for the purposes of developing rules under this part or enforcing the provisions of this part, rules adopted under this part, or a permit or an order issued under this part.

(3) In the course of an inspection under this section, the employee or agent of the department may take samples of any regulated substance or suspected regulated substance, including samples from any soil or ground water. If the employee or agent of the department takes a sample of any regulated substance or suspected regulated substance, the employee or agent shall, prior to leaving the premises, give to the owner, operator, or agent in charge a receipt describing the sample taken and, if requested, a portion of each sample equal in volume or weight to the portion retained. If any analysis is made of the samples, a copy of the results of the analysis must be furnished to the owner, operator, or agent in charge.

(2) If the department determines that the presence of a regulated substance or the release of the regulated substance may present a substantial hazard to the public health or to the environment, it may issue an order requiring the owner or operator of the site to conduct reasonable monitoring, testing, analysis, and reporting with respect to the site in order to ascertain the nature and extent of the hazard.

(3) An order issued under subsection (2) must require that the person to whom the order is issued submit to the department within 30 days a proposal for carrying out the required monitoring, testing, analysis, and reporting.

(1) When the department believes that a violation of this part or a rule adopted under this part has occurred, it may serve written notice of the violation personally or by certified mail on the alleged violator or the violator's agent. The notice must specify the provision of this part or the rule alleged to be violated and the facts alleged to constitute a violation and may include an order to take necessary corrective action within a reasonable period of time stated in the order. The order becomes final unless, within 30 days after the notice is served, the person named requests, in writing, a hearing before the board.

On receipt of the request, the board shall schedule a hearing. Service by mail is complete on the date of receipt.

(2) If, after a hearing held under subsection (1), the board finds that a violation has occurred, it shall either affirm or modify the department's order. An order issued by the department or by the board may prescribe the date by which the violation must cease and may prescribe time limits for particular action. If, after hearing, the board finds that a violation has not occurred, it shall rescind the department's order.

(3) In addition to or instead of issuing an order pursuant to subsection (1), the department may:

(a) require the alleged violator to appear before the board or department, by subpoena or subpoena duces tecum, for a hearing at a time and place specified in the notice to answer the charges complained of or to provide information regarding the alleged violation or its actual or potential impact on the public health and welfare or the environment;

(b) initiate action under 75-11-513, 75-11-514, or 75-11-516; or

(c) assess administrative penalties and issue corrective action orders under 75-11-525.

(4) In the case of disobedience of any subpoena issued and served under this section or of the refusal of any witness to testify as to any material matter with regard to which the witness may be interrogated in a hearing or investigation before the board or the department, the board or department may apply to any district court in the state for an order to compel compliance with the subpoena or the giving of testimony. The court shall hear the matter as expeditiously as possible. If the disobedience or refusal is found to be unjustified, the court shall enter an order requiring compliance. Disobedience of the order is punishable by contempt of court in the same manner and by the same procedures as is provided for like conduct committed in the course of civil actions in district court.

(5) If a person fails to comply with an order issued pursuant to subsection (1) or (3) within the time allowed in the order, the department may enter the property on which the underground storage tank that is in violation is located and temporarily close the tank. If the department finds that permanent closure is necessary to prevent substantial environmental harm or because the owner or operator is unlikely to comply with the order, it may permanently close the tank.

(6) This section does not prevent the board or department from making efforts to obtain voluntary compliance through warning, conference, or any other appropriate means.

(3) (a) The cumulative benchmarks that are provided in subsection (3)(b) must be met. If the benchmarks are not met, money appropriated for petroleum storage tank leak prevention may not be included in the department's base budget, as defined in 17-7-102, for the current biennium.

(b) The cumulative benchmarks are as follows:

Date	Total Number of Resolved Sites
December 31, 2011	45
July 1, 2012	90
December 31, 2012	135
July 1, 2013	180
December 31, 2013	225
July 1, 2014	270
December 31, 2014	315
July 1, 2015	360

(4) The department shall report to the environmental quality council established by 5-16-101 at the next regularly scheduled meeting of the council following the passing of each benchmark date in subsection (3)(b).

(5) As used in this section, the following definitions apply:

(a) "Petroleum storage tank" has the same meaning as prescribed in 75-11-302.

(b) "Release" has the same meaning as prescribed in 75-11-302.

(c) "Resolved" means a determination by the department that all cleanup requirements have been met and that conditions at the site ensure present and long-term protection of human health, safety, and the environment.

75-11-525. Administrative penalties for violations — appeals — venue. (1) (a) A person who violates any of the provisions of this part or any rules promulgated under the authority of this part may be assessed and ordered by the department to pay an administrative penalty not to exceed $500 for each violation. This limitation on administrative penalties applies only to penalties assessed under this section. Each occurrence of the violation and each day that it remains uncorrected constitutes a separate violation. The department may suspend a portion of the administrative penalty assessed under this section if the condition that caused the assessment of the penalty is corrected within a specified time. Assessment of an administrative penalty under this section may be made in conjunction with any order or other administrative action authorized by this chapter.

(b) Penalties assessed under this subsection (1) must be determined in accordance with the penalty factors in 75-1-1001.

(2) When the department assesses an administrative penalty under this section, it must have written notice served personally or by certified mail on the alleged violator or the violator's agent. For purposes of this chapter, service by mail is complete on the day of receipt. The notice must state:

(a) the provision alleged to be violated;

(b) the facts alleged to constitute the violation;

(c) the amount of the administrative penalty assessed under this section;

(d) the amount, if any, of the penalty to be suspended upon correction of the condition that caused the assessment of the penalty;

(e) the nature of any corrective action that the department requires, whether or not a portion of the penalty is to be suspended;

(f) as applicable, the time within which the corrective action is to be taken and the time within which the administrative penalty is to be paid; and

(g) the right to appeal or to a hearing to mitigate the penalty assessed.

(3) A person assessed a penalty under this section may request a hearing before the board to either contest the alleged violation or request mitigation of the penalty. The contested case provisions of the Montana Administrative Procedure Act, provided for in Title 2, chapter 4, part 6, apply to a hearing conducted under this section. If a hearing is held under this section, it must be held in Lewis and Clark County or the county in which the alleged violation occurred.

(4) If the department is unable to collect an administrative penalty assessed under this section or if a person fails to pay all or any portion of an administrative penalty assessed under this section, the department may take action in district court to recover the penalty amount and any additional amounts assessed or sought under this chapter. The action must be brought in the district court of the county in which the violation occurred or, if mutually agreed on by the parties in the action, in the district court of the first judicial district, Lewis and Clark County.

(5) Action under this section does not bar action under this chapter or any other remedy available to the department for violations of underground storage tank laws or rules promulgated under those laws.

(6) Administrative penalties collected under this section must be deposited in the state general fund.

It is the legislature's intent that the requirements of this chapter provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) It is the constitutionally declared policy of this state to maintain and improve a clean and healthful environment for present and future generations, to protect the environmental life-support system from degradation and prevent unreasonable depletion and degradation of natural resources, and to provide for administration and enforcement to attain these objectives.

(3) It is also constitutionally declared in the state of Montana that the inalienable rights of the citizens of this state include the right to pursue life's basic necessities, to enjoy and defend life and liberty, to acquire, possess, and protect property, and to seek safety, health, and happiness in all lawful ways. The balancing of these constitutional rights is necessary in order to maintain a sustainable quality of life for all Montanans.

(4) The legislature finds that the construction of additional electric transmission facilities, pipeline facilities, or geothermal facilities may be necessary to meet the increasing need for electricity, energy, and other products. Therefore, it is necessary to ensure that the location, construction, and operation of electric transmission facilities, pipeline facilities, or geothermal facilities are in compliance with state law and that an electric transmission facility, pipeline facility, or geothermal facility may not be constructed or operated within this state without a certificate of compliance acquired pursuant to this chapter.

(5) The legislature finds that increasing the capacity of existing transmission lines by replacing less efficient aging low-voltage transmission lines with higher-voltage lines, installing new conductors to lower impedance, and adding circuits to existing transmission lines within existing linear corridors reduces energy loss, conserves energy, and prevents unreasonable depletion and degradation of natural resources. Therefore, transmission upgrades within existing corridors serve the public interest, convenience, and necessity and transmission providers are encouraged to construct those transmission upgrades.

(6) The legislature also finds that it is the purpose of this chapter to:

(a) ensure protection of the state's environmental resources, including but not limited to air, water, animals, plants, and soils;

(b) ensure consideration of socioeconomic impacts;

(c) provide citizens with the opportunity to participate in facility siting decisions; and

(d) establish a coordinated and efficient method for the processing of all authorizations required for regulated facilities under this chapter.

Certification Proceedings

75-20-201. Certificate required — operation in conformance — certificate for nuclear facility — applicability to federal facilities. (1) Except for a facility under diligent onsite physical construction or in operation on January 1, 1973, a person may not commence to construct a facility in the state without first applying for and obtaining a certificate of compliance issued with respect to the facility by the department.

(2) A facility with respect to which a certificate is issued may not be constructed, operated, or maintained except in conformity with the certificate and any terms, conditions, and modifications contained within the certification.

(3) A certificate may only be issued pursuant to this chapter.

(4) If the department decides to issue a certificate for a nuclear facility, it shall report the recommendation to the applicant and may not issue the certificate until the recommendation is approved by a majority of the voters in a statewide election called by initiative or referendum according to the laws of this state.

(5) A person that proposes to construct an energy-related project that is not defined as a facility pursuant to 75-20-104(8) may petition the department to review the energy-related project under the provisions of this chapter. The construction or installation of an energy storage facility, as defined in 15-6-157, is not considered an energy-related project under the provisions of this chapter. A certificate for the construction or installation of an energy storage facility is not required under this chapter.

(6) This chapter applies, to the fullest extent allowed by federal law, to all federal facilities and to all facilities over which an agency of the federal government has jurisdiction.

(7) All judicial challenges of certificates for projects with a project cost, as determined by the court, of more than $1 million must have precedence over any civil cause of a different nature pending in that court. If the court determines that the challenge was without merit or was for an improper purpose, such as to harass, to cause unnecessary delay, or to impose needless or increased cost in litigation, the court may award attorney fees and costs incurred in defending the action.

75-20-213. Supplemental material — amendments. (1) An application for an amendment of an application or a certificate must be in the form and contain the information that the department by rule or by order prescribes. Notice of an application must be given as set forth in 75-20-211(3) and (4).

(2) An application may be amended by an applicant any time prior to the department's recommendation. If the proposed amendment is such that it prevents the department or the agencies listed in 75-20-216(6) from carrying out their duties and responsibilities under this chapter, the department may require additional filing fees and additional amendment application review time. The total review time may not exceed 9 months from the date the department accepts a completed application for amendment.

(3) The applicant shall submit supplemental material in a timely manner as requested by the department or as offered by the applicant to explain, support, or provide the detail with respect to an item described in the original application, without filing an application for an

amendment. The department's determination as to whether information is supplemental or whether an application for amendment is required is conclusive.

75-20-215. Filing fee — accountability — refund — use. (1) (a) A filing fee must be deposited in the state special revenue fund for the use of the department in administering Title 75, chapter 1, and this chapter. The applicant shall pay to the department a filing fee as provided in this section based upon the department's estimated costs of processing the application under this chapter. The fee may not exceed the following scale based upon the estimated cost of the facility:

(i) 6% of any estimated cost up to $1 million; plus
(ii) 1% of any estimated cost over $1 million and up to $5 million; plus
(iii) 0.8% of any estimated cost over $5 million and up to $10 million; plus
(iv) 0.5% of any estimated cost over $10 million and up to $20 million; plus
(v) 0.25% of any estimated cost over $20 million and up to $100 million; plus
(vi) 0.125% of any estimated cost over $100 million and up to $500 million; plus
(vii) 0.05% of any estimated cost over $500 million and up to $1 billion; plus
(viii) 0.025% of any estimated cost over $1 billion.

(b) The department may allow in its discretion a credit against the fee payable under this section for the development of information or providing of services required under this chapter or required for preparation of an environmental impact statement or assessment under the Montana or national environmental policy acts. The applicant may submit the information to the department, together with an accounting of the expenses incurred in preparing the information. The department shall evaluate the applicability, validity, and usefulness of the data and determine the amount that may be credited against the filing fee payable under this section. Upon 30 days' notice to the applicant, this credit may at any time be reduced if the department determines that it is necessary to carry out its responsibilities under this chapter.

(2) (a) The department may contract with an applicant for the development of information, provision of services, and payment of fees required under this chapter. The contract may continue an agreement entered into pursuant to 75-20-106. Payments made to the department under a contract must be credited against the fee payable pursuant to this section. Notwithstanding the provisions of this section, the revenue derived from the filing fee must be sufficient to enable the department, the board, and the agencies listed in 75-20-216(6) to carry out their responsibilities under this chapter. The department may amend a contract to require additional payments for necessary expenses up to the limits set forth in subsection (1)(a) upon 30 days' notice to the applicant. The department and applicant may enter into a contract that exceeds the scale provided in subsection (1)(a).

(b) If a contract is not entered into, the applicant shall pay the filing fee in installments in accordance with a schedule of installments developed by the department, provided that an installment may not exceed 20% of the total filing fee provided for in subsection (1).

(3) The estimated cost of upgrading an existing transmission substation may not be included in the estimated cost of a proposed facility for the purpose of calculating a filing fee.

(4) If an application consists of a combination of two or more facilities, the filing fee must be based on the total estimated cost of the combined facilities.

(5) The applicant is entitled to an accounting of money expended and to a refund with interest at the rate of 6% a year of that portion of the filing fee not expended by the department in carrying out its responsibilities under this chapter. A refund must be made after all administrative and judicial remedies have been exhausted by all parties to the certification proceedings.

(6) The revenue derived from filing fees must be used by the department in compiling the information required for rendering a decision on a certificate and for carrying out its and the board's other responsibilities under this chapter.

75-20-216. Study, evaluation, and report on proposed facility — assistance by other agencies. (1) After receipt of an application, the department shall within 30 days notify the applicant in writing that:

(a) the application is in compliance and is accepted as complete; or

(b) the application is not in compliance and shall list the deficiencies. Upon correction of these deficiencies and resubmission by the applicant, the department shall within 15 days notify the applicant in writing that the application is in compliance and is accepted as complete.

(2) Upon receipt of an application complying with 75-20-211 through 75-20-213, 75-20-215, and this section, the department shall commence an evaluation of the proposed facility and its effects, considering all applicable criteria listed in 75-20-301, and shall issue a decision, opinion, order, certification, or permit as provided in subsection (3). The department shall use, to the extent that it considers applicable, valid and useful existing studies and reports submitted by the applicant or compiled by a state or federal agency.

(3) Except as provided in 75-1-205(4), 75-1-208(4)(b), and 75-20-231, the department shall issue, within 9 months following the date of acceptance of an application, any decision, opinion, order, certification, or permit required under the laws, other than those contained in this chapter, administered by the department. A decision, opinion, order, certification, or permit, with or without conditions, must be made under those laws. Nevertheless, the department retains authority to make the determination required under 75-20-301(1)(c) or (3). The decision, opinion, order, certification, or permit must be used in the final site selection process. Prior to the issuance of a preliminary decision by the board and pursuant to rules adopted by the department, the department shall provide an opportunity for public review and comment.

(4) Except as provided in 75-1-205(4), 75-1-208(4)(b), and 75-20-231, within 9 months following acceptance of an application for a facility, the department shall issue a report that must contain the department's studies, evaluations, recommendations, customer fiscal impact analysis, if required pursuant to 69-2-216, and other pertinent documents resulting from its study and evaluation. An environmental impact statement or analysis prepared pursuant to the Montana Environmental Policy Act may be included in the department findings if compelling evidence indicates that adverse environmental impacts are likely to result due to the construction and operation of a proposed facility. If the application is for a combination of two or more facilities, the department shall issue its report within the greater of the lengths of time provided for in this subsection for either of the facilities.

(5) For projects subject to joint review by the department and a federal land management agency, the department's certification decision may be timed to correspond to the record of decision issued by the participating federal agency.

(6) The departments of transportation; fish, wildlife, and parks; natural resources and conservation; revenue; and public service regulation and the consumer counsel shall report to the department information relating to the impact of the proposed site on each department's area of expertise. The report may include opinions as to the advisability of granting, denying, or modifying the certificate. The department shall allocate funds obtained from filing fees to the departments making reports and to the office of consumer counsel to reimburse them for the costs of compiling information and issuing the required report.

75-20-219. Amendments to certificate. (1) Within 30 days after notice of an amendment to a certificate is given as set forth in 75-20-213(1), including notice to all active parties to the original proceeding, the department shall determine whether the proposed change in the facility would result in a material increase in any environmental impact of the facility or a substantial change in the location of all or a portion of the facility as set forth in the certificate. If the department determines that the proposed change would result in a material increase in any environmental impact of the facility or a substantial change in the location of all or a portion of the facility, the department shall grant, deny, or modify the amendment with conditions as it considers appropriate.

(2) In those cases in which the department determines that the proposed change in the facility would not result in a material increase in any environmental impact or would not be a substantial change in the location of all or a portion of the facility, the department shall automatically grant the amendment either as applied for or upon terms or conditions that the department considers appropriate.

(3) If a hearing is requested under 75-20-223(2), the party requesting the hearing has the burden of showing by clear and convincing evidence that the department's determination is not reasonable.

75-20-223. Board review of department decisions. (1) (a) A person aggrieved by the final decision of the department on an application for a certificate or the issuance of an air or water quality decision, opinion, order, certification, or permit under this chapter may within 30 days appeal the decision to the board. Except as provided in this section, the contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6, apply to a hearing before the board.

(b) If the department provided an opportunity for public comment on the application, the request for a hearing must be limited to those issues the party has raised in comments made to the department during the comment period unless the issues are related to a material change in law made during the comment period, to a judicial decision issued after the comment period, or to a material change to the draft permit, which was submitted for public comment, made by the department in the final permit decision and upon which the public did not have a meaningful opportunity to comment. The request for hearing must be filed within 30 days after the department renders its decision. An affidavit setting forth the grounds for the request must be filed with the request for a hearing.

(c) If a hearing is requested by a person other than the applicant or permittee, the applicant or permittee may, by filing a written election with the board within 15 days of receipt of the request for hearing, elect to have the matter proceed to hearing before the board or to have the matter submitted directly to the district court for judicial review of the agency decision. The party who requests the hearing may elect to have the matter submitted either to the board for a hearing or to the district court for judicial review by submitting a written election to the board with the request for hearing. If there are conflicting elections between the parties, the matter must proceed to district court. If the applicant or permittee is not the person who requested the hearing and has elected to have the matter submitted to the district court, the person who submitted the request for a hearing shall file a petition for review of the permit decision within 15 days of receipt of notice from the permittee. If the person who requested the hearing has elected to have the matter proceed to district court, that person shall file a petition in district court within 15 days of filing the request. The petition must be limited to matters raised in the request for hearing and must be filed in the county in which the facility is located. If the applicant or permittee fails to make an election, the matter must proceed through the contested case process before the board pursuant to the Montana Administrative Procedure Act. The board or the district court shall apply the laws and rules in place when the department issued its decision, and the board or the district court may not consider any issue from a party that was not presented to the department for the department's consideration during the formal comment period unless the issue is related to a material change in law made during the comment period, to a judicial decision issued after the comment period, or to a material change to the draft permit, which was submitted for public comment, made by the department in the final permit decision and upon which the public did not have a meaningful opportunity to comment.

(2) A person aggrieved by the final decision of the department on an application for amendment of a certificate may within 15 days appeal the decision to the board as provided in subsections (1)(b) and (1)(c).

(3) A person aggrieved by the department's decision not to include an environmental impact statement or analysis in the department's findings pursuant to 75-20-216 may within 30 days appeal the decision as provided in subsections (1)(b) and (1)(c).

(4) The board shall issue a final decision within 4 months from the close of the hearing on the merits or, if no hearing is held, within 3 months from the date that briefing by the parties is complete unless the applicant and the party other than the applicant agree in writing to an extension of time.

(5) A customer fiscal impact analysis required by 69-2-216 may not be used as the basis of an appeal of a final decision by the department.

75-20-231. Expedited review. (1) Except as provided in 75-1-208(4)(b), the department shall issue a certification decision within 90 days from the date on which an application is considered complete for a facility that:

(a) is unlikely to result in significant adverse environmental impacts based on the criteria listed in 75-20-232; or

(b) is presently in existence and proposed for upgrade, reconstruction, or relocation and is unlikely to result in significant impacts pursuant to 75-20-232.

(2) A facility that qualifies for expedited review is exempt from undergoing an alternative siting study, except as provided in 75-1-201.

History: En. Sec. 1, Ch. 329, L. 1997; amd. Sec. 9, Ch. 293, L. 2001; amd. Sec. 8, Ch. 299, L. 2001; amd. Sec. 11, Ch. 217, L. 2003.

75-20-232. Criteria for identifying proposed facilities that qualify for expedited review. (1) In order for a facility to qualify for expedited review under 75-20-231, the department shall make a significance determination of the impacts associated with a proposed facility. This determination is the basis of the department's decision concerning whether the proposed facility qualifies for expedited review.

(2) The department shall consider the following criteria in determining the significance of each impact that the proposed facility has on the quality of the human environment:

(a) the severity, duration, geographic extent, and frequency of occurrence of the impact;

(b) (i) the probability that the impact will occur if the proposed action occurs; or

(ii) reasonable assurance in keeping with the potential severity of an impact that the impact will not occur;

(c) growth-inducing or growth-inhibiting aspects of the impact, including the relationship or contribution of the impact to cumulative impacts;

(d) the quantity and quality of each environmental resource or value that would be affected, including the uniqueness and fragility of those resources or values;

(e) the importance to the state and to society of each environmental resource or value that would be affected;

(f) any precedent that would be set as a result of an impact of the proposed action that would commit the department to future actions with significant impacts or to a decision in principle about future actions;

(g) potential conflict with local, state, or federal laws, requirements, or formal plans;

(h) the degree to which the impacts on the human environment are likely to create a high level of public concern; and

(i) the economic importance and benefits to the state and the local community of the proposed facility.

(3) An impact may be adverse, beneficial, or both. If none of the adverse effects of the impact are significant, expedited review is required.

Decisions

75-20-301. Decision of department — findings necessary for certification. (1) Within 30 days after issuance of the report pursuant to 75-20-216 for facilities defined in 75-20-104(8)(a) and (8)(b), the department shall approve a facility as proposed or as modified or an alternative to a proposed facility if the department finds and determines:

(a) the basis of the need for the facility;

(b) the nature of the probable environmental impact;

(c) that the facility minimizes adverse environmental impact, considering the state of available technology and the nature and economics of the various alternatives;

(d) in the case of an electric, gas, or liquid transmission line or aqueduct:

(i) what part, if any, of the line or aqueduct will be located underground;

(ii) that the facility is consistent with regional plans for expansion of the appropriate grid of the utility systems serving the state and interconnected utility systems; and

(iii) that the facility will serve the interests of utility system economy and reliability;

(e) that the location of the facility as proposed conforms to applicable state and local laws and regulations, except that the department may refuse to apply any local law or regulation if it finds that, as applied to the proposed facility, the law or regulation is unreasonably restrictive in view of the existing technology, of factors of cost or economics, or of the needs of consumers, whether located inside or outside the directly affected government subdivisions;

(f) that the facility will serve the public interest, convenience, and necessity;

(g) that the department or board has issued any necessary air or water quality decision, opinion, order, certification, or permit as required by 75-20-216(3); and

(h) that the use of public lands or federally designated energy corridors for location of a facility defined in 75-20-104(8)(a) or (8)(b) was evaluated and public lands or federally designated energy corridors for that facility were selected whenever their use was compatible with:

(i) the requirements of subsections (1)(a) through (1)(g); and

(ii) transmission line reliability criteria established by transmission reliability agencies for a facility defined in 75-20-104(8)(a).

(2) In determining that the facility will serve the public interest, convenience, and necessity under subsection (1)(f), the department shall consider:

(a) the items listed in subsections (1)(a) and (1)(b);

(b) the benefits to the applicant and the state resulting from the proposed facility;

(c) the effects of the economic activity resulting from the proposed facility;

(d) the effects of the proposed facility on the public health, welfare, and safety;

(e) any other factors that it considers relevant.

(3) Within 30 days after issuance of the report pursuant to 75-20-216 for a facility defined in 75-20-104(8)(c), the department shall approve a facility as proposed or as modified or an alternative to a proposed facility if the department finds and determines:

(a) that the facility or alternative incorporates all reasonable, cost-effective mitigation of significant environmental impacts; and

(b) that unmitigated impacts, including those that cannot be reasonably quantified or valued in monetary terms, will not result in:

(i) a violation of a law or standard that protects the environment; or

(ii) a violation of a law or standard that protects the public health and safety.

(4) For facilities defined in 75-20-104, if the department cannot make the findings required in this section, it shall deny the certificate.

(1) If the department determines that the location of all or a part of the proposed facility should be modified, it may condition its certificate upon the modification, provided that the persons residing in the area affected by the modification have been given reasonable notice of the modification.

(2) The department may require the applicant to post performance bonds to guarantee successful reclamation and revegetation of the project area.

75-20-303. Opinion issued with decision — contents. (1) In rendering a decision on an application for a certificate, the department shall issue an opinion stating its reasons for the action taken.

(2) If the department has found that any regional or local law or regulation that would be otherwise applicable is unreasonably restrictive, it shall state in its opinion the reasons that it is unreasonably restrictive.

(3) A certificate issued by the department must include the following:

(a) an environmental evaluation statement related to the facility being certified. The statement must include but is not limited to analysis of the following information:

(i) the environmental impact of the proposed facility; and

(ii) any adverse environmental effects that cannot be avoided by issuance of the certificate;

(b) a plan for monitoring environmental effects of the proposed facility;

(c) a plan for monitoring the certified facility site between the time of certification and completion of construction;

(d) a time limit as provided in subsection (4); and

(e) a statement signed by the applicant showing agreement to comply with the requirements of this chapter and the conditions of the certificate.

(4) (a) The department shall issue as part of the certificate the following time limits:

(i) For a facility as defined in 75-20-104(8)(a) that is more than 30 miles in length and for a facility defined in 75-20-104(8)(b), construction must be completed within 10 years.

(ii) For a facility as defined in 75-20-104(8)(a) that is 30 miles or less in length, construction must be completed within 5 years.

(iii) For a facility as defined in 75-20-104(8)(c), construction must begin within 6 years and continue with due diligence in accordance with preliminary construction plans established in the certificate.

(b) Unless extended, a certificate lapses and is void if the facility is not constructed or if construction of the facility is not commenced within the time limits provided in this section.

(c) The time limit may be extended for a reasonable period upon a showing by the applicant to the department that a good faith effort is being undertaken to complete construction under subsections (4)(a)(i) and (4)(a)(ii). Under this subsection, a good faith effort includes the process of acquiring any necessary state or federal permit or certificate for the facility and the process of judicial review of a permit or certificate.

(d) Construction may begin immediately upon issuance of a certificate unless the department finds that there is substantial and convincing evidence that a delay in the commencement of construction is necessary and should be established for a particular facility.

(5) (a) For a facility defined in 75-20-104(8)(a) and (8)(b), the environmental review conducted pursuant to Title 75, chapter 1, parts 1 through 3, prepared by the department must designate a 1-mile-wide facility siting corridor along the facility route.

(b) The department shall site a corridor of at least 500 feet in width for the facility within the 1-mile-wide corridor in accordance with 75-20-301.

(c) If the certificate holder complies with subsection (6), a certificate holder may modify the siting of the facility within the 1-mile-wide corridor without complying with the provisions of 75-20-219 if the alternate siting is done in a manner that minimizes the impact on residential areas, crop land, and sensitive sites.

(6) (a) A certificate holder may submit an adjustment of the location of a facility outside the corridor designated pursuant to subsection (5) to the department. The adjustment must be accompanied by the written agreement of the affected property owner and all contiguous property owners that would be affected. The submission must include a map showing the approved facility location and the proposed adjustment.

(b) The certificate holder may construct the facility as described in the submission unless the department notifies the certificate holder within 15 days of the submission that the department has determined that:

(i) the adjustment would change the basis of any finding required under 75-20-301 to the extent that the department would have selected a different location for the facility; or

(ii) the adjustment would materially increase unmitigated adverse impacts.

(c) Siting of a facility within the corridor designated pursuant to subsection (5) or an adjustment pursuant to subsection (6)(a) is not subject to:

(i) Title 75, chapter 1, part 2;

(ii) a certificate amendment under 75-20-219; or

(iii) a board review under 75-20-223.

75-20-304. Waiver of provisions of certification proceedings. (1) The department may waive compliance with any of the provisions of 75-20-216 and this part if the applicant makes a clear and convincing showing to the department at a public hearing that an immediate, urgent need for a facility exists and that the applicant did not have knowledge that the need for the facility existed sufficiently in advance to fully comply with the provisions of 75-20-216 and this part.

(2) The department may waive compliance with any of the provisions of this chapter upon receipt of notice by a person subject to this chapter that a facility or associated facility has been damaged or destroyed as a result of fire, flood, or other natural disaster or as the result of insurrection, war, or other civil disorder and there exists an immediate need for construction of a new facility or associated facility or the relocation of a previously existing facility or associated facility in order to promote the public welfare.

(3) The department shall waive compliance with the requirements of 75-20-301(1)(c), (2)(b), and (2)(c) and the requirements of 75-20-211(1)(a)(iii) and (1)(a)(iv) and 75-20-216(3) relating to consideration of alternative sites if the applicant makes a clear and convincing showing to the department at a public hearing that:

(a) a proposed facility will be constructed in a county where a single employer within the county has permanently curtailed or ceased operations, causing a loss of 250 or more permanent jobs within 2 years at the employer's operations within the preceding 10-year period;

(b) the county and municipal governing bodies in whose jurisdiction the facility is proposed to be located support by resolution the waiver;

(c) the proposed facility will be constructed within a 15-mile radius of the operations that have ceased or been curtailed; and

(d) the proposed facility will have a beneficial effect on the economy of the county in which the facility is proposed to be located.

(4) The waiver provided for in subsection (3) applies only to permanent job losses by a single employer. The waiver provided for in subsection (3) does not apply to jobs of a temporary or seasonal nature, including but not limited to construction jobs or job losses during labor disputes.

(5) The waiver provided for in subsection (3) does not apply to consideration of alternatives or minimum adverse environmental impact for a facility defined in 75-20-104(8)(a) or (8)(b) or for an associated facility defined in 75-20-104(3).

(6) The applicant shall pay all expenses required to process and conduct a hearing on a waiver request under subsection (3). However, any payments made under this subsection must be credited toward the fee paid under 75-20-215 to the extent that the data or evidence presented at the hearing or the decision of the department under subsection (3) can be used in making a certification decision under this chapter.

(7) The department may grant only one waiver under subsections (3) and (4) for each permanent loss of jobs as defined in subsection (3)(a).

Part 4
Postcertification and Legal Responsibilities

75-20-401. Additional requirements by other governmental agencies not permitted after issuance of certificate — exceptions — venue for challenging certificate issuance. (1) Notwithstanding any other law, a state or regional agency or municipality or other local government may not require any approval, consent, permit, certificate, or other condition for the construction, operation, or maintenance of a facility authorized by a certificate issued pursuant to this chapter, except that the department and board retain the authority that they have or may be granted to determine compliance of the proposed facility with state and federal standards and implementation plans for air and water quality and to enforce those standards.

(2) This chapter does not prevent the application of state laws for the protection of employees engaged in the construction, operation, or maintenance of a facility.

(3) A judicial challenge to a certificate issued pursuant to this chapter by a party other than the certificate holder or applicant must include the party to whom the certificate was issued as provided in this chapter unless otherwise agreed to by the certificate holder or applicant. All judicial challenges of certificates for projects with a project cost, as determined by the court, of more than $1 million must have precedence over any civil cause of a different nature pending in that court. If the court determines that the challenge was without merit or was for an improper purpose, such as to harass, to cause unnecessary delay, or to impose needless or increased cost in litigation, the court may award attorney fees and costs incurred in defending the action.

(4) An action to challenge the issuance of a certificate pursuant to this chapter must be brought in the county in which the activity authorized by the certificate will occur. If an activity will occur in more than one county, the action may be brought in any of the counties in which the activity will occur.

History: En. Sec. 17, Ch. 327, L. 1973; amd. Sec. 17, Ch. 494, L. 1975; R.C.M. 1947, 70-817; amd. Sec. 18, Ch. 676, L. 1979; amd. Sec. 231, Ch. 418, L. 1995; amd. Sec. 23, Ch. 361, L. 2003; amd. Sec. 10, Ch. 337, L. 2005.

75-20-402. Monitoring. The department shall monitor the operations of all certificated facilities for ensuring continuing compliance with this chapter and certificates issued under this chapter and for discovering and preventing noncompliance with this chapter and the certificates. The applicant shall pay all expenses related to the monitoring plan established in 75-20-303(3)(b) or (3)(c) to the extent federal funds available for the facility, as determined by the department, have not been provided for those purposes.

History: En. Sec. 20, Ch. 327, L. 1973; amd. Sec. 4, Ch. 268, L. 1974; amd. Sec. 20, Ch. 494, L. 1975; R.C.M. 1947, 70-820(2); amd. Sec. 19, Ch. 676, L. 1979; amd. Sec. 5, Ch. 591, L. 1985; amd. Sec. 232, Ch. 418, L. 1995; amd. Sec. 19, Ch. 329, L. 1997.

75-20-403. Revocation or suspension of certificate. Following notice and an opportunity for a hearing, a certificate may be revoked or suspended by the department:

(1) for any material false statement in the application or in accompanying statements or studies required of the applicant if a true statement would have warranted the department's refusal to grant a certificate;

(2) for failure to maintain safety standards or to comply with the terms or conditions of the certificate; or

(3) for violation of any provision of this chapter, the rules issued under this chapter, or orders of the department.

History: En. Sec. 18, Ch. 327, L. 1973; amd. Sec. 18, Ch. 494, L. 1975; R.C.M. 1947, 70-818(1); amd. Sec. 2, Ch. 128, L. 1985; amd. Sec. 20, Ch. 329, L. 1997.

75-20-404. Enforcement of chapter by residents. (1) A resident of this state with knowledge that a requirement of this chapter or a rule adopted under it is not being enforced by a public officer or employee whose duty it is to enforce the requirement or rule may bring the failure to enforce to the attention of the public officer or employee by a written statement under oath that must state the specific facts of the failure to enforce the requirement or rule.

Knowingly making false statements or charges in the affidavit subjects the affiant to penalties prescribed under the law of perjury.

(2) If the public officer or employee neglects or refuses for an unreasonable time after receipt of the statement to enforce the requirement or rule, the resident may bring an action of mandamus in the district court of the first judicial district of this state, in and for the county of Lewis and Clark. If the court finds that a requirement of this chapter or a rule adopted under it is not being enforced, the court may order the public officer or employee whose duty it is to enforce the requirement or rule to perform the officer's or employee's duties. If the public officer or public employee fails to do so, the public officer or employee must be held in contempt of court and is subject to the penalties provided by law.

75-20-406. Judicial review of board decisions. (1) A person aggrieved by the final decision of the board on an application for a certificate may obtain judicial review of that decision by the filing of a petition in a state district court of competent jurisdiction. A challenge to the issuance of a certificate must be brought in the county in which the activity authorized by the certificate will occur. If an activity will occur in more than one county, the action may be brought in any of the counties in which the activity will occur.

(2) The judicial review procedure is the procedure for contested cases under the Montana Administrative Procedure Act.

75-20-408. Penalties for violation of chapter — civil actions to enforce. (1) (a) Whoever commences to construct or operate a facility without first obtaining a certificate required under 75-20-201 or a waiver of the certificate under 75-20-304(2) or, having first obtained a certificate, constructs, operates, or maintains a facility not in compliance with the certificate or violates any other provision of this chapter or any rule or order adopted under this chapter or knowingly submits false information in any report, 10-year plan, or application required by this chapter or rule or order adopted under this chapter or causes any of the aforementioned acts to occur is liable for a civil penalty of not more than $10,000 for each violation. Penalties assessed under this section must be determined in accordance with the penalty factors in 75-1-1001.

(b) Each day of a continuing violation constitutes a separate offense.

(c) Penalties are recoverable in an action brought by the department. The action must be brought in the district court of the county in which the violation occurred or, if mutually agreed on by the parties in the action, in the district court of the first judicial district, Lewis and Clark County.

(2) Whoever purposely or knowingly violates subsection (1) shall be fined not more than $10,000 for each violation or imprisoned for not more than 1 year, or both. Each day of a continuing violation constitutes a separate offense.

(3) In addition to any penalty provided in subsection (1) or (2), whenever the department determines that a person is violating or is about to violate any of the provisions of this section, it may bring a civil action on behalf of the state in the district court of the first judicial district of Montana, if mutually agreed on by the parties in the action, or in the district court of the county in which the violation occurred or imminent violation will occur, for injunctive or other appropriate relief against the violation and to enforce this chapter or a certificate issued under this chapter. During the pendency of the appeal, the court may upon motion by one of the parties stay or suspend, in whole or in part, the operation of the board's orders on terms the court considers just. The court's action must be in accordance with the practice of courts exercising equity jurisdiction, subject to the following limitations:

(1) No stay may be granted without notice to the parties and an opportunity to be heard by the court.

(2) No board order may be stayed or suspended without finding that irreparable damage would otherwise result to the party seeking the stay or suspension, and any other stay or suspension of a board order must specify the nature of the damage.

If the party petitioning for review prevails upon final resolution of an appeal, the party does not forfeit bond nor is the party responsible for damages caused by delay.

Nuclear Energy Conversion

Employee and Community Hazardous Chemical Information Act, Title 50, ch. 78.
Control of radioactive substances, Title 50, ch. 79.

75-20-1201. Purpose — findings as to nuclear safety — reservation of nuclear facility approval powers to the people. (1) The people of Montana find that substantial public concern exists regarding nuclear reactors and other major nuclear facilities, including the following unresolved issues:

(a) the generation of waste from nuclear facilities, which remains a severe radiological hazard for many thousands of years and to which no means of containment assuring the protection of future generations exists;

(b) the spending of scarce capital to pay the rapidly increasing costs of nuclear facilities, preventing the use of that capital to finance renewable energy sources which hold more promise for supplying useful energy, providing jobs, and holding down energy costs;

(c) the liability of nuclear facilities to sudden catastrophic accidents which can affect large areas of the state, thousands of people, and countless future generations;

(d) the refusal of utilities, industry, and government to assume normal financial responsibility for compensating victims of such nuclear accidents;

(e) the impact of nuclear facilities on the proliferation of nuclear bombs and terrorism;

(f) the increasing pattern of abandonment of used nuclear facilities by their owners, resulting in radiological dangers to present and future societies as well as higher public costs for perpetual management; and

(g) the detrimental effect of the large uranium import program necessary to the expansion of nuclear power on American energy independence, defense policy, and economic well being.

(2) Therefore, the people of Montana reserve to themselves the exclusive right to determine whether major nuclear facilities are built and operated in this state.

History: En. Sec. 1, I.M. 80, app. Nov. 7, 1978.

75-20-1202. Definitions. As used in 75-20-201, 75-20-203, and this part, the following definitions apply:

(1) "Facility", as defined in 75-20-104(8), is further defined to include any nuclear facility as defined in subsection (2)(a).

(2) (a) "Nuclear facility" means each plant, unit, or other facility designed for or capable of:

(i) generating 50 megawatts of electricity or more by means of nuclear fission;

(ii) converting, enriching, fabricating, or reprocessing uranium minerals or nuclear fuels; or

(iii) storing or disposing of radioactive wastes or materials from a nuclear facility.

(b) Nuclear facility does not include any small-scale facility used solely for educational, research, or medical purposes not connected with the commercial generation of energy.

History: En. Sec. 2, I.M. 80, app. Nov. 7, 1978; amd. Sec. 12, Ch. 573, L. 1985; amd. Sec. 235, Ch. 418, L. 1995; amd. Sec. 544, Ch. 546, L. 1995; amd. Sec. 22, Ch. 329, L. 1997.

75-20-1203. Additional requirements for issuance of a certificate for the siting of a nuclear facility. (1) The board may not issue a certificate to construct a nuclear facility unless it finds that:

(a) no legal limits exist regarding the rights of a person or group of persons to bring suit for and recover full and just compensation from the designers, manufacturers, distributors, owners, and/or operators of a nuclear facility for damages resulting from the existence or operation of the facility; and further, that no legal limits exist regarding the total compensation which may be required from the designers, manufacturers, distributors, owners, and/or operators of a nuclear facility for damages resulting from the existence or operation of such facility;

(b) the effectiveness of all safety systems, including but not limited to the emergency core cooling systems, of such nuclear facility has been demonstrated, to the satisfaction of the board, by the comprehensive laboratory testing of substantially similar physical systems in actual operation;

(c) the radioactive materials from such nuclear facilities can be contained with no reasonable chance, as determined by the board, of intentional or unintentional escape or diversion of such materials into the natural environment in such manner as to cause substantial or long-term harm or hazard to present or future generations due to imperfect storage technologies, earthquakes or other acts of God, theft, sabotage, acts of war or other social instabilities, or whatever other causes the board may deem to be reasonably possible, at any time during which such materials remain a radiological hazard; and

(d) the owner of such nuclear facility has posted with the board a bond totaling not less than 30% of the total capital cost of the facility, as estimated by the board, to pay for the decommissioning of the facility and the decontamination of any area contaminated with radioactive materials due to the existence or operation of the facility in the event the owner fails to pay the full costs of such decommissioning and decontamination. Excess bond, if any, shall be refunded to the owner upon demonstration, to the satisfaction of the board, that the site and environs of the facility pose no radiological danger to present or future generations and that whatever other conditions the board may deem reasonable have been met.

(2) Nothing in this section shall be construed as relieving the owner of a nuclear facility from full financial responsibility for the decommissioning of such facility and decontamination of any area contaminated with radioactive materials as a result of the existence or operation of such facility at any time during which such materials remain a radiological hazard.

History: En. Sec. 4, I.M. 80, app. Nov. 7, 1978.

75-20-1204. Annual review of evacuation and emergency medical aid plans. (1) The governor shall annually publish, publicize, and release to the news media and to the appropriate officials of affected communities, in a manner designed to inform residents of the affected communities, the entire evacuation plan specified in the licensing of each certified nuclear facility within this state. Copies of such plan shall be made available to the public upon request at no more than the cost of reproduction.

(2) The governor shall establish procedures for annual review by state and local officials of established evacuation and emergency medical aid plans with regard for, but not limited to, such factors as the adequacy of such plans, changes in traffic patterns, population densities, the locations of schools, hospitals, and industrial developments, and other factors as requested by locally elected representatives.

History: En. Sec. 5, I.M. 80, app. Nov. 7, 1978.

75-20-1205. Emergency approval authority invalid for nuclear facilities. Notwithstanding the provisions of 75-20-304(2) and (3), the board may not waive compliance with any of the provisions of 75-20-201 and 75-20-203 or this part relating to certification of a nuclear facility.

History: En. Sec. 6, I.M. 80, app. Nov. 7, 1978; amd. Sec. 7, Ch. 312, L. 1987; amd. Sec. 23, Ch. 329, L. 1997.

75-25-101. Alternative energy revolving loan account.
75-25-102. Administration of revolving loan account — rulemaking authority.
75-25-103. Outcome measures.

Part 1
General Provisions

75-25-101. Alternative energy revolving loan account. (1) There is a special revenue account called the alternative energy revolving loan account to the credit of the department of environmental quality.

(2) The alternative energy revolving loan account consists of money deposited into the account from air quality penalties from 75-2-401 and 75-2-413 and money from any other source. Any interest earned by the account and any interest that is generated from a loan repayment must be deposited into the account and used to sustain the program.

(3) Funds from the alternative energy revolving loan account may be used to provide loans to individuals, small businesses, units of local government, units of the university system, and nonprofit organizations for the purpose of building alternative energy systems, as defined in 15-32-102:

(a) to generate energy for their own use;

(b) for net metering as defined in 69-8-103; and

(c) for capital investments by those entities for energy conservation purposes, as defined in 15-32-102, when done in conjunction with an alternative energy system.

(4) The amount of a loan may not exceed $40,000, and the loan must be repaid within 10 years.

History: En. Sec. 1, Ch. 591, L. 2001; amd. Sec. 1, Ch. 110, L. 2005; amd. Sec. 40, Ch. 489, L. 2009.

75-25-102. Administration of revolving loan account — rulemaking authority. (1) The department of environmental quality shall adopt rules establishing:

(a) eligibility criteria, including criteria for defining residences, small businesses, and nonprofit organizations, criteria for defining capital investments for energy conservation purposes, ownership of the alternative energy facility, financial capacity to repay the loans, estimated return on investment in the alternative energy and energy conservation, and other matters that the department considers necessary to ensure repayment of loans and to encourage maximum use of the fund for alternative energy and net metering uses;

(b) processes and procedures for disbursing loans, including the agencies or organizations that are allowed to process the loan application for the department; and

(c) terms and conditions for the loans, including repayment schedules and interest.

(2) The department shall solicit assistance in the development and operation of the program from individuals familiar with financial services and persons knowledgeable in alternative energy systems.

(3) Administrative costs charged to the account may not exceed 10% of the total loans or $23,000 a year, whichever is greater. Legal fees and costs associated with collection of debt on principal are not considered administrative costs.

(4) The loan repayment period may not exceed 10 years. The loans must be made at a low interest rate. The department may set the interest rate at an amount that will cover its administrative costs, but the rate may not be less than 1% a year. The department may seek recovery of the amount of principal loaned in the event of default.

History: En. Sec. 2, Ch. 591, L. 2001; amd. Sec. 2, Ch. 110, L. 2005; amd. Sec. 41, Ch. 489, L. 2009.

75-25-103. Outcome measures. The department of environmental quality shall develop reasonable outcome measures by which the success of the alternative energy system loan program provided for in this part must be measured on an annual basis. Minimal outcome that must be measured includes:

(1) a loan loss ratio of under 5%;

(2) the types of alternative energy systems that provided the best overall results for residences and those for small businesses; and

(3) a determination of the amount of energy that was produced because of participation in the program.

(1) Any person or persons, jointly or severally, aggrieved by a decision of the board of adjustment or a taxpayer or an officer, department, board, or bureau of the county may present to a court of record a petition, duly verified, setting forth that the decision is illegal, in whole or in part, and specifying the grounds of the illegality. The petition must be presented to the court within 30 days after the filing of the decision in the office of the board.

(2) Upon presentation of a petition, the court may allow a writ of certiorari directed to the board of adjustment to review the decision of the board of adjustment and shall prescribe in the writ the time within which a return must be made and served upon the relator's attorney, which may not be less than 10 days and may be extended by the court. The allowance of the writ may not stay proceedings upon the decision appealed from, but the court may, upon application, on notice to the board, and on due cause shown, grant a restraining order. The board of adjustment may not be required to return the original papers acted upon by it, but it is sufficient to return certified or sworn copies of the original papers or of portions of the original papers that may be called for by the writ. The return must concisely set forth other facts that may be pertinent and material to show the grounds of the decision appealed from and must be verified.

(3) If, upon the hearing, it appears to the court that testimony is necessary for the proper disposition of the matter, the court may take evidence or appoint a referee to take evidence as it may direct and report the evidence to the court with the referee's findings of fact and conclusions of law, which constitute a part of the proceedings upon which the determination of the court must be made.

(4) The court may reverse or affirm, wholly or partly, or may modify the decision brought up for review.

For the purpose of promoting health, safety, morals, or the general welfare of the community, the city or town council or other legislative body of cities and incorporated towns is hereby empowered to regulate and restrict the height, number of stories, and size of buildings and other structures; the percentage of lot that may be occupied; the size of yards, courts, and other open spaces; the density of population; and the location and use of buildings, structures, and land for trade, industry, residence, or other purposes.

76-2-302. Zoning districts. (1) For the purposes of 76-2-301, the local city or town council or other legislative body may divide the municipality into districts of the number, shape, and area as are considered best suited to carry out the purposes of this part. Within the districts, it may regulate and restrict the erection, construction, reconstruction, alteration, repair, or use of buildings, structures, or land.

(2) All regulations must be uniform for each class or kind of buildings throughout each district, but the regulations in one district may differ from those in other districts.

(3) In a proceeding for a permit or variance to place manufactured housing within a residential zoning district, there is a rebuttable presumption that placement of a manufactured home will not adversely affect property values of conventional housing.

(4) As used in this section, "manufactured housing" means a single-family dwelling, built offsite in a factory on or after January 1, 1990, that is placed on a permanent foundation, is at least 1,000 square feet in size, has a pitched roof and siding and roofing materials that are customarily, as defined by local regulations, used on site-built homes, and is in compliance with the applicable prevailing standards of the United States department of housing and urban development at the time of its production. A manufactured home does not include a mobile home or housetrailer, as defined in 15-1-101.

(5) This section may not be construed to limit conditions imposed in historic districts, local design review standards, existing covenants, or the ability to enter into covenants pursuant to Title 70, chapter 17, part 2.

76-2-303. Procedure to administer certain annexations and zoning laws — hearing and notice. (1) The city or town council or other legislative body of a municipality shall provide for the manner in which regulations and restrictions and the boundaries of districts are determined, established, enforced, and changed, subject to the requirements of subsection (2).

(2) A regulation, restriction, or boundary may not become effective until after a public hearing in relation to the regulation, restriction, or boundary at which parties in interest and citizens have an opportunity to be heard has been held. At least 15 days' notice of the time and place of the hearing must be published in an official paper or a paper of general circulation in the municipality.

(3) (a) For municipal annexations, a municipality may conduct a hearing on the annexation in conjunction with a hearing on the zoning of the proposed annexation if the proposed municipal zoning regulations for the annexed property:

(i) authorize land uses comparable to the land uses authorized by county zoning;

(ii) authorize land uses that are consistent with land uses approved by the board of county commissioners or the board of adjustment pursuant to Title 76, chapter 2, part 1 or 2; or

(iii) are consistent with zoning requirements recommended in a growth policy adopted pursuant to Title 76, chapter 1, for the annexed property.

(b) A joint hearing authorized under this subsection (3) fulfills a municipality's obligation regarding zoning notice and public hearing for a proposed annexation.

76-2-305. Alteration of zoning regulations — protest. (1) A regulation, restriction, and boundary may be amended, supplemented, changed, modified, or repealed. The provisions of 76-2-303 relative to public hearings and official notice apply equally to all changes or amendments.

(2) An amendment may not become effective except upon a favorable vote of two-thirds of the present and voting members of the city or town council or legislative body of the municipality if a protest against a change pursuant to subsection (1) is signed by the owners of 25% or more of:
(a) the area of the lots included in any proposed change; or
(b) those lots or units, as defined in 70-23-102, 150 feet from a lot included in a proposed change.

(3) (a) For purposes of subsection (2), each unit owner is entitled to have the percentage of the unit owner's undivided interest in the common elements of the condominium, as expressed in the declaration, included in the calculation of the protest. If the property, as defined in 70-23-102, spans more than one lot, the percentage of the unit owner's undivided interest in the common elements must be multiplied by the total number of lots upon which the property is located.

(b) The percentage of the unit owner's undivided interest must be certified as correct by the unit owner seeking to protest a change pursuant to subsection (2) or by the presiding officer of the association of unit owners.

(1) The city or town council or other legislative body of such municipality, to protect the public safety, health, and welfare and without following the procedures otherwise required preliminary to the adoption of a zoning ordinance, may adopt as an urgency measure an interim ordinance prohibiting any uses which may be in conflict with a contemplated zoning proposal which the legislative body is considering or studying or intends to study within a reasonable time.

(2) Such interim ordinance shall only be applicable within the city limits and up to 1 mile beyond the corporate boundaries of the city or town and shall take effect upon passage; provided, however, a hearing is first held upon notice reasonably designed to inform all affected parties and in no event shall notice be less than publication in a newspaper of general circulation at least 7 days before the hearing.

(3) Such interim ordinance shall be of no further force and effect 6 months from the date of adoption thereof. However, after notice pursuant to 76-2-303 and pursuant to public hearing, the legislative body may extend such interim ordinance for 1 year. (b) to hear and decide special exceptions to the terms of the ordinance upon which such board is required to pass under such ordinance;

(c) to authorize upon appeal in specific cases such variance from the terms of the ordinance as will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of the provisions of the ordinance will result in unnecessary hardship and so that the spirit of the ordinance shall be observed and substantial justice done.

(2) In exercising the above-mentioned powers, such board may, in conformity with the provisions of this part, reverse or affirm, wholly or partly, or modify the order, requirement, decision, or determination appealed from and may make such order, requirement, decision, or determination as ought to be made and to that end shall have all the powers of the officer from whom the appeal is taken.

(2) The officer from whom the appeal is taken shall, in a timely manner, transmit to the board all papers constituting the record upon which the action appealed was taken.

The petition must be presented to the court within 30 days after the filing of the decision in the office of the board.

(2) Upon the presentation of the petition, the court may allow a writ of certiorari directed to the board of adjustment to review the decision of the board of adjustment and shall prescribe in the writ the time within which a return must be made and served upon the relator's attorney, which may not be less than 10 days and may be extended by the court. The allowance of the writ does not stay proceedings upon the decision appealed from, but the court may, on application, on notice to the board, and on due cause shown, grant a restraining order. The board of adjustment may not be required to return the original papers acted upon by it, but it is sufficient to return certified or sworn copies of the original papers or of portions of the original papers that may be called for by the writ. (1) A foster home, kinship foster home, youth shelter care facility, or youth group home operated under the provisions of 52-2-621 through 52-2-623 or a community residential facility serving eight or fewer persons is considered a residential use of property for purposes of zoning if the home provides care on a 24-hour-a-day basis.

Part 9
Agricultural Activities

76-2-901. Agricultural activities — legislative finding and purpose. (1) The legislature finds that agricultural lands and the ability and right of farmers and ranchers to produce a safe, abundant, and secure food and fiber supply have been the basis of economic growth and development of all sectors of Montana's economy. In order to sustain Montana's valuable farm economy and land bases associated with it, farmers and ranchers must be encouraged and have the right to stay in farming.

(2) It is therefore the intent of the legislature to protect agricultural activities from governmental zoning and nuisance ordinances.

History: En. Sec. 1, Ch. 309, L. 1995.

(1) "Certificate of survey" means a drawing of a field survey prepared by a registered surveyor for the purpose of disclosing facts pertaining to boundary locations.

(2) "Cluster development" means a subdivision with lots clustered in a group of five or more lots that is designed to concentrate building sites on smaller lots in order to reduce capital and maintenance costs for infrastructure through the use of concentrated public services and utilities, while allowing other lands to remain undeveloped.

(3) "Dedication" means the deliberate appropriation of land by an owner for any general and public use, reserving to the landowner no rights that are incompatible with the full exercise and enjoyment of the public use to which the property has been devoted.

(4) "Division of land" means the segregation of one or more parcels of land from a larger tract held in single or undivided ownership by transferring or contracting to transfer title to or possession of a portion of the tract or properly filing a certificate of survey or subdivision plat establishing the identity of the segregated parcels pursuant to this chapter. The conveyance of a tract of record or an entire parcel of land that was created by a previous division of land is not a division of land.

(5) "Examining land surveyor" means a registered land surveyor appointed by the governing body to review surveys and plats submitted for filing.

(6) "Final plat" means the final drawing of the subdivision and dedication required by this chapter to be prepared for filing for record with the county clerk and recorder and containing all elements and requirements set forth in this chapter and in regulations adopted pursuant to this chapter.

(7) "Governing body" means a board of county commissioners or the governing authority of a city or town organized pursuant to law.

(8) "Immediate family" means a spouse, children by blood or adoption, and parents.

(9) "Minor subdivision" means a subdivision that creates five or fewer lots from a tract of record.

(10) "Planned unit development" means a land development project consisting of residential clusters, industrial parks, shopping centers, or office building parks that compose a planned mixture of land uses built in a prearranged relationship to each other and having open space and community facilities in common ownership or use.

(11) "Plat" means a graphical representation of a subdivision showing the division of land into lots, parcels, blocks, streets, alleys, and other divisions and dedications.

(12) "Preliminary plat" means a neat and scaled drawing of a proposed subdivision showing the layout of streets, alleys, lots, blocks, and other elements of a subdivision that furnish a basis for review by a governing body.

(13) "Public utility" has the meaning provided in 69-3-101, except that for the purposes of this chapter, the term includes county or consolidated city and county water or sewer districts as provided for in Title 7, chapter 13, parts 22 and 23, and municipal sewer or water systems and municipal water supply systems established by the governing body of a municipality pursuant to Title 7, chapter 13, parts 42, 43, and 44.

(16) (a) "Tract of record" means an individual parcel of land, irrespective of ownership, that can be identified by legal description, independent of any other parcel of land, using documents on file in the records of the county clerk and recorder's office.

(b) Each individual tract of record continues to be an individual parcel of land unless the owner of the parcel has joined it with other contiguous parcels by filing with the county clerk and recorder:

(i) an instrument of conveyance in which the aggregated parcels have been assigned a legal description that describes the resulting single parcel and in which the owner expressly declares the owner's intention that the tracts be merged; or

(ii) a certificate of survey or subdivision plat that shows that the boundaries of the original parcels have been expunged and depicts the boundaries of the larger aggregate parcel.

(c) An instrument of conveyance does not merge parcels of land under subsection (16)(b)(i) unless the instrument states, "This instrument is intended to merge individual parcels of land to form the aggregate parcel(s) described in this instrument" or a similar statement, in addition to the legal description of the aggregate parcels, clearly expressing the owner's intent to effect a merger of parcels.

(a) is created by order of any court of record in this state or by operation of law or that, in the absence of agreement between the parties to the sale, could be created by an order of any court in this state pursuant to the law of eminent domain, Title 70, chapter 30;

(3) An exemption under subsection (1)(b) applies:

(a) to a division of land of any size;

(b) if the land that is divided is not conveyed to any entity other than the financial or lending institution to which the mortgage, lien, or trust indenture was given or to a purchaser upon foreclosure of the mortgage, lien, or trust indenture. A transfer of the divided land, by the owner of the property at the time that the land was divided, to any party other than those identified in this subsection (3)(b) subjects the division of land to the requirements of this chapter.

Where required by this chapter, when the land upon which an improvement is situated has been subdivided in compliance with this chapter, the sale, rent, lease, or other conveyance of one or more parts of a building, structure, or other improvement situated on one or more parcels of land is not a division of land and is not subject to the terms of this chapter.

Condominiums, townhomes, or townhouses, as those terms are defined in 70-23-102, constructed on land subdivided in compliance with parts 5 and 6 of this chapter or on lots within incorporated cities and towns are exempt from the provisions of this chapter if:

(1) the approval of the original subdivision of land expressly contemplated the construction of the condominiums, townhomes, or townhouses and any applicable park dedication requirements in 76-3-621 are complied with; or

(c) divisions made outside of platted subdivisions by gift, sale, or agreement to buy and sell in which the parties to the transaction enter a covenant running with the land and revocable only by mutual consent of the governing body and the property owner that the divided land will be used exclusively for agricultural purposes;

(d) for five or fewer lots within a platted subdivision, the relocation of common boundaries;

(e) divisions made for the purpose of relocating a common boundary line between a single lot within a platted subdivision and adjoining land outside a platted subdivision. A restriction or requirement on the original platted lot or original unplatted parcel continues to apply to those areas.

(f) aggregation of parcels or lots when a certificate of survey or subdivision plat shows that the boundaries of the original parcels have been eliminated and the boundaries of a larger aggregate parcel are established. A restriction or requirement on the original platted lot or original unplatted parcel continues to apply to those areas.

(2) Notwithstanding the provisions of subsection (1):

(a) within a platted subdivision filed with the county clerk and recorder, a division, redesign, or rearrangement of lots that results in an increase in the number of lots or that redesigns or rearranges six or more lots must be reviewed and approved by the governing body before an amended plat may be filed with the county clerk and recorder;

(b) a change in use of the land exempted under subsection (1)(c) for anything other than agricultural purposes subjects the division to review under parts 5 and 6 of this chapter.

(3) (a) Subject to subsection (3)(b), a division of land may not be made under this section unless the county treasurer has certified that all real property taxes and special assessments assessed and levied on the land to be divided have been paid.

(b) (i) If a division of land includes centrally assessed property and the property taxes applicable to the division of land are not specifically identified in the tax assessment, the department of revenue shall prorate the taxes applicable to the land being divided on a reasonable basis. The owner of the centrally assessed property shall ensure that the prorated real property taxes and special assessments are paid on the land being sold before the division of land is made.

(ii) The county treasurer may accept the amount of the tax prorated pursuant to this subsection (3)(b) as a partial payment of the total tax that is due.

(4) The governing body may examine a division or aggregation of land to determine whether or not the requirements of this chapter apply to the division or aggregation and may establish reasonable fees, not to exceed $200, for the examination.

76-3-301. General restriction on transfer of title to subdivided lands. (1) Except as provided in 76-3-303, every final subdivision plat must be filed for record with the county clerk and recorder before title to the subdivided land can be sold or transferred in any manner. The clerk and recorder of the county shall refuse to accept any plat for record that fails to have the approval of 76-3-611(1) in proper form unless the plat is located in an area over which the state does not have jurisdiction.

(2) The clerk and recorder shall notify the governing body or its designated agent of any land division described in 76-3-207(1).

(3) If transfers not in accordance with this chapter are made, the county attorney shall commence action to enjoin further sales or transfers and compel compliance with all provisions of this chapter. The cost of the action must be imposed against the party not prevailing.

76-3-302. Restrictions on recording instruments relating to land subject to surveying requirements. (1) Except as provided in subsection (2), the county clerk and recorder of any county may not record any instrument that purports to transfer title to or possession of a parcel or tract of land that is required to be surveyed by this chapter unless the required certificate of survey or subdivision plat has been filed with the clerk and recorder and the instrument of transfer describes the parcel or tract by reference to the filed certificate or plat.

(2) Subsection (1) does not apply when the parcel or tract to be transferred:

(a) is in a location in which the state does not have jurisdiction; or

(b) was created before July 1, 1973, and the instrument of transfer for the parcel or tract includes a reference to a previously recorded instrument of transfer or is accompanied by documents that, if recorded, would otherwise satisfy the requirements of this subsection. The reference or document must demonstrate that the parcel or tract existed before July 1, 1973.

(3) The reference or documents required in subsection (2) do not constitute a legal description of the property and may not be substituted for a legal description of the property.

Notwithstanding the provisions of 76-3-301, after the preliminary plat of a subdivision has been approved or conditionally approved, the subdivider may enter into contracts to sell lots in the proposed subdivision if all of the following conditions are met:

(1) under the terms of the contracts, the purchasers of lots in the proposed subdivision make any payments to an escrow agent, which must be a bank or savings and loan association chartered to do business in the state of Montana;

(2) under the terms of the contracts and the escrow agreement, the payments made by purchasers of lots in the proposed subdivision may not be distributed by the escrow agent to the subdivider until the final plat of the subdivision is filed with the county clerk and recorder;

(3) the contracts and the escrow agreement provide that if the final plat of the proposed subdivision is not filed with the county clerk and recorder within 2 years of the preliminary plat approval, the escrow agent shall immediately refund to each purchaser any payments the purchaser has made under the contract;

(4) the county treasurer has certified that no real property taxes assessed and levied on the land to be divided are delinquent; and

(5) the contracts contain the following language conspicuously set out: "The real property that is the subject of this contract has not been finally platted, and until a final plat identifying the property has been filed with the county clerk and recorder, title to the property may not be transferred in any manner."

Where lands are conveyed by reference to a plat, the plat itself or any copy of the plat properly certified by the county clerk and recorder as being a true copy thereof shall be regarded as incorporated into the instrument of conveyance and shall be received in evidence in all courts of this state.

Upon vacation, the governing body or the district court, as provided in 7-5-2502, shall determine to which properties the title to the streets and alleys of the vacated portions must revert. The governing body or the district court, as provided in 7-5-2502, shall take into consideration the previous platting; the manner in which the right-of-way was originally dedicated, granted, or conveyed; the reasons stated in the petition requesting the vacation; the parties requesting the vacation; and any agreements between the adjacent property owners regarding the use of the vacated area. The title to the streets and alleys of the vacated portions may revert to one or more of the owners of the properties within the platted area adjacent to the vacated portions.

(2) However, when any poleline, pipeline, or any other public or private facility is located in a vacated street or alley at the time of the reversion of the title to the vacated street or alley, the owner of the public or private utility facility has an easement over the vacated land to continue the operation and maintenance of the public utility facility.

76-3-504. Subdivision regulations — contents. (1) The subdivision regulations adopted under this chapter must, at a minimum:

(a) list the materials that must be included in a subdivision application in order for the application to be determined to contain the required elements for the purposes of the review required in 76-3-604(1);

(b) except as provided in 76-3-509, 76-3-609, or 76-3-616, require the subdivider to submit to the governing body an environmental assessment as prescribed in 76-3-603;

(c) establish procedures consistent with this chapter for the submission and review of subdivision applications and amended applications;

(d) prescribe the form and contents of preliminary plats and the documents to accompany final plats;

(e) provide for the identification of areas that, because of natural or human-caused hazards, are unsuitable for subdivision development. The regulations must prohibit subdivisions in these areas unless the hazards can be eliminated or overcome by approved construction techniques or other mitigation measures authorized under 76-3-608(4) and (5). Approved construction techniques or other mitigation measures may not include building regulations as defined in 50-60-101 other than those identified by the department of labor and industry as provided in 50-60-901.

(f) prohibit subdivisions for building purposes in areas located within the floodway of a flood of 100-year frequency, as defined by Title 76, chapter 5, or determined to be subject to flooding by the governing body;

(g) prescribe standards for:

(i) the design and arrangement of lots, streets, and roads;

(ii) grading and drainage;

(iii) subject to the provisions of 76-3-511, water supply and sewage and solid waste disposal that meet the:

(A) regulations adopted by the department of environmental quality under 76-4-104 for subdivisions that will create one or more parcels containing less than 20 acres; and

(B) standards provided in 76-3-604 and 76-3-622 for subdivisions that will create one or more parcels containing 20 acres or more and less than 160 acres; and

(iv) the location and installation of public utilities;

(h) provide procedures for the administration of the park and open-space requirements of this chapter;

(i) provide for the review of subdivision applications by affected public utilities and those agencies of local, state, and federal government identified during the preapplication consultation conducted pursuant to subsection (1)(q) or those having a substantial interest in a proposed subdivision. A public utility or agency review may not delay the governing body's action on the application beyond the time limits specified in this chapter, and the failure of any agency to complete a review of an application may not be a basis for rejection of the application by the governing body.

(j) when a subdivision creates parcels with lot sizes averaging less than 5 acres, require the subdivider to:

(i) reserve all or a portion of the appropriation water rights owned by the owner of the land to be subdivided and transfer the water rights to a single entity for use by landowners within the subdivision who have a legal right to the water and reserve and sever any remaining surface water rights from the land;

(ii) if the land to be subdivided is subject to a contract or interest in a public or private entity formed to provide the use of a water right on the subdivision lots, establish a landowner's water use agreement administered through a single entity that specifies administration and the rights and responsibilities of landowners within the subdivision who have a legal right and access to the water; or

(iii) reserve and sever all surface water rights from the land;

(k) (i) except as provided in subsection (1)(k)(ii), require the subdivider to establish ditch easements in the subdivision that:

(A) are in locations of appropriate topographic characteristics and sufficient width to allow the physical placement and unobstructed maintenance of open ditches or belowground pipelines for the delivery of water for irrigation to persons and lands legally entitled to the water under an appropriated water right or permit of an irrigation district or other private or public entity formed to provide for the use of the water right on the subdivision lots;

(B) are a sufficient distance from the centerline of the ditch to allow for construction, repair, maintenance, and inspection of the ditch; and

(C) prohibit the placement of structures or the planting of vegetation other than grass within the ditch easement without the written permission of the ditch owner.

(ii) Establishment of easements pursuant to this subsection (1)(k) is not required if:

(A) the average lot size is 1 acre or less and the subdivider provides for disclosure, in a manner acceptable to the governing body, that adequately notifies potential buyers of lots that are classified as irrigated land and may continue to be assessed for irrigation water delivery even though the water may not be deliverable; or

(B) the water rights are removed or the process has been initiated to remove the water rights from the subdivided land through an appropriate legal or administrative process and if the removal or intended removal is denoted on the preliminary plat. If removal of water rights is not complete upon filing of the final plat, the subdivider shall provide written notification to prospective buyers of the intent to remove the water right and shall document that intent, when applicable, in agreements and legal documents for related sales transactions.

(l) require the subdivider, unless otherwise provided for under separate written agreement or filed easement, to file and record ditch easements for unobstructed use and maintenance of existing water delivery ditches, pipelines, and facilities in the subdivision that are necessary to convey water through the subdivision to lands adjacent to or beyond the subdivision boundaries in quantities and in a manner that are consistent with historic and legal rights;

(m) require the subdivider to describe, dimension, and show public utility easements in the subdivision on the final plat in their true and correct location. The public utility easements must be of sufficient width to allow the physical placement and unobstructed maintenance of public utility facilities for the provision of public utility services within the subdivision.

(n) establish whether the governing body, its authorized agent or agency, or both will hold public hearings;

(o) establish procedures describing how the governing body or its agent or agency will address information presented at the hearing or hearings held pursuant to 76-3-605 and 76-3-615;

(p) establish criteria that the governing body or reviewing authority will use to determine whether a proposed method of disposition using the exemptions provided in 76-3-201 or 76-3-207 is an attempt to evade the requirements of this chapter. The regulations must provide for an appeals process to the governing body if the reviewing authority is not the governing body.

(q) establish a preapplication process that:

(i) requires a subdivider to meet with the authorized agent or agency, other than the governing body, that is designated by the governing body to review subdivision applications prior to the subdivider submitting the application;

(ii) requires, for informational purposes only, identification of the state laws, local regulations, and growth policy provisions, if a growth policy has been adopted, that may apply to the subdivision review process;

(iii) requires a list to be made available to the subdivider of the public utilities, those agencies of local, state, and federal government, and any other entities that may be contacted for comment on the subdivision application and the timeframes that the public utilities, agencies, and other entities are given to respond. If, during the review of the application, the agent or agency designated by the governing body contacts a public utility, agency, or other entity that was not included on the list originally made available to the subdivider, the agent or agency shall notify the subdivider of the contact and the timeframe for response.

(iv) requires that a preapplication meeting take place no more than 30 days from the date that the authorized agent or agency receives a written request for a preapplication meeting from the subdivider; and

(v) establishes a time limit after a preapplication meeting by which an application must be submitted as provided in 76-3-604;

(r) requires that the written decision required by 76-3-620 must be provided to the applicant within 30 working days following a decision by the governing body to approve, conditionally approve, or deny a subdivision.

(2) In order to accomplish the purposes described in 76-3-501, the subdivision regulations adopted under 76-3-509 and this section may include provisions that are consistent with this section that promote cluster development.

(3) The governing body may establish deadlines for submittal of subdivision applications.

76-3-506. Provision for granting variances. (1) Subdivision regulations may authorize the governing body, after a public hearing on the variance request before the governing body or its designated agent or agency, to grant variances from the regulations when strict compliance will result in undue hardship and when it is not essential to the public welfare.

(2) Any variance granted pursuant to this section must be based on specific variance criteria contained in the subdivision regulations.

(3) A minor subdivision as provided for in 76-3-609(2) is not subject to the public hearing requirement of this section.

76-3-507. Provision for security requirements to ensure construction of public improvements. (1) Except as provided in subsections (2) and (4), the governing body shall require the subdivider to complete required improvements within the proposed subdivision prior to the approval of the final plat.

(2) (a) In lieu of the completion of the construction of any public improvements prior to the approval of a final plat, the governing body shall at the subdivider's option allow the subdivider to provide or cause to be provided a bond or other reasonable security, in an amount and with surety and conditions satisfactory to the governing body, providing for and securing the construction and installation of the improvements within a period specified by the governing body and expressed in the bonds or other security. The governing body shall reduce bond or security requirements commensurate with the completion of improvements.

(b) In lieu of requiring a bond or other means of security for the construction or installation of all the required public improvements under subsection (2)(a), the governing body may approve an incremental payment or guarantee plan. The improvements in a prior increment must be completed or the payment or guarantee of payment for the costs of the improvements incurred in a prior increment must be satisfied before development of future increments.

(3) Approval by the governing body of a final plat prior to the completion of required improvements and without the provision of the security required under subsection (2) is not an act of a legislative body for the purposes of 2-9-111.

(4) The governing body may require a percentage of improvements or specific types of improvements necessary to protect public health and safety to be completed before allowing bonding or other reasonable security under subsection (2)(a) for purposes of filing a final plat. The requirement is applicable to approved preliminary plats.

76-3-509. Local option cluster development regulations and exemptions authorized. (1) If the governing body has adopted a growth policy that meets the requirements of 76-1-601, the governing body may adopt regulations to promote cluster development and preserve open space under this section.

(2) Regulations adopted under this section must:

(a) establish a maximum size for each parcel in a cluster development;

(b) subject to subsection (3)(d), establish a maximum number of parcels in a cluster development; and

(c) establish requirements, including a minimum size for the area to be preserved, for preservation of open space as a condition of approval of a cluster development subdivision under regulations adopted pursuant to this section. Land protected as open space on a long-term basis must be identified on the final subdivision plat, and the plat must include a copy of or a recording reference to the irrevocable covenant prohibiting further subdivision, division, or development of the open space lots or parcels, as provided in Title 70, chapter 17, part 2.

(3) Regulations adopted under this section may:

(a) establish a shorter timeframe for review of proposed cluster developments;

(b) establish procedures and requirements that provide an incentive for cluster development subdivisions that are consistent with the provisions of this chapter;

(c) authorize the review of a division of land that involves more than one existing parcel as one subdivision proposal for the purposes of creating a cluster development;

(d) authorize the creation of one clustered parcel for each existing parcel that is reviewed as provided in subsection (3)(c); and

(e) establish exemptions from the following:

(i) the requirements of an environmental assessment pursuant to 76-3-603;

(ii) review of the criteria in 76-3-608(3)(a); and

(iii) park dedication requirements pursuant to 76-3-621.

(4) Except as provided in this section, the provisions of this chapter apply to cluster development subdivisions.

2011 Amendment: Chapter 137 in (2)(c) inserted last sentence concerning identification and recording reference for land protected as open space and deleted former last sentence that read: "The regulations must require that open space be preserved through an irrevocable conservation easement, granted in perpetuity, as provided for in Title 76, chapter 6, prohibiting further division of the parcel." Amendment effective July 1, 2011.

76-3-510. Payment for extension of capital facilities. (1) A local government may require a subdivider to pay or guarantee payment for part or all of the costs of extending capital facilities related to public health and safety, including but not limited to public roads, sewer lines, water supply lines, and storm drains to a subdivision. The costs must reasonably reflect the expected impacts directly attributable to the subdivision. A local government may not require a subdivider to pay or guarantee payment for part or all of the costs of constructing or extending capital facilities related to education.

(2) All fees, costs, or other money paid by a subdivider under this section must be expended on the capital facilities for which the payments were required.

History: En. Sec. 8, Ch. 468, L. 1995; amd. Sec. 1, Ch. 405, L. 2009; amd. Sec. 16, Ch. 446, L. 2009.

76-3-511. Local regulations no more stringent than state regulations or guidelines. (1) Except as provided in subsections (2) through (4) or unless required by state law, a governing body may not adopt a regulation under 76-3-501 or 76-3-504(1)(g)(iii) that is more stringent than the comparable state regulations or guidelines that address the same circumstances. The governing body may incorporate by reference comparable state regulations or guidelines.

(2) The governing body may adopt a regulation to implement 76-3-501 or 76-3-504(1)(g)(iii) that is more stringent than comparable state regulations or guidelines only if the governing body makes a written finding, after a public hearing and public comment and based on evidence in the record, that:

(a) the proposed local standard or requirement protects public health or the environment; and

(b) the local standard or requirement to be imposed can mitigate harm to the public health or environment and is achievable under current technology.

(3) The written finding must reference information and peer-reviewed scientific studies contained in the record that forms the basis for the governing body's conclusion. The written finding must also include information from the hearing record regarding the costs to the regulated community that are directly attributable to the proposed local standard or requirement.

(4) (a) A person affected by a regulation of the governing body adopted after January 1, 1990, and before April 14, 1995, that that person believes to be more stringent than comparable state regulations or guidelines may petition the governing body to review the regulation. If the governing body determines that the regulation is more stringent than comparable state regulations or guidelines, the governing body shall comply with this section by either revising the regulation to conform to the state regulations or guidelines or by making the written finding, as provided under subsection (2), within a reasonable period of time, not to exceed 12 months after receiving the petition. A petition under this section does not relieve the petitioner of the duty to comply with the challenged regulation. The governing body may charge a petition filing fee in an amount not to exceed $250.

(b) A person may also petition the governing body for a regulation review under subsection (4)(a) if the governing body adopts a regulation after January 1, 1990, in an area in which no state regulations or guidelines existed and the state government subsequently establishes comparable regulations or guidelines that are less stringent than the previously adopted governing body regulation.

Part 6
Local Review Procedure

76-3-601. Submission of application and preliminary plat for review — water and sanitation information required. (1) Subject to the submittal deadlines established as provided in 76-3-504(3), the subdivider shall present to the governing body or to the agent or agency designated by the governing body the subdivision application, including the preliminary plat of the proposed subdivision, for local review. The preliminary plat must show all pertinent features of the proposed subdivision and all proposed improvements and must be accompanied by the preliminary water and sanitation information required under 76-3-622.

(2) (a) When the proposed subdivision lies within the boundaries of an incorporated city or town, the application and preliminary plat must be submitted to and approved by the city or town governing body.

(b) When the proposed subdivision is situated entirely in an unincorporated area, the application and preliminary plat must be submitted to and approved by the governing body of the county. However, if the proposed subdivision lies within 1 mile of a third-class city or town, within 2 miles of a second-class city, or within 3 miles of a first-class city, the county governing body shall submit the application and preliminary plat to the city or town governing body or its designated agent for review and comment. If the proposed subdivision is situated within a rural school district, as described in 20-9-615, the county governing body shall provide a summary of the information contained in the application and preliminary plat to school district trustees.

(c) If the proposed subdivision lies partly within an incorporated city or town, the application and preliminary plat must be submitted to and approved by both the city or town and the county governing bodies.

(d) When a proposed subdivision is also proposed to be annexed to a municipality, the governing body of the municipality shall coordinate the subdivision review and annexation procedures to minimize duplication of hearings, reports, and other requirements whenever possible.

(3) The provisions of 76-3-604, 76-3-605, 76-3-608 through 76-3-610, and this section do not limit the authority of certain municipalities to regulate subdivisions beyond their corporate limits pursuant to 7-3-4444.

76-3-602. Fees. The governing body may establish reasonable fees to be paid by the subdivider to defray the expense of reviewing subdivision applications.

History: En. Sec. 10, Ch. 500, L. 1973; R.C.M. 1947, 11-3868; amd. Sec. 5, Ch. 298, L. 2005.

76-3-603. Contents of environmental assessment. When required, the environmental assessment must accompany the subdivision application and must include:

(1) for a major subdivision:

(a) a description of every body or stream of surface water that may be affected by the proposed subdivision, together with available ground water information, and a description of the topography, vegetation, and wildlife use within the area of the proposed subdivision;

(b) a summary of the probable impacts of the proposed subdivision based on the criteria described in 76-3-608; and

(c) a community impact report containing a statement of anticipated needs of the proposed subdivision for local services, including education and busing; roads and maintenance; water, sewage, and solid waste facilities; and fire and police protection; and

(d) additional relevant and reasonable information related to the applicable regulatory criteria adopted under 76-3-501 as may be required by the governing body;

(2) except as provided in 76-3-609, for a minor subdivision, a summary of the probable impacts of the proposed subdivision based on the criteria described in 76-3-608.

History: En. Sec. 5, Ch. 500, L. 1973; amd. Sec. 3, Ch. 334, L. 1974; amd. Sec. 20, Ch. 213, L. 1975; R.C.M. 1947, 11-3863(4); amd. Sec. 2, Ch. 236, L. 1981; amd. Sec. 5, Ch. 468, L. 1995; amd. Sec. 6, Ch. 298, L. 2005.

76-3-604. Review of subdivision application — review for required elements and sufficiency of information. (1) (a) Within 5 working days of receipt of a subdivision application submitted in accordance with any deadlines established pursuant to 76-3-504(3) and receipt of the review fee submitted as provided in 76-3-602, the reviewing agent or agency shall determine whether the application contains all of the listed materials as required by 76-3-504(1)(a) and shall notify the subdivider or, with the subdivider's written permission, the subdivider's agent of the reviewing agent's or agency's determination.

(b) If the reviewing agent or agency determines that elements are missing from the application, the reviewing agent or agency shall identify those elements in the notification.

(2) (a) Within 15 working days after the reviewing agent or agency notifies the subdivider or the subdivider's agent that the application contains all of the required elements as provided in subsection (1), the reviewing agent or agency shall determine whether the application and required elements contain detailed, supporting information that is sufficient to allow for the review of the proposed subdivision under the provisions of this chapter and the local regulations adopted pursuant to this chapter and shall notify the subdivider or, with the subdivider's written permission, the subdivider's agent of the reviewing agent's or agency's determination.

(b) If the reviewing agent or agency determines that information in the application is not sufficient to allow for review of the proposed subdivision, the reviewing agent or agency shall identify the insufficient information in its notification.

(c) A determination that an application contains sufficient information for review as provided in this subsection (2) does not ensure that the proposed subdivision will be approved or conditionally approved by the governing body and does not limit the ability of the reviewing agent or agency or the governing body to request additional information during the review process.

(3) The time limits provided in subsections (1) and (2) apply to each submittal of the application until:

(a) a determination is made that the application contains the required elements and sufficient information; and

(b) the subdivider or the subdivider's agent is notified.

(4) After the reviewing agent or agency has notified the subdivider or the subdivider's agent that an application contains sufficient information as provided in subsection (2), the governing body shall approve, conditionally approve, or deny the proposed subdivision within 60 working days or 80 working days if the proposed subdivision contains 50 or more lots, based on its determination of whether the application conforms to the provisions of this chapter and to the local regulations adopted pursuant to this chapter, unless:

(a) the subdivider and the reviewing agent or agency agree to an extension or suspension of the review period, not to exceed 1 year; or

(b) a subsequent public hearing is scheduled and held as provided in 76-3-615.

(5) (a) If the governing body fails to comply with the time limits under subsection (4), the governing body shall pay to the subdivider a financial penalty of $50 per lot per month or a pro rata portion of a month, not to exceed the total amount of the subdivision review fee collected by the governing body for the subdivision application, until the governing body denies, approves, or conditionally approves the subdivision.

(b) The provisions of subsection (5)(a) do not apply if the review period is extended or suspended pursuant to subsection (4).

(6) If the governing body denies or conditionally approves the proposed subdivision, it shall send the subdivider a letter, with the appropriate signature, that complies with the provisions of 76-3-620.

(7) (a) The governing body shall collect public comment submitted at a hearing or hearings regarding the information presented pursuant to 76-3-622 and shall make any comments submitted or a summary of the comments submitted available to the subdivider within 30 days after conditional approval or approval of the subdivision application and preliminary plat.

(b) The subdivider shall, as part of the subdivider's application for sanitation approval, forward the comments or the summary provided by the governing body to the:

(i) reviewing authority provided for in Title 76, chapter 4, for subdivisions that will create one or more parcels containing less than 20 acres; and

(ii) local health department or board of health for proposed subdivisions that will create one or more parcels containing 20 acres or more and less than 160 acres.

(8) (a) For a proposed subdivision that will create one or more parcels containing less than 20 acres, the governing body may require approval by the department of environmental quality as a condition of approval of the final plat.

(b) For a proposed subdivision that will create one or more parcels containing 20 acres or more, the governing body may condition approval of the final plat upon the subdivider demonstrating, pursuant to 76-3-622, that there is an adequate water source and at least one area for a septic system and a replacement drainfield for each lot.

(9) (a) Review and approval, conditional approval, or denial of a proposed subdivision under this chapter may occur only under those regulations in effect at the time a subdivision application is determined to contain sufficient information for review as provided in subsection (2).

(b) If regulations change during the review periods provided in subsections (1) and (2), the determination of whether the application contains the required elements and sufficient information must be based on the new regulations.

76-3-605. Hearing on subdivision application. (1) Except as provided in 76-3-609 and 76-3-616 and subject to the regulations adopted pursuant to 76-3-504(1)(o) and 76-3-615, at least one public hearing on the subdivision application must be held by the governing body, its authorized agent or agency, or both and the governing body, its authorized agent or agency, or both shall consider all relevant evidence relating to the public health, safety, and welfare, including the environmental assessment if required, to determine whether the subdivision application should be approved, conditionally approved, or denied by the governing body.

(2) When a proposed subdivision is also proposed to be annexed to a municipality, the governing body of the municipality shall hold joint hearings on the subdivision application and annexation whenever possible.

(3) Notice of the hearing must be given by publication in a newspaper of general circulation in the county not less than 15 days prior to the date of the hearing. The subdivider, each property owner of record whose property is immediately adjoining the land included in the preliminary plat, and each purchaser under contract for deed of property immediately adjoining the land included in the preliminary plat must also be notified of the hearing by registered or certified mail not less than 15 days prior to the date of the hearing.

(4) When a hearing is held by an agent or agency designated by the governing body, the agent or agency shall act in an advisory capacity and recommend to the governing body the approval, conditional approval, or denial of the proposed subdivision. This recommendation must be submitted to the governing body in writing not later than 10 working days after the public hearing.

76-3-608. Criteria for local government review. (1) The basis for the governing body's decision to approve, conditionally approve, or deny a proposed subdivision is whether the subdivision application, preliminary plat, applicable environmental assessment, public hearing, planning board recommendations, or additional information demonstrates that development of the proposed subdivision meets the requirements of this chapter. A governing body may not deny approval of a proposed subdivision based solely on the subdivision's impacts on educational services or based solely on parcels within the subdivision having been designated as wildland-urban interface parcels under 76-13-145.

(2) The governing body shall issue written findings of fact that weigh the criteria in subsection (3), as applicable.

(3) A subdivision proposal must undergo review for the following primary criteria:

(a) except when the governing body has established an exemption pursuant to subsection (6) of this section or except as provided in 76-3-509, 76-3-609(2) or (4), or 76-3-616, the impact on agriculture, agricultural water user facilities, local services, the natural environment, wildlife, wildlife habitat, and public health and safety;

(b) compliance with:

(i) the survey requirements provided for in part 4 of this chapter;

(ii) the local subdivision regulations provided for in part 5 of this chapter; and

(iii) the local subdivision review procedure provided for in this part;

(c) the provision of easements within and to the proposed subdivision for the location and installation of any planned utilities; and

(d) the provision of legal and physical access to each parcel within the proposed subdivision and the required notation of that access on the applicable plat and any instrument of transfer concerning the parcel.

(4) The governing body may require the subdivider to design the proposed subdivision to reasonably minimize potentially significant adverse impacts identified through the review required under subsection (3). The governing body shall issue written findings to justify the reasonable mitigation required under this subsection (4).

(5) (a) In reviewing a proposed subdivision under subsection (3) and when requiring mitigation under subsection (4), a governing body may not unreasonably restrict a landowner's ability to develop land, but it is recognized that in some instances the unmitigated impacts of a proposed development may be unacceptable and will preclude approval of the subdivision.

(b) When requiring mitigation under subsection (4), a governing body shall consult with the subdivider and shall give due weight and consideration to the expressed preference of the subdivider.

(6) A governing body may conditionally approve or deny a proposed subdivision as a result of the water and sanitation information provided pursuant to 76-3-622 or public comment received pursuant to 76-3-604 on the information provided pursuant to 76-3-622 only if the conditional approval or denial is based on existing subdivision, zoning, or other regulations that the governing body has the authority to enforce.

(7) A governing body may not require as a condition of subdivision approval that a property owner waive a right to protest the creation of a special improvement district or a rural improvement district for capital improvement projects that does not identify the specific capital improvements for which protest is being waived. A waiver of a right to protest may not be valid for a time period longer than 20 years after the date that the final subdivision plat is filed with the county clerk and recorder.

2011 Amendment: Chapter 409 in (1) at end inserted "or based solely on parcels within the subdivision having been designated as wildland-urban interface parcels under 76-13-145". Amendment effective October 1, 2011.

76-3-609. Review procedure for minor subdivisions — determination of sufficiency of application — governing body to adopt regulations. (1) Minor subdivisions must be reviewed as provided in this section and subject to the applicable local regulations adopted pursuant to 76-3-504.

(2) If the tract of record proposed to be subdivided has not been subdivided or created by a subdivision under this chapter or has not resulted from a tract of record that has had more than five parcels created from that tract of record under 76-3-201 or 76-3-207 since July 1, 1973, then the proposed subdivision is a first minor subdivision from a tract of record and, when legal and physical access to all lots is provided, must be reviewed as follows:

(a) Except as provided in subsection (2)(b), the governing body shall approve, conditionally approve, or deny the first minor subdivision from a tract of record within 35 working days of a determination by the reviewing agent or agency that the application contains required elements and sufficient information for review. The determination and notification to the subdivider must be made in the same manner as is provided in 76-3-604(1) through (3).

(b) The subdivider and the reviewing agent or agency may agree to an extension or suspension of the review period, not to exceed 1 year.

(c) Except as provided in subsection (2)(d)(ii), an application must include a summary of the probable impacts of the proposed subdivision based on the criteria described in 76-3-608(3).

(d) The following requirements do not apply to the first minor subdivision from a tract of record as provided in subsection (2):

(i) the requirement to prepare an environmental assessment; and

(ii) the requirement to review the subdivision for the criteria contained in 76-3-608(3)(a) if the minor subdivision is proposed in the portion of a jurisdictional area that has adopted zoning regulations that address the criteria in 76-3-608(3)(a).

(e) The governing body or its authorized agent or agency may not hold a public hearing or a subsequent public hearing under 76-3-615 for a first minor subdivision from a tract of record as described in subsection (2).

(f) The governing body may adopt regulations that establish requirements for the expedited review of the first minor subdivision from a tract of record. The following apply to a proposed subdivision reviewed under the regulations:

(i) except as provided in subsection (2)(d), the provisions of 76-3-608(3); and

(ii) the provisions of Title 76, chapter 4, part 1, whenever approval is required by those provisions.

(3) Except as provided in 76-3-616 and subsection (4) of this section, any minor subdivision that is not a first minor subdivision from a tract of record, as provided in subsection (2), is a subsequent minor subdivision and must be reviewed as provided in 76-3-601 through 76-3-605, 76-3-608, 76-3-610 through 76-3-614, and 76-3-620.

(4) The governing body may adopt subdivision regulations that establish requirements for review of subsequent minor subdivisions that meet or exceed the requirements that apply to the first minor subdivision, as provided in subsection (2) and this chapter.

(5) (a) Review and approval, conditional approval, or denial of a subdivision under this chapter may occur only under those regulations in effect at the time that a subdivision application is determined to contain sufficient information for review as provided in subsection (2).

(b) If regulations change during the period that the application is reviewed for required elements and sufficient information, the determination of whether the application contains the required elements and sufficient information must be based on the new regulations.

76-3-610. Effect of approval of application and preliminary plat. (1) Upon approving or conditionally approving an application and preliminary plat, the governing body shall provide the subdivider with a dated and signed statement of approval. This approval must be in force for not more than 3 calendar years or less than 1 calendar year. At the end of this period the governing body may, at the request of the subdivider, extend its approval for a mutually agreed-upon period of time. Any mutually agreed-upon extension must be in writing and dated and signed by the members of the governing body and the subdivider or subdivider's agent. The governing body may issue more than one extension.

(2) Except as provided in 76-3-507, after the application and preliminary plat are approved, the governing body and its subdivisions may not impose any additional conditions as a prerequisite to final plat approval if the approval is obtained within the original or extended approval period as provided in subsection (1).

2011 Amendment: Chapter 252 in (1) near end of third sentence substituted "a mutually agreed-upon period of time" for "no more than 1 calendar year, except that the governing body may extend its approval for a period of more than 1 year if that approval period is included as a specific condition of a written agreement between the governing body and the subdivider, according to 76-3-507" and inserted fourth and fifth sentences regarding written extensions. Amendment effective October 1, 2011.

Applicability: Section 2, Ch. 252, L. 2011, provided: "[This act] applies to subdivision applications and preliminary plats approved prior to [the effective date of this act] and to those approved on or after [the effective date of this act]." Effective October 1, 2011.

76-3-611. Review of final plat. (1) The governing body shall examine each final subdivision plat and shall approve the plat only if:

(a) it conforms to the conditions of approval set forth on the preliminary plat and to the terms of this chapter and regulations adopted pursuant to this chapter; and

(b) the county treasurer has certified that all real property taxes and special assessments assessed and levied on the land to be subdivided have been paid.

(2) (a) The governing body may require that final subdivision plats and certificates of survey be reviewed for errors and omissions in calculation or drafting by an examining land surveyor before recording with the county clerk and recorder. When the survey data shown on the plat or certificate of survey meets the conditions pursuant to this chapter, the examining land surveyor shall certify the compliance in a printed or stamped certificate on the plat or certificate of survey. The certificate must be signed by the surveyor.

(b) A land surveyor may not act as an examining land surveyor in regard to a plat or certificate of survey in which the surveyor has a financial or personal interest.

History: En. Sec. 9, Ch. 500, L. 1973; amd. Sec. 7, Ch. 334, L. 1974; amd. Sec. 1, Ch. 553, L. 1977; R.C.M. 1947, 11-3867(part); amd. Sec. 1, Ch. 273, L. 1981; amd. Sec. 1, Ch. 293, L. 1995.

76-3-612. Abstract of title required for review process. (1) The subdivider shall submit with the final plat a certificate of a title abstracter showing the names of the owners of record of the land to be subdivided and the names of lienholders or claimants of record against the land and the written consent to the subdivision by the owners of the land, if other than the subdivider, and any lienholders or claimants of record against the land.

(2) The governing body may provide for the review of the abstract or certificate of title of the land in question by the county attorney where the land lies in an unincorporated area or by the city or town attorney when the land lies within the limits of a city or town.

(2) This index shall list plats and certificates of survey by the quarter section, section, township, and range in which the platted or surveyed land lies and shall list the recording or filing numbers of all plats depicting lands lying within each quarter section. Each quarter section list shall be definitive to the exclusion of all other quarter sections. The index shall also list the names of all subdivision plats in alphabetical order and the place where filed.

History: En. Sec. 15, Ch. 500, L. 1973; R.C.M. 1947, 11-3873.

76-3-614. Correction of recorded plat. When a recorded plat does not definitely show the location or size of lots or blocks or the location or width of any street or alley, the governing body may at its own expense cause a new and correct survey and plat to be made and recorded in the office of the county clerk and recorder. The corrected plat must, to the extent possible, follow the plan of the original survey and plat. The surveyor making the resurvey shall endorse the corrected plat referring to the original plat and noting the defect existing therein and the corrections made.

76-3-615. Subsequent hearings — consideration of new information — requirements for regulations. (1) The regulations adopted pursuant to 76-3-504(1)(o) must comply with the provisions of this section.

(2) The governing body shall determine whether public comments or documents presented to the governing body at a hearing held pursuant to 76-3-605 constitute:

(a) information or analysis of information that was presented at a hearing held pursuant to 76-3-605 that the public has had a reasonable opportunity to examine and on which the public has had a reasonable opportunity to comment; or

(b) new information regarding a subdivision application that has never been submitted as evidence or considered by either the governing body or its agent or agency at a hearing during which the subdivision application was considered.

(3) If the governing body determines that the public comments or documents constitute the information described in subsection (2)(b), the governing body may:

(a) approve, conditionally approve, or deny the proposed subdivision without basing its decision on the new information if the governing body determines that the new information is either irrelevant or not credible; or

(b) schedule or direct its agent or agency to schedule a subsequent public hearing for consideration of only the new information that may have an impact on the findings and conclusions that the governing body will rely upon in making its decision on the proposed subdivision.

(4) If a public hearing is held as provided in subsection (3)(b), the 60-working-day review period required in 76-3-604(4) is suspended and the new hearing must be noticed and held within 45 days of the governing body's determination to schedule a new hearing. After the new hearing, the 60-working-day time limit resumes at the governing body's next scheduled public meeting for which proper notice for the public hearing on the subdivision application can be provided. The governing body may not consider any information regarding the subdivision application that is presented after the hearing when making its decision to approve, conditionally approve, or deny the proposed subdivision.

History: En. Sec. 9, Ch. 298, L. 2005.

76-3-616. Exemption for certain subdivisions. (1) A subdivision that meets the criteria in subsection (2) is exempt from the following requirements:

(b) a public hearing on the subdivision application pursuant to 76-3-605; and

(c) review of the subdivision for the criteria listed in 76-3-608(3)(a).

(2) To qualify for the exemptions in subsection (1), a subdivision must meet the following criteria:

(a) the proposed subdivision is entirely within an area inside or adjacent to an incorporated city or town where the governing body has adopted a growth policy that includes the provisions of 76-1-601(4)(c);

(b) the proposed subdivision is entirely within an area subject to zoning adopted pursuant to 76-2-203 or 76-2-304 that avoids, significantly reduces, or mitigates adverse impacts identified in a growth policy that includes the provisions of 76-1-601(4)(c); and

(c) the subdivision proposal includes a description of future public facilities and services, using maps and text, that are necessary to efficiently serve the projected development.

(1) includes information regarding the appeal process for the denial or imposition of conditions;

(2) identifies the regulations and statutes that are used in reaching the decision to deny or impose conditions and explains how they apply to the decision to deny or impose conditions;

(3) provides the facts and conclusions that the governing body relied upon in making its decision to deny or impose conditions and references documents, testimony, or other materials that form the basis of the decision; and

(4) provides the conditions that apply to the preliminary plat approval and that must be satisfied before the final plat may be approved.

76-3-621. Park dedication requirement. (1) Except as provided in 76-3-509 or subsections (2), (3), and (6) through (9) of this section, a subdivider shall dedicate to the governing body a cash or land donation equal to:

(b) 7.5% of the area of the land proposed to be subdivided into parcels larger than one-half acre and not larger than 1 acre;

(c) 5% of the area of the land proposed to be subdivided into parcels larger than 1 acre and not larger than 3 acres; and

(d) 2.5% of the area of the land proposed to be subdivided into parcels larger than 3 acres and not larger than 5 acres.

(2) When a subdivision is located totally within an area for which density requirements have been adopted pursuant to a growth policy under chapter 1 or pursuant to zoning regulations under chapter 2, the governing body may establish park dedication requirements based on the community need for parks and the development densities identified in the growth policy or regulations. Park dedication requirements established under this subsection are in lieu of those provided in subsection (1) and may not exceed 0.03 acres per dwelling unit.

(3) A park dedication may not be required for:

(a) land proposed for subdivision into parcels larger than 5 acres;

(b) subdivision into parcels that are all nonresidential;

(c) a subdivision in which parcels are not created, except when that subdivision provides permanent multiple spaces for recreational camping vehicles, mobile homes, or condominiums;

(d) a subdivision in which only one additional parcel is created; or

(e) except as provided in subsection (8), a first minor subdivision from a tract of record as described in 76-3-609(2).

(4) The governing body, in consultation with the subdivider and the planning board or park board that has jurisdiction, may determine suitable locations for parks and playgrounds and, giving due weight and consideration to the expressed preference of the subdivider, may determine whether the park dedication must be a land donation, cash donation, or a combination of both. When a combination of land donation and cash donation is required, the cash donation may not exceed the proportional amount not covered by the land donation.

(5) (a) In accordance with the provisions of subsections (5)(b) and (5)(c), the governing body shall use the dedicated money or land for development, acquisition, or maintenance of parks to serve the subdivision.

(b) The governing body may use the dedicated money to acquire, develop, or maintain, within its jurisdiction, parks or recreational areas or for the purchase of public open space or conservation easements only if:

(i) the park, recreational area, open space, or conservation easement is within a reasonably close proximity to the proposed subdivision; and

(ii) the governing body has formally adopted a park plan that establishes the needs and procedures for use of the money.

(c) The governing body may not use more than 50% of the dedicated money for park maintenance.

(6) The local governing body shall waive the park dedication requirement if:

(a) (i) the preliminary plat provides for a planned unit development or other development with land permanently set aside for park and recreational uses sufficient to meet the needs of the persons who will ultimately reside in the development; and

(ii) the area of the land and any improvements set aside for park and recreational purposes equals or exceeds the area of the dedication required under subsection (1);

(b) (i) the preliminary plat provides long-term protection of critical wildlife habitat; cultural, historical, or natural resources; agricultural interests; or aesthetic values; and

(ii) the area of the land proposed to be subdivided, by virtue of providing long-term protection provided for in subsection (6)(b)(i), is reduced by an amount equal to or exceeding the area of the dedication required under subsection (1);

(c) the area of the land proposed to be subdivided, by virtue of a combination of the provisions of subsections (6)(a) and (6)(b), is reduced by an amount equal to or exceeding the area of the dedication required under subsection (1); or

(d) (i) the subdivider provides for land outside of the subdivision to be set aside for park and recreational uses sufficient to meet the needs of the persons who will ultimately reside in the subdivision; and

(ii) the area of the land and any improvements set aside for park and recreational uses equals or exceeds the area of dedication required under subsection (1).

(7) The local governing body may waive the park dedication requirement if:

(a) the subdivider provides land outside the subdivision that affords long-term protection of critical wildlife habitat, cultural, historical, or natural resources, agricultural interests, or aesthetic values; and

(b) the area of the land to be subject to long-term protection, as provided in subsection (7)(a), equals or exceeds the area of the dedication required under subsection (1).

(8) (a) A local governing body may, at its discretion, require a park dedication for:

(i) a subsequent minor subdivision as described in 76-3-609(3); or

(ii) a first minor subdivision from a tract of record as described in 76-3-609(2) if:

(A) the subdivision plat indicates development of condominiums or other multifamily housing;

(B) zoning regulations permit condominiums or other multifamily housing; or

(C) any of the lots are located within the boundaries of a municipality.

(b) A local governing body that chooses to require a park dedication shall specify in regulations the circumstances under which a park dedication will be required.

(9) Subject to the approval of the local governing body and acceptance by the school district trustees, a subdivider may dedicate a land donation provided in subsection (1) to a school district, adequate to be used for school facilities or buildings.

(10) For the purposes of this section:

(a) "cash donation" is the fair market value of the unsubdivided, unimproved land; and

(b) "dwelling unit" means a residential structure in which a person or persons reside.

(11) A land donation under this section may be inside or outside of the subdivision.

The information must include:

(i) the location, within 100 feet outside of the exterior property line of the subdivision and on the proposed lots, of:

(A) flood plains;

(B) surface water features;

(C) springs;

(D) irrigation ditches;

(E) existing, previously approved, and, for parcels less than 20 acres, proposed water wells and wastewater treatment systems;

(F) for parcels less than 20 acres, mixing zones identified as provided in subsection (1)(g); and

(G) the representative drainfield site used for the soil profile description as required under subsection (1)(d); and

(ii) the location, within 500 feet outside of the exterior property line of the subdivision, of public water and sewer facilities;

(b) a description of the proposed subdivision's water supply systems, storm water systems, solid waste disposal systems, and wastewater treatment systems, including whether the water supply and wastewater treatment systems are individual, shared, multiple user, or public as those systems are defined in rules published by the department of environmental quality;

(c) a drawing of the conceptual lot layout at a scale no smaller than 1 inch equal to 200 feet that shows all information required for a lot layout document in rules adopted by the department of environmental quality pursuant to 76-4-104;

(d) evidence of suitability for new onsite wastewater treatment systems that, at a minimum, includes:

(i) a soil profile description from a representative drainfield site identified on the vicinity map, as provided in subsection (1)(a)(i)(G), that complies with standards published by the department of environmental quality;

(ii) demonstration that the soil profile contains a minimum of 4 feet of vertical separation distance between the bottom of the permeable surface of the proposed wastewater treatment system and a limiting layer; and

(iii) in cases in which the soil profile or other information indicates that ground water is within 7 feet of the natural ground surface, evidence that the ground water will not exceed the minimum vertical separation distance provided in subsection (1)(d)(ii);

(e) for new water supply systems, unless cisterns are proposed, evidence of adequate water availability:

(i) obtained from well logs or testing of onsite or nearby wells;

(ii) obtained from information contained in published hydrogeological reports; or

(iii) as otherwise specified by rules adopted by the department of environmental quality pursuant to 76-4-104;

(f) evidence of sufficient water quality in accordance with rules adopted by the department of environmental quality pursuant to 76-4-104;

The preliminary analysis may be based on currently available information and must consider the effects of overlapping mixing zones from proposed and existing wastewater treatment systems within and directly adjacent to the subdivision. Instead of performing the preliminary analysis required under this subsection (1)(g), the subdivider may perform a complete nondegradation analysis in the same manner as is required for an application that is reviewed under Title 76, chapter 4.

(2) A subdivider whose land division is excluded from review under 76-4-125(2) is not required to submit the information required in this section.

(3) A governing body may not, through adoption of regulations, require water and sanitation information in addition to the information required under this section unless the governing body complies with the procedures provided in 76-3-511.

76-4-104. Rules for administration and enforcement. (1) The department shall, subject to the provisions of 76-4-135, adopt reasonable rules, including adoption of sanitary standards, necessary for administration and enforcement of this part.

(2) The rules and standards must provide the basis for approving subdivisions for various types of public and private water supplies, sewage disposal facilities, storm water drainage ways, and solid waste disposal. The rules and standards must be related to:

(a) size of lots;

(b) contour of land;

(c) porosity of soil;

(d) ground water level;

(e) distance from lakes, streams, and wells;

(f) type and construction of private water and sewage facilities; and

(g) other factors affecting public health and the quality of water for uses relating to agriculture, industry, recreation, and wildlife.

(3) (a) Except as provided in subsection (3)(b), the rules must provide for the review of subdivisions by a local department or board of health, as described in Title 50, chapter 2, part 1, if the local department or board of health employs a registered sanitarian or a registered professional engineer and if the department certifies under subsection (4) that the local department or board is competent to conduct the review.

(b) (i) Except as provided in 75-6-121 and subsection (3)(b)(ii) of this section, a local department or board of health may not review public water supply systems, public sewage systems, or extensions of or connections to these systems.

(ii) A local department or board of health may be certified to review subdivisions proposed to connect to existing municipal water and wastewater systems previously approved by the department if no extension of the systems is required.

(4) The department shall also adopt standards and procedures for certification and maintaining certification to ensure that a local department or board of health is competent to review the subdivisions as described in subsection (3).

(5) The department shall review those subdivisions described in subsection (3) if:

(a) a proposed subdivision lies within more than one jurisdictional area and the respective governing bodies are in disagreement concerning approval of or conditions to be imposed on the proposed subdivision; or

(b) the local department or board of health elects not to be certified.

(6) The rules must further provide for:

(a) providing the reviewing authority with a copy of the plat or certificate of survey subject to review under this part and other documentation showing the layout or plan of development, including:

(i) total development area; and

(ii) total number of proposed dwelling units and structures requiring facilities for water supply or sewage disposal;

(b) adequate evidence that a water supply that is sufficient in terms of quality, quantity, and dependability will be available to ensure an adequate supply of water for the type of subdivision proposed;

(c) evidence concerning the potability of the proposed water supply for the subdivision;

(d) adequate evidence that a sewage disposal facility is sufficient in terms of capacity and dependability;

(e) standards and technical procedures applicable to storm drainage plans and related designs, in order to ensure proper drainage ways;

(f) standards and technical procedures applicable to sanitary sewer plans and designs, including soil testing and site design standards for on-lot sewage disposal systems when applicable;

(g) standards and technical procedures applicable to water systems;

(h) standards and technical procedures applicable to solid waste disposal;

(i) adequate evidence that a proposed drainfield mixing zone is located wholly within the boundaries of the proposed subdivision where the drainfield is located or that an easement or, for public land, other authorization has been obtained from the landowner to place the proposed drainfield mixing zone outside the boundaries of the proposed subdivision where the drainfield is located. A mixing zone may extend outside the boundaries of the proposed subdivision onto adjoining land that is dedicated for use as a right-of-way for roads, railroads, or utilities. This subsection (6)(i) does not apply to the divisions provided for in 76-3-207 except those under 76-3-207(1)(b).

(j) criteria for granting waivers and deviations from the standards and technical procedures adopted under subsections (6)(e) through (6)(i);

(k) evidence to establish that, if a public water supply system or a public sewage system is proposed, provision has been made for the system and, if other methods of water supply or sewage disposal are proposed, evidence that the systems will comply with state and local laws and regulations that are in effect at the time of submission of the preliminary or final plan or plat. Evidence that the systems will comply with local laws and regulations must be in the form of a certification from the local health department as provided by department rule.

(l) evidence to demonstrate that appropriate easements, covenants, agreements, and management entities have been established to ensure the protection of human health and state waters and to ensure the long-term operation and maintenance of water supply, storm water drainage, and sewage disposal facilities.

(7) If the reviewing authority is a local department or board of health, it shall notify the department of its recommendation for approval or disapproval of the subdivision not later than 50 days from its receipt of the subdivision application. The department shall make a final decision on the subdivision within 10 days after receiving the recommendation of the local reviewing authority, but not later than 60 days after the submission of a complete application, as provided in 76-4-125.

(8) Review and certification or denial of certification that a division of land is not subject to sanitary restrictions under this part may occur only under those rules in effect when a complete application is submitted to the reviewing authority, except that in cases in which current rules would preclude the use for which the lot was originally intended, the applicable requirements in effect at the time the lot was recorded must be applied. In the absence of specific requirements, minimum standards necessary to protect public health and water quality apply.

(9) The reviewing authority may not deny or condition a certificate of subdivision approval under this part unless it provides a written statement to the applicant detailing the circumstances of the denial or condition imposition. The statement must include:

(a) the reason for the denial or condition imposition;

(b) the evidence that justifies the denial or condition imposition; and

(c) information regarding the appeal process for the denial or condition imposition.

(10) The department may adopt rules that provide technical details and clarification regarding the water and sanitation information required to be submitted under 76-3-622.

76-4-125. Review of subdivision application — land divisions excluded from review. (1) Except as provided in subsection (2), an application for review of a subdivision must be submitted to the reviewing authority. The review by the reviewing authority must be as follows:

(a) At any time after the developer has submitted an application under the Montana Subdivision and Platting Act, the developer shall present a subdivision application to the reviewing authority. The application must include preliminary plans and specifications for the proposed development, whatever information the developer feels necessary for its subsequent review, any public comments or summaries of public comments collected as provided in 76-3-604(7), and information required by the reviewing authority. Subdivision fees assessed by the reviewing authority must accompany the application. If the proposed development includes onsite sewage disposal facilities, the developer shall notify the designated agent of the local board of health prior to presenting the subdivision application to the reviewing authority. The agent may conduct a preliminary site assessment to determine whether the site meets applicable state and local requirements.

(b) Within 5 working days after receipt of an application that is not subject to review by a local reviewing authority under 76-4-104, the department shall provide a written notice for informational purposes to the applicant if the application does not include a copy of the certification from the local health department required by 76-4-104(6)(j) or, if applicable, contain an approval from the local governing body under Title 76, chapter 3, together with any public comments or summaries of public comments collected as provided in 76-3-604(7)(a).

(c) If the reviewing authority denies an application and the applicant resubmits a corrected application within 30 days after the date of the denial letter, the reviewing authority shall complete review of the resubmitted application within 30 days after receipt of the resubmitted application. If the review of the resubmitted application is conducted by a local department or board of health that is certified under 76-4-104, the department shall make a final decision on the application within 10 days after the local reviewing authority completes its review.

(d) Except as provided in 75-1-205(4) and 75-1-208(4)(b), the department shall make a final decision on the proposed subdivision within 55 days after the submission of a complete application and payment of fees to the reviewing authority unless an environmental impact statement is required, at which time this deadline may be increased to 120 days. The reviewing authority may not request additional information for the purpose of extending the time allowed for a review and final decision on the proposed subdivision. If the department approves the subdivision, the department shall issue a certificate of subdivision approval indicating that it has approved the plans and specifications and that the subdivision is not subject to a sanitary restriction.

(2) A subdivision excluded from the provisions of chapter 3 must be submitted for review according to the provisions of this part, except that the following divisions or parcels, unless the exclusions are used to evade the provisions of this part, are not subject to review:

(a) the exclusions cited in 76-3-201 and 76-3-204;

(b) divisions made for the purpose of acquiring additional land to become part of an approved parcel, provided that water or sewage disposal facilities may not be constructed on the additional acquired parcel and that the division does not fall within a previously platted or approved subdivision;

(c) divisions made for purposes other than the construction of water supply or sewage and solid waste disposal facilities as the department specifies by rule;

(d) divisions located within jurisdictional areas that have adopted growth policies pursuant to chapter 1 or within first-class or second-class municipalities for which the governing body certifies, pursuant to 76-4-127, that adequate storm water drainage and adequate municipal facilities will be provided; and

(e) subject to the provisions of subsection (3), a remainder of an original tract created by segregating a parcel from the tract for purposes of transfer if:

(i) the remainder is served by a public or multiple-user sewage system approved before January 1, 1997, pursuant to local regulations or this chapter; or

(ii) the remainder is 1 acre or larger and has an individual sewage system serving a discharge source that was in existence prior to April 29, 1993, and, if required when installed, the system was approved pursuant to local regulations or this chapter.

(3) Consistent with the applicable provisions of 50-2-116, a local health officer may require that, prior to the filing of a plat or a certificate of survey subject to review under this part for the parcel to be segregated from the remainder referenced in subsection (2)(e)(ii), the remainder include acreage or features sufficient to accommodate a replacement drainfield.

Compiler's Comments

2011 Amendment: Chapter 217 inserted (1)(b) requiring department to provide written notice for informational purposes; inserted (1)(c) regarding review of resubmitted application; and made minor changes in style. Amendment effective April 18, 2011.

76-4-126. Right to hearing. (1) Upon a denial of approval of subdivision plans and specifications relating to environmental health facilities, the person who is aggrieved by the denial may request a hearing before the board. A hearing request must be filed, in writing, within 30 days after receipt of the notice of denial and must state the reason for the request. The contested case provisions of the Montana Administrative Procedure Act, Title 2, chapter 4, part 6, apply to a hearing held under this section.

(2) If the grounds for a denial of approval under this part include noncompliance with local laws or regulations other than those adopting, pursuant to 50-2-116, state minimum standards for the control and disposal of sewage, the board shall upon receipt of a hearing request refer the local compliance issues to the appropriate local authority. After opportunity for a hearing, the local authority shall issue a determination regarding the local compliance issues, and the board shall incorporate the determination of the local authority in the board's final decision.

76-4-135. State regulations no more stringent than federal regulations or guidelines. (1) After April 14, 1995, except as provided in subsections (2) through (5) or unless required by state law, the department may not adopt a rule to implement this chapter that is more stringent than the comparable federal regulations or guidelines that address the same circumstances. The department may incorporate by reference comparable federal regulations or guidelines.

(2) The department may adopt a rule to implement this chapter that is more stringent than comparable federal regulations or guidelines only if the department makes a written finding after a public hearing and public comment and based on evidence in the record that:

(a) the proposed state standard or requirement protects public health or the environment of the state; and

(b) the state standard or requirement to be imposed can mitigate harm to the public health or environment and is achievable under current technology.

(3) The written finding must reference information and peer-reviewed scientific studies contained in the record that forms the basis for the department's conclusion. The written finding must also include information from the hearing record regarding the costs to the regulated community that are directly attributable to the proposed state standard or requirement.

(4) (a) A person affected by a rule of the department adopted after January 1, 1990, and before April 14, 1995, that that person believes to be more stringent than comparable federal regulations or guidelines may petition the department to review the rule. If the department determines that the rule is more stringent than comparable federal regulations or guidelines, the department shall comply with this section by either revising the rule to conform to the federal regulations or guidelines or by making the written finding, as provided under subsection (2), within a reasonable period of time, not to exceed 12 months after receiving the petition. A petition under this section does not relieve the petitioner of the duty to comply with the challenged rule. The department may charge a petition filing fee in an amount not to exceed $250.

(b) A person may also petition the department for a rule review under subsection (4)(a) if the department adopts a rule after January 1, 1990, in an area in which no federal regulations or guidelines existed and the federal government subsequently establishes comparable regulations or guidelines that are less stringent than the previously adopted department rule.

(5) This section does not apply to a rule adopted under the emergency rulemaking provisions of 2-4-303(1).

Penalties, Fees, and Interest

76-4-1001. Penalty factors. (1) In determining the amount of an administrative or civil penalty to which subsection (4) applies, the department of environmental quality or the district court, as appropriate, shall take into account the following factors:

(a) the nature, extent, and gravity of the violation;

(b) the circumstances of the violation;

(c) the violator's prior history of any violation, which:

(i) must be a violation of a requirement under the authority of the same chapter and part as the violation for which the penalty is being assessed;

(ii) must be documented in an administrative order or a judicial order or judgment issued within 3 years prior to the date of the occurrence of the violation for which the penalty is being assessed; and

(iii) may not, at the time that the penalty is being assessed, be undergoing or subject to administrative appeal or judicial review;

(d) the economic benefit or savings resulting from the violator's action;

(e) the violator's good faith and cooperation;

(f) the amounts voluntarily expended by the violator, beyond what is required by law or order, to address or mitigate the violation or impacts of the violation; and

(g) other matters that justice may require.

(2) After the amount of a penalty is determined under subsection (1), the department of environmental quality or the district court, as appropriate, may consider the violator's financial ability to pay the penalty and may institute a payment schedule or suspend all or a portion of the penalty.

(3) The department of environmental quality may accept a supplemental environmental project as mitigation for a portion of the penalty. For purposes of this section, a "supplemental environmental project" is an environmentally beneficial project that a violator agrees to undertake in settlement of an enforcement action but which the violator is not otherwise legally required to perform.

(4) This section applies to penalties assessed by the department of environmental quality or the district court under Title 75, chapters 2, 5, 6, 11, and 20; Title 75, chapter 10, parts 2, 4, 5, and 12; and Title 76, chapter 4.

(5) The board of environmental review and the department of environmental quality may, for the statutes listed in subsection (4) for which each has rulemaking authority, adopt rules to implement this section.

(2) (a) The reasonable collection costs of a collection service, if approved by the department of environmental quality, or assistance costs charged the department of environmental quality by the department of revenue pursuant to 17-4-103(3) may be added to the debt for which collection is being sought.

(b) (i) All money collected by the department of revenue is subject to the provisions of 17-4-106.

(ii) All money collected by a collection service must be paid to the department of environmental quality and deposited in the general fund or the accounts specified in statute for the assessed penalties, fees, late fees, or interest, except that the collection service may retain those collection costs or, if the total debt is not collected, that portion of collection costs that are approved by the department.

Part 1
General Provisions

76-5-101. Findings. The people of the state of Montana find that:

(1) recurrent flooding of a portion of the state's land resources causes loss of life, damage to property, disruption of commerce and governmental services, and unsanitary conditions; all of which are detrimental to the health, safety, welfare, and property of the occupants of flooded lands and the people of this state; and

(2) the public interest necessitates management and regulation of flood-prone lands and waters in a manner consistent with sound land and water use management practices which will

prevent and alleviate flooding threats to life and health and reduce private and public economic losses.

History: En. Sec. 1, Ch. 393, L. 1971; R.C.M. 1947, 89-3501.

76-5-102. Policy and purposes. (1) The policy and purposes of parts 1 through 4 of this chapter are to:

(a) guide development of the floodway areas of this state consistent with the enumerated findings;

(b) recognize the right and need of watercourses to periodically carry more than the normal flow of water;

(c) provide state coordination and technical assistance to local units in management of floodway areas;

(d) coordinate federal, state, and local management activities for floodway areas;

(e) encourage local governmental units to manage flood-prone lands, including the adoption, enforcement, and administration of land use regulations; and

(f) provide the department of natural resources and conservation with authority necessary to carry out a comprehensive floodway management program for the state.

(2) Specifically, it is the purpose of parts 1 through 4 to:

(a) restrict or prohibit uses that are dangerous to health or safety of property in times of flood or that cause increased flood heights or velocities;

(b) require that uses vulnerable to floods, including public facilities that serve the uses, be provided with flood protection at the time of initial construction;

(c) develop and provide information to identify lands that are unsuited for certain development purposes because of flood hazard;

(d) distinguish between the land use regulations applied to the designated floodway and those applied to that portion of the designated flood plain not contained within the designated floodway;

(e) apply more restrictive land use regulations within the designated floodway;

(f) ensure that regulations and minimum standards adopted under parts 1 through 4, insofar as possible, balance the greatest public good with the least private injury.

History: En. Sec. 2, Ch. 393, L. 1971; amd. Sec. 194, Ch. 253, L. 1974; amd. Sec. 1, Ch. 271, L. 1974; R.C.M. 1947, 89-3502; amd. Sec. 241, Ch. 418, L. 1995.

76-5-103. Definitions. As used in parts 1 through 4 of this chapter, unless the context otherwise requires, the following definitions apply:

(1) "Artificial obstruction" means any obstruction that is not a natural obstruction and includes any dam, wall, riprap, embankment, levee, dike, pile, abutment, projection, revetment, excavation, channel rectification, bridge, conduit, culvert, building, refuse, automobile body, fill, or other analogous structure or matter in, along, across, or projecting into any flood plain or floodway that may impede, retard, or change the direction of the flow of water, either in itself or by catching or collecting debris carried by the water, or that is placed where the natural flow of the water would carry the same downstream to the damage or detriment of either life or property.

(2) "Channel" means the geographical area within either the natural or artificial banks of a watercourse or drainway.

(3) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(4) "Designated flood plain" means a flood plain whose limits have been designated pursuant to part 2 of this chapter.

(5) "Designated floodway" means a floodway whose limits have been designated pursuant to part 2 of this chapter.

(6) "Drainway" means any depression 2 feet or more below the surrounding land serving to give direction to a current of water less than 9 months of the year and having a bed and well-defined banks.

(7) "Establish" means construct, place, insert, or excavate.

(8) "Flood" means the water of any watercourse or drainway that is above the bank or outside the channel and banks of the watercourse or drainway.

(9) "Flood of 100-year frequency" means a flood magnitude expected to recur on the average of once every 100 years or a flood magnitude that has a 1% chance of occurring in any given year.

(10) "Flood plain" means the area adjoining the watercourse or drainway that would be covered by the floodwater of a flood of 100-year frequency, except for sheetflood areas that receive less than 1 foot of water per occurrence and are considered "zone B" or a "shaded X zone" by the federal emergency management agency.

(11) "Floodway" means the channel of a watercourse or drainway and those portions of the flood plain adjoining the channel that are reasonably required to carry and discharge the floodwater of any watercourse or drainway.

(12) "Natural obstruction" means any rock, tree, gravel, or analogous natural matter that is an obstruction and has been located within the flood plain or floodway by a nonhuman cause.

(13) "Owner" means any person who has dominion over, control of, or title to an obstruction.

(14) "Political subdivision" means any incorporated city or town or any county organized and having authority to adopt and enforce land use regulations.

(15) "Responsible political subdivision" means a political subdivision that has enacted land use regulations in accordance with parts 1 through 4.

(16) (a) "Watercourse" means any depression 2 feet or more below the surrounding land serving to give direction to a current of water at least 9 months of the year and having a bed and well-defined banks.

(b) Upon order of the department, the term also includes any particular depression that would not otherwise be within the definition of watercourse.

History: En. Sec. 3, Ch. 393, L. 1971; amd. Sec. 1, Ch. 294, L. 1973; amd. Sec. 195, Ch. 253, L. 1974; amd. Sec. 2, Ch. 271, L. 1974; R.C.M. 1947, 89-3503(part); amd. Sec. 1, Ch. 428, L. 1981; amd. Sec. 242, Ch. 418, L. 1995; amd. Sec. 1, Ch. 113, L. 2009; amd. Sec. 1, Ch. 124, L. 2009.

76-5-104. Presumption that depression is watercourse. In the event of doubt as to whether a depression is a watercourse or drainway, it shall be presumed to be a watercourse.

History: En. Sec. 3, Ch. 393, L. 1971; amd. Sec. 1, Ch. 294, L. 1973; amd. Sec. 195, Ch. 253, L. 1974; amd. Sec. 2, Ch. 271, L. 1974; R.C.M. 1947, 89-3503(part).

76-5-105. Authority to enter and investigate lands or waters. (1) The department or the responsible political subdivision may make reasonable entry upon any lands and waters in the state for the purpose of making an investigation, survey, removal, or repair contemplated by parts 1 through 4 of this chapter. Unless written consent is obtained, however, the department or the responsible political subdivision shall provide written notice of its entry by personal delivery to the owner, owner's agent, lessee, or lessee's agent whose lands will be entered. If none of these persons can be found, the department or the responsible political subdivision shall affix a copy of the notice to one or more conspicuous places on the property.

(2) An investigation of a natural or artificial obstruction or nonconforming use shall be made by the department or the responsible political subdivision either on its own initiative, on the written request of three titleholders of land abutting the watercourse or drainway involved, or on the written request of a political subdivision. Upon the request of an owner, owner's agent, lessee, or lessee's agent whose lands will be entered to undertake the investigation, the department or the responsible political subdivision shall release the names and addresses of the persons or political subdivision requesting the investigation.

76-5-106. Exemption for small drainage area. Parts 1 through 4 of this chapter do not extend to any obstruction in the flood plain or floodway of a watercourse or drainway where the drainage area above the watercourse or drainway, either within or outside the state, is less than 25 square miles in extent unless a particular watercourse or drainway is expressly declared to be within the coverage of parts 1 through 4 by order of the department.

76-5-108. Permit construed as added requirement. The granting of a permit under parts 1 through 4 of this chapter does not affect any other type of approval required by any other statute or ordinance of the state, of any political subdivision, or of the United States but is an added requirement.

History: En. Sec. 14, Ch. 393, L. 1971; amd. Sec. 204, Ch. 253, L. 1974; amd. Sec. 11, Ch. 271, L. 1974; amd. Sec. 4, Ch. 73, L. 1977; R.C.M. 1947, 89-3514(part).

76-5-109. Other legal remedies preserved — immunity. (1) The grant or denial of a permit does not have an effect on a remedy of a person at law or in equity.

(2) When it is shown that there is a wrongful failure to comply with parts 1 through 4 of this chapter, there is a rebuttable presumption that the obstruction was the proximate cause of the flooding of the land of a person bringing suit.

(3) The use of any one of the remedies or powers given to the department in parts 1 through 4 is not a bar to the exercise of any other remedy or power given by parts 1 through 4.

(4) An action for damages sustained because of injury caused by an obstruction for which a permit has been granted under parts 1 through 4 may not be brought against the state or the department.

76-5-110. Penalties for violation. Any person who violates 76-5-401 through 76-5-404 shall be guilty of a misdemeanor and shall upon conviction thereof be fined not more than $100 or be imprisoned in the county jail for not more than 10 days or be both so fined and imprisoned. Each day's continuance of a violation shall be deemed a separate and distinct offense.

Part 2
Role of State Agencies

76-5-201. Program for delineation of flood plains and floodways. (1) The department shall initiate a comprehensive program for the delineation of designated flood plains and designated floodways for each watercourse and drainway in the state. It shall make a study relating to the acquiring of flood data and may enter into arrangements with the United States geological survey, the United States army corps of engineers, or any other state or federal agency for the acquisition of data.

(2) Before the department establishes by order a designated flood plain or a designated floodway, the department shall consult with the affected political subdivisions. Consultation must include but is not limited to the following:

(a) specifically requesting that the political subdivisions submit pertinent data concerning flood hazards, including flooding experiences, plans to avoid potential hazards, estimates of economic impacts of flooding on the community, both historical and prospective, and other data that is considered appropriate;

(b) notifying local officials, including members of the county commission, city council, and planning board, of the progress of surveys, studies, and investigations and of proposed findings, along with information concerning data and methods employed in reaching conclusions; and

(c) encouraging local dissemination of information concerning surveys, studies, and investigations so that interested persons will have an opportunity to bring relevant data to the attention of the department.

(3) Nothing in this part precludes a political subdivision from designating by ordinance or resolution, without prior state designation, flood plains and floodways as designated by the United States federal emergency management agency and as necessary for compliance with the national flood insurance program if the department determines the designation is in compliance with parts 1 through 4 of this chapter.

History: En. Sec. 4, Ch. 393, L. 1971; amd. Sec. 2, Ch. 294, L. 1973; amd. Sec. 196, Ch. 253, L. 1974; amd. Sec. 3, Ch. 271, L. 1974; amd. Sec. 1, Ch. 262, L. 1977; R.C.M. 1947, 89-3504(1); amd. Sec. 245, Ch. 418, L. 1995; amd. Sec. 2, Ch. 113, L. 2009.

76-5-202. Designation of flood plains and floodways. (1) When sufficient data has been acquired by the department, the department shall establish, by order after a public hearing, the designated flood plain within which a political subdivision may establish land use regulation.

(2) When sufficient data has been acquired, the department shall establish, by order after a public hearing, the designated floodway within which a political subdivision may establish land use regulation.

(3) These designations must be based upon reasonable hydrological certainty. Designations made according to a flood hazard boundary map prepared by the federal emergency management agency have a rebuttable presumption of reasonable hydrological certainty.

(4) The department shall record all designated flood plains or designated floodways in the office of the county clerk and recorder of each county in which those flood plains or floodways are found.

History: En. Sec. 4, Ch. 393, L. 1971; amd. Sec. 2, Ch. 294, L. 1973; amd. Sec. 196, Ch. 253, L. 1974; amd. Sec. 3, Ch. 271, L. 1974; amd. Sec. 1, Ch. 262, L. 1977; R.C.M. 1947, 89-3504(part); amd. Sec. 1, Ch. 160, L. 1987; amd. Sec. 246, Ch. 418, L. 1995.

76-5-203. Alteration of flood plains or floodways. The department may alter the flood plains or floodways at any later time, by order after a public hearing, if a reevaluation of the then available flood data warrants it.

History: En. Sec. 4, Ch. 393, L. 1971; amd. Sec. 2, Ch. 294, L. 1973; amd. Sec. 196, Ch. 253, L. 1974; amd. Sec. 3, Ch. 271, L. 1974; amd. Sec. 1, Ch. 262, L. 1977; R.C.M. 1947, 89-3504(part); amd. Sec. 247, Ch. 418, L. 1995.

76-5-204. What constitutes notice. Notice of a hearing or order of the department establishing or altering the flood plains or floodways must be given by publishing the notice once each week for 3 consecutive weeks in a legal newspaper published or of general circulation in the area involved. The last publication of the notice may not be less than 10 days prior to the date set for the hearing or the effective date of the order.

History: En. Sec. 4, Ch. 393, L. 1971; amd. Sec. 2, Ch. 294, L. 1973; amd. Sec. 196, Ch. 253, L. 1974; amd. Sec. 3, Ch. 271, L. 1974; amd. Sec. 1, Ch. 262, L. 1977; R.C.M. 1947, 89-3504(part); amd. Sec. 248, Ch. 418, L. 1995.

76-5-205. Furnishing of material to local governments. (1) When the designated flood plain or the designated floodway has been established, the department shall furnish this data to officials of the political subdivision having jurisdiction over those areas, together with a map outlining the areas involved, a copy of parts 1 through 4 of this chapter, adopted rules of the department, and suggested minimum standards adopted by the department.

(2) These standards and rules must reflect gradations in flood hazard based on criteria as outlined in 76-5-406. In adopting these standards and rules, the department shall consider local input from the affected political subdivisions.

History: En. Sec. 4, Ch. 393, L. 1971; amd. Sec. 2, Ch. 294, L. 1973; amd. Sec. 196, Ch. 253, L. 1974; amd. Sec. 3, Ch. 271, L. 1974; amd. Sec. 1, Ch. 262, L. 1977; R.C.M. 1947, 89-3504(part); amd. Sec. 249, Ch. 418, L. 1995.

76-5-208. Orders and rules. (1) The department may adopt orders and rules to implement parts 1 through 4 of this chapter. All orders and rules must be on file at the offices of the department and in the office of the county clerk and recorder of each county affected by the order or rule.

(2) In addition to any requirement imposed by 76-5-202 through 76-5-205, the department shall provide notice by mail to the titleholder of land adjacent to a watercourse or drainway that would be specifically affected by a proposed order. The notice must be provided at least 10 days prior to a hearing, if one is required, or at least 10 days prior to the effective date of the order if a hearing is not required.

76-5-301. Land use regulations. (1) Upon transmittal of the flood plain information to officials of a political subdivision, the political subdivision has 6 months from the date of transmittal to adopt land use regulations that meet or exceed the minimum standards of the department. The regulations may include, for the purposes of flood plain management only, flood plain management regulations within sheetflood areas as determined by the federal emergency management agency.

(2) If within the 6-month period the political subdivision has failed to adopt the land use regulations, the department shall enforce the minimum standards within the designated flood plain or the designated floodway as established by the department under 76-5-202 through 76-5-205, and an artificial obstruction or nonconforming use may not be established by any person within the designated flood plain or the designated floodway unless specifically authorized by the department.

(3) A political subdivision that has failed to adopt land use regulations that meet or exceed the minimum standards of the department within the 6-month period may subsequently adopt regulations, and if approved by the department, the regulations are effective within the designated flood plain or floodway and must be administered and enforced by the political subdivision.

(4) When necessary for compliance with federal flood insurance requirements, the department may shorten the 6-month period upon notification to the political subdivision and publication of a notice of the revised period in a newspaper of general circulation in the affected area once a week for 3 consecutive weeks.

76-5-302. Substitution of local control for state permit system. (1) If a political subdivision enacts, in harmony with the purposes of parts 1 through 4 of this chapter, permit issuance ordinances, regulations, or resolutions and land use ordinances, regulations, or resolutions that meet or exceed the minimum standards of the department and if the administrative and enforcement procedures established for those ordinances, regulations, or resolutions are found acceptable by the department, a permit from the department is not required.

(2) However, if the department determines that there is a failure by a political subdivision to comply with the intent, purposes, and provisions of parts 1 through 4 and the minimum standards adopted under parts 1 through 4, the powers of the political subdivision may be suspended after hearing and the minimum standards adopted by the department must be enforced by the department until the department determines that the political subdivision will comply.

(1) An artificial obstruction or nonconforming use in a designated flood plain or designated floodway enforced under 76-5-301(1) and (2) and not exempt under 76-5-401 through 76-5-403 or subsection (2) or (3) of this section is a public nuisance unless a permit has been obtained for the artificial obstruction or nonconforming use from the department or the responsible political subdivision.

(2) It is unlawful for a person to establish an artificial obstruction or nonconforming use within a designated flood plain or a designated floodway without a permit from the department or the responsible political subdivision.

(3) (a) Parts 1 through 4 of this chapter do not affect any existing artificial obstruction or nonconforming use established in the designated flood plain or designated floodway before the land use regulations adopted by the political subdivision are effective or before the department has enforced a designated flood plain or a designated floodway under 76-5-301(1) and (2).

(b) However, a person may not make nor may an owner allow alterations of an artificial obstruction or nonconforming use within a designated flood plain or a designated floodway whether the obstruction proposed for alteration was located in the flood plain or floodway before or after July 1, 1971, except upon express written approval of the department or the responsible political subdivision. Maintenance of an obstruction is not an alteration.

76-5-405. Variance for obstruction or nonconforming use. (1) The department or the responsible political subdivision may issue permits for the establishment or alteration of artificial obstructions and nonconforming uses that would otherwise violate 76-5-401 through 76-5-404. The application for the permit must be submitted to the department or the responsible political subdivision and contain the information that the department requires, including complete maps, plans, profiles, and specifications of the obstruction or use and watercourse or drainway.

(2) Permits for obstructions or uses to be established in the designated flood plain or designated floodway of watercourses must be approved or denied within a reasonable time by the department or the responsible political subdivision. Permits for obstructions or uses in the designated flood plains or designated floodways are conclusively considered to have been granted 60 days after the receipt of the application by the department or the responsible political subdivision or after a time that the department or the responsible political subdivision specifies, unless the department or the responsible political subdivision notifies the applicant that the permit is denied. The responsible political subdivision shall send to the department a copy of each permit granted pursuant to 76-5-406 and this section.

(3) The department or the responsible political subdivision may issue the permit with reasonable conditions. The permitted obstruction or use must be maintained in compliance with the permit.

76-5-406. Criteria to be considered in connection with variance request. In passing upon the application, the department or the responsible political subdivision shall consider in accordance with the minimum standards established by the department:

(1) the danger to life and property by water that may be backed up or diverted by the obstruction or use;

(2) the danger that the obstruction or use will be swept downstream to the injury of others;

(3) the availability of alternate locations;

(4) the construction or alteration of the obstruction or use in such a manner as to lessen the danger;

Part 1
General Provisions

76-6-101. Short title. This chapter may be cited as the "Open-Space Land and Voluntary Conservation Easement Act".

History: En. Sec. 1, Ch. 337, L. 1969; amd. Sec. 1, Ch. 489, L. 1975; R.C.M. 1947, 62-601.

76-6-102. Intent, findings, and policy. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted the Open-Space Land and Voluntary Conservation Easement Act. It is the legislature's intent that the requirements of this chapter provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) The legislature finds that:

(a) the rapid growth and spread of urban development are creating critical problems of service and finance for the state and local governments;

(b) the present and future rapid population growth in urban areas is creating severe problems of urban and suburban living;

(c) this population spread and its attendant development are disrupting and altering the remaining natural areas, biotic communities, and geological and geographical formations and thereby providing the potential for the destruction of scientific, educational, aesthetic, and ecological values;

(d) the present and future rapid population spread throughout the state of Montana into its open spaces is creating serious problems of lack of open space and overcrowding of the land;

(e) to lessen congestion and to preserve natural, ecological, geographical, and geological elements, the provision and preservation of open-space lands are necessary to secure park, recreational, historic, and scenic areas and to conserve the land, its biotic communities, its natural resources, and its geological and geographical elements in their natural state;

(f) the acquisition or designation of interests and rights in real property by certain qualifying private organizations and by public bodies to provide or preserve open-space land is essential to the solution of these problems, the accomplishment of these purposes, and the health and welfare of the citizens of the state;

(g) the exercise of authority to acquire or designate interests and rights in real property to provide or preserve open-space land and the expenditure of public funds for these purposes would be for a public purpose; and

(h) the statutory provision enabling certain qualifying private organizations to acquire interests and rights in real property to provide or preserve open-space land is in the public interest.

History: En. Sec. 2, Ch. 337, L. 1969; amd. Sec. 2, Ch. 489, L. 1975; R.C.M. 1947, 62-602(part); amd. Sec. 25, Ch. 361, L. 2003.

76-6-103. Purposes. In accordance with the findings in 76-6-102, the legislature states that the purposes of this chapter are to:

(1) authorize and enable public bodies and certain qualifying private organizations voluntarily to provide for the preservation of native plants or animals, biotic communities, or geological or geographical formations of scientific, aesthetic, or educational interest;

(2) provide for the preservation of other significant open-space land anywhere in the state either in perpetuity or for a term of years; and

(3) encourage private participation in such a program by establishing the policy to be utilized in determining the property tax to be levied upon the real property which is subject to the provisions of this chapter.

History: En. Sec. 2, Ch. 337, L. 1969; amd. Sec. 2, Ch. 489, L. 1975; R.C.M. 1947, 62-602(part).

(c) coordination of all related plans and planned activities at both the intragovernmental and intergovernmental levels; and

(d) preparation of regulatory and administrative measures in support of the foregoing.

(1) acquire by purchase, gift, devise, bequest, or grant title to or any interests or rights in real property, including land and water, that will provide a means for the preservation or provision of significant open-space land or the preservation of native plants or animals, biotic communities, or geological or geographical formations of scientific, aesthetic, or educational interest, or both;

76-6-107. Conversion or diversion of open-space land. (1) Open-space land, the title to or interest or right in which has been acquired under this chapter, may not be converted or diverted from open-space land use unless the conversion or diversion is:

(a) necessary to the public interest;

(b) not in conflict with the program of comprehensive planning for the area; and

(c) permitted by the conditions imposed at the time of the creation of the conservation easement, in the terms of the acquisition agreement, or by the governing body resolution.

(2) Other real property of at least equal fair market value and of as nearly as feasible equivalent usefulness and location for use as open-space land must be substituted within a reasonable period not exceeding 3 years for any real property converted or diverted from open-space land use. Servitudes and easements, Title 70, ch. 17, part 1.

76-6-201. Conservation easements in general. (1) Where a public body acquires under this chapter an interest in land less than fee, this acquisition shall be by conservation easement.

(2) A conservation easement may be applied to urban or nonurban land.

History: En. Secs. 3, 4, Ch. 337, L. 1969; amd. Secs. 3, 4, Ch. 489, L. 1975; R.C.M. 1947, 62-603(part), 62-604(part).

76-6-202. Duration of conservation easements. Conservation easements may be granted either in perpetuity or for a term of years. If granted for a term of years, that term may not be less than 15 years. An easement granted for a term of years may be renewed for a term of 15 or more years upon the execution of a new granting instrument by the parties.

History: En. Sec. 3, Ch. 337, L. 1969; amd. Sec. 3, Ch. 489, L. 1975; R.C.M. 1947, 62-603(part).

76-6-204. Acquisition of conservation easements by qualified private organizations. Any qualified private organization may acquire by a conservation easement, by purchase, or by gift, devise, bequest, or grant title to any interest or interests in rights in real property, including land and water, that will provide a means for the preservation or provision of permanent significant open-space land and/or the preservation of native plants or animals, biotic communities, or geological or geographical formations of scientific, aesthetic, or educational interest.

History: En. 62-611 by Sec. 8, Ch. 489, L. 1975; R.C.M. 1947, 62-611.

76-6-205. Assignability of easements. For the purposes of this chapter, all conservation easements shall be assignable unless the instrument of conveyance or ownership expressly stipulates otherwise. No conservation easement shall be unenforceable on account of the benefit being assignable or being assigned to any other government body or private organization unless such assignment has violated the express terms of the instrument of conveyance or ownership. The assignees must be qualified under the terms of this chapter to hold a conservation easement.

History: En. 62-613 by Sec. 10, Ch. 489, L. 1975; R.C.M. 1947, 62-613.

76-6-206. Review by local planning authority. In order to minimize conflict with local comprehensive planning, all conservation easements shall be subject to review prior to recording by the appropriate local planning authority for the county within which the land lies. It shall be the responsibility of the entity acquiring the conservation easement to present the proposed conveyance of the conservation easement to the appropriate local planning authority. The local planning authority shall have 90 days from receipt of the proposed conveyance within which to review and to comment upon the relationship of the proposed conveyance to comprehensive planning for the area. Such comments will not be binding on the proposed grantor or grantee but shall be merely advisory in nature. The proposed conveyance may be recorded after comments have been received from the local planning authority or the local planning authority has indicated in writing it will have no comments or 90 days have elapsed, whichever occurs first.

76-6-207. Recording and description of easement. (1) All conservation easements must be recorded in the county where the land lies so as to effect the land's title in the manner of other conveyances of interest in land and must describe the land subject to the conservation easement by adequate legal description or by reference to a recorded plat showing its boundaries.

(2) (a) The county clerk and recorder shall, upon recording, place a copy of the conservation easement in a separate file within the office of the county clerk and recorder.

(b) The county clerk and recorder shall provide a copy of the conservation easement to the department of revenue office in that county within 30 days of the receipt of the original conservation easement.

76-6-208. Taxation of property subject to conservation easement. (1) Assessments made for taxation on property subject to a conservation easement either in perpetuity or for a term of years, where a public body or a qualifying private organization holds the conservation easement, shall be determined on the basis of the restricted purposes for which the property may be used. The minimum assessed value for land subject to an easement conveyed under this chapter may not be less than the actual assessed value of such land in calendar year 1973. Any land subject to such easement may not be classified into a class affording a lesser assessed valuation solely by reason of the creation of the easement. The value of the interest held by a public body or qualifying private organization shall be exempt from property taxation.

(2) Expiration of an easement granted for a term of years shall not result in a reassessment of the land for property tax purposes if the easement is renewed and the granting instrument reflecting the renewed easement is executed and properly filed not later than 15 days after the date of expiration.

Part 1
General Provisions

76-7-101. Short title. This chapter may be cited as the "Environmental Control Easement Act".

History: En. Sec. 1, Ch. 503, L. 1999.

76-7-102. Intent, findings, and purpose. (1) The legislature, mindful of its constitutional obligations under Article II, section 3, and Article IX of the Montana constitution, has enacted the Environmental Control Easement Act. It is the legislature's intent that the requirements of this chapter provide adequate remedies for the protection of the environmental life support system from degradation and provide adequate remedies to prevent unreasonable depletion and degradation of natural resources.

(2) The legislature finds that:

(a) numerous sites throughout the state contain or may contain hazardous wastes or substances that may threaten the public health, safety, or welfare or the environment if certain uses are permitted on these sites or if certain activities are not performed on these sites;

(b) at some sites, protection of the public health, safety, or welfare or the environment may be enhanced by the application and enforcement of certain restrictions on the future use of the site or requirements for performance of certain activities;

(c) the creation of an enforceable easement mechanism for imposing restrictions on the use of a site and requiring performance of operations and maintenance activities may help protect the public health, safety, and welfare and the environment by:

(i) preventing or minimizing the exposure of the public to hazardous wastes or substances;

(ii) preventing the disturbance of important features of remediation work and remedial technologies employed at the site;

(iii) ensuring that the presence of hazardous wastes or substances and the features of remediation work and remedial technologies are properly considered in the future use or development of a site; or

(iv) requiring the performance of certain activities or the prohibition or limitation of certain activities, with respect to the site; and

(d) the expenditure of public funds for the acquisition or designation of interests and rights in real property to protect the public health, safety, and welfare and the environment is in the public's interest.

(3) It is the purpose of this chapter to authorize and enable federal public entities, other public bodies, and certain qualifying private organizations to provide for:

(a) the monitoring and protection of environmental control sites to ensure that those sites are not used for purposes that may threaten the public health, safety, or welfare or the environment;

(b) a process of reviewing the need for specialized construction, development, use, and safety measures if the owner or user of an environmental control site proposes a new use for which any contamination might present a risk to the public health, safety, or welfare or the environment; and

(c) a mechanism for prohibiting or limiting certain activities or requiring certain activities on an environmental control site to enhance protection of the public health, safety, or welfare or the environment.

History: En. Sec. 2, Ch. 503, L. 1999; amd. Sec. 26, Ch. 361, L. 2003.

(1) "Department" means the department of environmental quality provided for in 2-15-3501.

(2) "Environmental control easement" or "easement" means an easement created under this chapter that burdens an environmental control site, that runs with the land, and that is binding on the owner and subsequent owners, lessees, and other users of the land. The easement may require the relinquishment of some or all rights to use the land or its surface or subsurface or the water in, upon, or under the land to the extent provided in the instrument granting the easement.

(3) "Environmental control site" or "site" means any site, including the surface and subsurface of the land and the surface and subsurface resources in, upon, or under the land, including, without limitation, minerals and water that may contain hazardous wastes or substances or that may require remediation, reclamation, or restoration pursuant to federal, state, or local law or regulation.

(4) "Federal public entity" means the United States of America, the United States environmental protection agency, or any other federal government agency or authority and its successors or assigns.

(6) "Hazardous wastes or substances" means those hazardous or toxic substances, wastes, materials, pollutants, or contaminants that are subject to regulation by federal, state, or local environmental protection laws or that are defined pursuant to 75-10-403, 75-10-602, and 75-10-702.

(7) "Public body" means the state, counties, cities, towns, and other municipalities.

(8) "Qualified private organization" means a private organization:

(a) competent to own interests in real property;

(b) that qualifies and holds a general tax exemption under the federal Internal Revenue Code, 26 U.S.C. 501(c); and

(c) whose organizational purposes are designed to further the purposes of this chapter.

History: En. Sec. 3, Ch. 503, L. 1999.

76-7-104. Acquisition of interests in environmental control sites. A public body may acquire by grant, title to, interests in, or rights in environmental control sites, including environmental control easements.

History: En. Sec. 4, Ch. 503, L. 1999.

76-7-105. Conversion or diversion of environmental control sites. An environmental control site in which an environmental control easement has been granted pursuant to this chapter may not be converted or diverted from purposes specified in the easement instrument or released from any restriction, limitation, or requirement specified in the easement instrument unless the conversion, diversion, or release is:

(1) protective of the public health, safety, and welfare and the environment as determined by the department or the United States environmental protection agency that initially approved the easement;

(2) permitted by the criteria for modification or termination imposed at the time of the creation of the easement; and

(3) approved in writing by the easement holder and any other person named in the easement instrument from whom approval is required.

History: **En. Sec. 5, Ch. 503, L. 1999.**

76-7-106. Conveyance or lease of environmental control sites. (1) A grantee of an environmental control easement acquired under this chapter may not convey or assign any of the easement rights that the grantee has acquired except to a federal public entity, a public body, or a qualified private organization authorized to hold environmental control easements under 76-7-204.

(2) A grantee of a conveyance pursuant to subsection (1) shall assume the responsibility for enforcing the environmental control easement as specified in the easement instrument and in 76-7-211.

History: **En. Sec. 6, Ch. 503, L. 1999.**

76-7-107. Public body powers. In connection with environmental control sites acquired or designated as environmental control easements for the purposes of this chapter, a public body may provide, arrange, or contract for the monitoring of the environmental control sites as necessary to ensure that the environmental control sites are being used only for the purposes permitted by the terms of the environmental control easement and are not being used in a manner that is prohibited or restricted by the terms of the environmental control easement.

History: **En. Sec. 7, Ch. 503, L. 1999.**

Part 2
Environmental Control Easements

76-7-201. Creation and approval of environmental control easements. (1) An environmental control easement may be created under this chapter only if the department or the United States environmental protection agency has approved the creation of an environmental control easement at an environmental control site to protect public health, safety, or welfare or the environment.

(2) An owner or an authorized representative of the owner of an environmental control site may apply for approval of a proposed environmental control easement to the department or the United States environmental protection agency.

(3) An owner or an authorized representative of the owner of an environmental control site that applies to the department for approval shall complete an environmental control easement application developed by the department.

(4) Upon receiving a completed application and following public notice, the department shall allow for a 30-day public comment period. Notice of the public comment period shall be published in a newspaper of general circulation in the area of the proposed environmental control easement.

(5) Following the 30-day public comment period, the department shall promptly review the application and either approve the application or provide the applicant with a written statement of the reasons for the department's disapproval.

(6) If the application is disapproved for reasons that may be addressed by modification of the easement instrument or by changes to the proposed transaction, the applicant, in consultation with the department, may modify the proposed environmental control easement or the proposed transaction in a manner necessary to obtain department approval and resubmit the application for the department's approval.

(7) The department's approval must be evidenced by execution of the instrument creating the environmental control easement, the execution of a written statement evidencing the

approval in recordable form, or any other method that reasonably substantiates the required approval.

History: **En. Sec. 8, Ch. 503, L. 1999.**

76-7-202. Duration of environmental control easements. An environmental control easement may be granted either in perpetuity or for a term of years. An environmental control easement may not be approved for a term of years unless it includes provisions that ensure that public health, safety, and welfare and the environment are protected beyond the expiration of the easement.

History: **En. Sec. 9, Ch. 503, L. 1999.**

76-7-203. Permissible easements. (1) An environmental control easement under this chapter may prohibit or limit the following activities or uses:

(a) constructing or placing of buildings, camping trailers, housetrailers, mobile homes, roads, or other structures on or above the ground;

(b) dumping or placing of soil, debris, or other wastes or substances as landfill or dumping or placing of trash, waste, or unsightly or offensive materials;

(c) removing or destroying trees, shrubs, or other vegetation or planting or allowing growth of specific types of vegetation, such as crops for human or animal consumption or undesirable vegetation;

(d) excavating, dredging, or removing of gravel, soil, rock, or other materials or substances;

(e) using the surface of the land in a particular manner, such as for agricultural, residential, commercial, or industrial uses;

(f) subdividing the land, as described in 76-3-103, 76-3-104, and 76-3-202;

(g) disturbing soil caps, soil surfaces, berms, drainage structures, or other structures or other activities that may cause erosion or migration of hazardous wastes or substances at or from the environmental control site;

(h) drilling or using water wells for potable or nonpotable purposes;

(i) other activities or uses detrimental to or interfering with the remediation or cleanup of the environmental control site or detrimental to the preservation of remedial structures, measures, or technologies employed at the environmental control site; and

(j) other activities or uses that may result in a risk or threat to the public health, safety, or welfare or the environment.

(2) An environmental control easement under this chapter may include or require the following:

(a) maintenance of environmental control site remedial structures or other remedial measures, such as soil surfaces, soil caps, berms, fences, or drainage improvements;

(b) rights in the holder of the easement or others for continuing access to the site as necessary to implement, operate, maintain, and monitor remedial work and technologies, including operation and maintenance, and to ensure implementation and enforcement of the requirements, restrictions, and limitations specified in the easement instrument;

(c) prompt notification to the holder of the easement or others of transfers of all or any portion of an environmental control site or interest in the site or of any proposed changes in land use at the site;

(d) compliance with all requirements of any applicable governmental order;

(e) arrangements for indemnification or for reimbursement of any costs and expenses of the easement holder or others or other methods of allocating costs and expenses for remedial actions, operations and maintenance, or other activities on the environmental control site or with respect to the site;

(f) other obligations that any federal public entity or other public body having jurisdiction over the property determines are necessary to implement, ensure noninterference with, or ensure the protection of remedial work performed under a governmental order; or

(g) other obligations that are necessary or advisable to reduce or eliminate risks or threats to the public health, safety, or welfare or the environment at environmental control sites.

History: **En. Sec. 10, Ch. 503, L. 1999.**

76-7-204. Environmental control easement conveyances. (1) The designated grantee of an environmental control easement granted under this chapter is one or more of the following entities:

(a) a federal public entity;

(b) the state of Montana, acting by and through the department or any other state agency;

(c) any other public body having jurisdiction over the environmental control site; or

(d) a qualified private organization.

(2) A grantee's acceptance of the easement interest and related obligations must be evidenced by the grantee's execution of the instrument creating the environmental control easement.

(3) Prior to or contemporaneously with the conveyance of an environmental control easement to a designated grantee, the environmental control site owner shall:

(a) obtain documents demonstrating that every person or entity holding an interest in the environmental control site or any part of the site, including without limitation each mortgagee, lienholder, lessee, and encumbrancer, irrevocably subordinates the entity's interest to the environmental control easement;

(b) record the documents required under subsection (3)(a) in the appropriate county; and

(c) submit those documents required under subsection (3)(a) to the designated grantee.

(4) An environmental control easement may not be separated from the land and survives foreclosure of a mortgage, lien, or other encumbrance, as well as tax lien sales and the issuance of a tax deed.

History: En. Sec. 11, Ch. 503, L. 1999; amd. Sec. 108, Ch. 2, L. 2009.

76-7-205. Qualified private organizations. If the grantee or holder of an environmental control easement is a qualified private organization, then the organization has the following additional obligations:

(1) The organization shall provide to the state or federal agency that approved the environmental control easement pursuant to 76-7-201 an annual report on or before April 30 of each year providing a description of actions taken to monitor the environmental control site, the status of compliance with the environmental control easement, and any other information that the state or federal agency may require relating to compliance with the provisions of the environmental control easement.

(2) Within 15 days following the discovery of any material violation of the environmental control easement, the organization shall provide to the state or federal agency that approved the environmental control easement pursuant to 76-7-201 a written report setting forth the nature of the violation, the remedies that the grantee intends to undertake to correct the violation, and any other information that the state or federal agency may request.

(3) The organization shall notify, in writing, the state or federal agency that approved the environmental control easement pursuant to 76-7-201 of the organization's dissolution, the cessation of operations, or the occurrence of any other event that renders the organization incapable of performing its obligations under the terms of the environmental control easement.

History: En. Sec. 12, Ch. 503, L. 1999.

76-7-206. Assignability of easements. For the purpose of this chapter, an environmental control easement is assignable unless the instrument of conveyance or ownership expressly provides otherwise. An assignee must be qualified under the terms of this chapter to hold an environmental control easement. If an assignment is made in violation of the provisions of this section or in violation of the express terms of the instrument creating the easement, the assignment is void and the environmental control easement interests and obligations remain with the assignor.

History: En. Sec. 13, Ch. 503, L. 1999.

76-7-207. Coordination with local planning authority. (1) In order to minimize conflict with local comprehensive planning, the entity acquiring the environmental control easement shall provide a copy of the easement to the appropriate local planning authority for the county within which the land lies prior to or concurrently with recording.

(2) The requirement in subsection (1) to provide a copy of the environmental control easement to the local planning authority is only for the purposes of informing the authority of the easement.

(3) The failure to provide the environmental control easement to the local planning authority, as required in subsection (1), does not invalidate the easement.

History: **En. Sec. 14, Ch. 503, L. 1999.**

76-7-208. Recording and description of easement. (1) An environmental control easement must be recorded in the county where the property is located so as to effect the title in the manner of other conveyances of interest in the property and must describe the property subject to that easement by an adequate legal description or by reference to a recorded plat showing the property's boundaries.

(2) The county clerk and recorder shall, upon recording, place a copy of the environmental control easement in a separate file within the office of the county clerk and recorder and shall mail a copy of the easement to the department.

History: **En. Sec. 15, Ch. 503, L. 1999.**

76-7-209. Taxation of property subject to easement. (1) The value of the interest held by a federal public entity, a public body, or a qualifying private organization is exempt from property taxation.

(2) Expiration of an environmental control easement granted for a term of years may not result in a reassessment of the land for property tax purposes if the easement is renewed and the granting instrument reflecting the renewed easement is executed and properly filed not later than 15 days after the date of expiration.

History: **En. Sec. 16, Ch. 503, L. 1999.**

76-7-210. Easements to run with land. Notwithstanding 70-17-202 and 70-17-203(1) and (2), for the purposes of this chapter, an environmental control easement runs with the land, whether or not this fact is stipulated in the instrument creating the easement, and the easement binds the owner of the land and all successors and assigns.

History: **En. Sec. 17, Ch. 503, L. 1999.**

76-7-211. Easement enforcement. (1) Environmental control easements may be enforced by injunction, specific performance, other proceedings in equity or at law, or any other means specified in the instrument creating the easement. In addition to any right specified in the easement instrument, representatives of the holder of the environmental control easement are entitled to enter the land in a reasonable manner and at reasonable times to ensure compliance with the terms and conditions of the easement and to implement, operate, maintain, and monitor all remedial work and technologies.

(2) An environmental control easement is not unenforceable because of a lack of privity of estate or contract or a lack of benefit to particular land, because the easement is not an appurtenant easement, or because the easement is an easement in gross.

(3) An environmental control easement is enforceable against the owner of the fee and any persons or entities holding or claiming an interest in the property regardless of whether the interest is equal to or less than the whole fee estate.

(4) A delay or failure to enforce in any specific instance any violation of an environmental control easement does not preclude or waive the right to enforce against that violation or any other breach.

(5) The easement holder may waive, in a writing executed by the easement holder, any single violation of the terms of the environmental control easement without waiving any other prior or subsequent violation whether of the same or different nature. The easement holder may remedy a violation without waiving the violation remedied and is entitled to recover from the environmental control site owner all costs, including but not limited to direct and indirect costs of remedying the violation and costs of any other remedies provided by law or in the easement instrument.

(6) A claim or cause of action arising out of or relating to a violation of a term or provision of an environmental control easement must be filed in a court of appropriate jurisdiction within 10 years from the date upon which the party alleging violation of the easement had actual knowledge of the violation.

History: **En. Sec. 18, Ch. 503, L. 1999.**

76-7-212. Who may enforce easement. (1) The owner of any real property designated as a benefited property in the instrument creating the environmental control easement or the occupant of the benefited real property may maintain an action for enforcement of the easement.

(2) A public body or a qualified private organization holding an environmental control easement shall enforce the provisions of the easement.

(3) A person or entity specifically named as a beneficiary in the instrument creating the environmental control easement may enforce the provisions of the easement to the extent provided in the instrument.

History: En. Sec. 19, Ch. 503, L. 1999.

76-7-213. Liability. (1) The creation and approval of an environmental control easement do not waive or release any statutory liability or other obligation of a person for hazardous wastes or substances at an environmental control site. A federal public entity or public body may enforce any applicable law or obligation without regard to any allocation of liability in an easement instrument and without regard to exhaustion of remedies against any party to an easement instrument.

(2) An owner of a site to which the environmental control easement applies and any lessee or licensee of the land are liable for any violation of the provisions of the easement and are liable for abating the violation and for all damages, costs, and attorney fees arising from or attributable to the violation.

(3) Notwithstanding any other provision of law, the holder or other named beneficiary of an environmental control easement or other person enforcing the easement is not liable for hazardous wastes or substances at the environmental control site or for the release of a hazardous or deleterious substance from a facility at the site based upon its ownership of the easement or based upon its maintenance, monitoring, enforcement, or other actions with respect to the easement.

76-9-103. Planning — effect on shooting ranges.
76-9-104. Zoning — effect on shooting ranges.
76-9-105. Closure of shooting ranges — limitations — relocation cost.

Part 1
Protection of Shooting Range Location and Investments

76-9-101. Policy. It is the policy of the state of Montana to provide for the health, safety, and welfare of the citizens of the state by promoting the safety and enjoyment of the shooting sports among the citizens of the state and by protecting the locations of and investment in shooting ranges for shotgun, archery, rifle, and pistol shooting.

History: En. Sec. 1, Ch. 415, L. 1991.

76-9-102. Prohibitions. (1) Standards adopted by a state agency or unit of local government to limit levels of noise that may occur in the outdoor atmosphere may not apply to shooting ranges.

(2) Standards adopted by a state agency or unit of local government promulgated pursuant to Title 75 and concerning pollution by lead, copper, or brass may not limit or prohibit the

operation of a shooting range because of lead, copper, or brass deposition resulting from shooting activities.

History: En. Sec. 2, Ch. 415, L. 1991.

76-9-103. Planning — effect on shooting ranges. The laws of this state concerning planning or growth policies, as defined in 76-1-103, may not be construed to authorize an ordinance, resolution, or rule that would:

(1) prevent the operation of an existing shooting range as a nonconforming use;

(2) prohibit the establishment of new shooting ranges, but the ordinance, resolution, or rule may regulate the construction of shooting ranges to specified zones; or

(3) prevent the erection or construction of safety improvements on existing shooting ranges.

History: En. Sec. 3, Ch. 415, L. 1991; amd. Sec. 65, Ch. 44, L. 2007.

76-9-104. Zoning — effect on shooting ranges. A planning district growth policy, recommendation, resolution, rule, or zoning designation may not:

(1) prevent the operation of an existing shooting range as a nonconforming use;

(2) prohibit the establishment of new shooting ranges, but it may regulate the construction of shooting ranges to specified zones; or

(3) prevent the erection or construction of safety improvements on existing shooting ranges.

History: En. Sec. 4, Ch. 415, L. 1991; amd. Sec. 33, Ch. 582, L. 1999.

76-9-105. Closure of shooting ranges — limitations — relocation cost. (1) Except as provided in subsection (2), an established shooting range may not be prevented from operation by a state agency, unit of local government, or court unless the range presents a clear and provable safety hazard to the adjacent population.

(2) If a pressing public need exists because of incompatibility with nearby population or land use, an established shooting range may be relocated by an agency of state government, unit of local government, or court, but only if all of the following conditions are met:

(a) pressing public need is documented through hearings, testimony, and a clear and precise statement of need by the agency, unit of local government, or court involved;

(b) the agency or unit of local government obtaining the closure pays the appraised cost of the land together with improvements to the operators of the shooting range. In return the shooting range operators shall relinquish their interest in the property to the agency or unit of local government obtaining the closure.

(3) If a shooting range presents a clear and provable safety hazard to adjacent population, the range may be suspended from operation if:

(a) reasonable notice and opportunity to respond are afforded the range operators; and

(b) reasonable opportunity is afforded the range operators to correct any safety defects.

History: En. Sec. 5, Ch. 415, L. 1991.

(b) require buyers to be accountable for wildcrafted plant material that they purchase by requiring recordkeeping; and

(c) establishing enforcement procedures.

(2) The state recognizes its limited jurisdiction within the Indian reservations in Montana and acknowledges and respects the government-to-government relationship between Montana and the tribes within its borders. It is the legislature's intent that this part be implemented within current jurisdictional limitations. The tribes are invited to enter into state-tribal cooperative agreements with Montana to provide for broader implementation.

History: En. Sec. 1, Ch. 358, L. 1979.

76-11-202. Purpose. (1) The legislature finds that the soils of the state of Montana are one of its most basic and precious natural resources and that detailed knowledge of soil capabilities and adaptability is essential for:

(a) making wise land use decisions;

(b) preparing plans for cities, towns, counties, planning boards, farmers, foresters, industrial developers, and residential developers;

(c) locating and designing buildings, highways, reservoirs, and recreation areas; and

(d) protecting our forest, range, and agricultural lands.

(2) Pursuant to these findings, it is the intention of the legislature to accelerate the survey and mapping of the state's soil resources, to set a goal of completing the soil survey and mapping program.

Part Cross-References

State forest lands — deferral of management prohibited, 77-5-116.

76-12-101. Short title. This part shall be known and may be cited as the "Montana Natural Areas Act of 1974".

History: En. 81-2701 by Sec. 1, Ch. 254, L. 1974; R.C.M. 1947, 81-2701.

76-12-102. Legislative findings. The legislature finds that:

(1) in the expanses of Montana there are natural areas possessing significant scenic, educational, scientific, biological, and/or geological values or areas possessing these characteristics to a degree promising their restoration to a natural state;

(2) since the development of these areas is an irreversible commitment of a finite and diminishing resource of fundamental importance, selected areas should be preserved for the benefit of this and future generations;

(3) currently there are no regulations promulgated by the state or local governments to insure adequate protection for natural areas;

(4) it is necessary to establish a process for developing a system of natural areas and to encourage public and private participation in the establishment of a natural areas system for the benefit of the citizens of the state; and

(5) designations of natural areas should first consider protected natural features in publicly owned and privately dedicated lands, such as nature preserves, natural areas, parks, and wilderness areas, and should avoid duplication of these features.

History: En. 81-2702 by Sec. 2, Ch. 254, L. 1974; R.C.M. 1947, 81-2702(part); amd. Sec. 1, Ch. 460, L. 1987.

76-12-103. Statement of policy. (1) It is the intention of the legislature to establish a system for the protection of natural or potentially natural areas in order to preserve their natural ecosystem integrity in perpetuity.

(2) In this connection, the legislature recognizes the fact that the school trust lands are held in trust for the support of education and for the attainment of other worthy objects helpful to the well-being of the people of the state; that it is the duty of the board of land commissioners to administer this trust so as to secure the largest measure of legitimate and reasonable advantage to the state; and hereby declares the preservation of natural areas, whether trust or other lands, for the enjoyment and inspiration of future generations to be an object worthy of legislative

action helpful to the well-being of the people of the state and also declares that the preservation of natural areas on state trust land has sufficient value to present and future education to meet the state's obligation for the disposition and utilization of trust lands as specified in The Enabling Act.

History: En. 81-2702 by Sec. 2, Ch. 254, L. 1974; R.C.M. 1947, 81-2702(part).

(2) "Department" means the department of natural resources and conservation.

(3) "Natural area" means an area of land that must generally appear to have been affected primarily by the forces of nature with the visual aspects of human intrusion not dominant and also must have one or more of the following characteristics:

(a) an outstanding mixture or variety of vegetation, wildlife, water resource, landscape, and scenic values;

(b) an important or rare ecological or geological feature or other rare or significant natural feature worthy of preservation for scientific, educational, or ecological purposes.

(4) "Natural areas system" means the composite of lands in the state that exhibit the characteristics of natural areas and that have been designated by the board or dedicated or otherwise protected and managed as natural areas.

(5) "Register" means the Montana register of natural areas established under 76-12-121.

(1) designation by the board on lands controlled by the board;

(2) designation by the legislature on lands owned by the state of Montana;

(3) acquisition by the board by purchase with consent of the property owner of sufficient interests in private property to protect the natural area; provided, however, that transfer of surface property or development rights shall not alter the rights attending the subsurface estate if owned by another party;

(6) registration of land by the department, following appropriate documentation and owner consent, that has been designated, dedicated, or otherwise protected as a natural area by the owner, including a private landowner, public interest group, or other land management agency.

(b) If a community wildfire protection plan has not been adopted, the department shall:

(i) provide notice to the county governing body that the department intends to designate the wildland-urban interface within the county's jurisdictional boundary;

(4) The department shall report its progress in designating wildland-urban interface parcels to an appropriate interim legislative committee assigned to study wildland fire suppression or to the environmental quality council.

(5) The department shall review each county's wildland-urban interface designation every 5 years, make changes as necessary, and maintain accurate maps and other identifying information.

(1) The department shall, pursuant to 76-13-207, set the annual fire assessment fee due from landowners pursuant to Title 76, chapter 13, parts 1 and 2. The total of all statewide landowner assessments may be no greater than one-third of the amount appropriated by the legislature to fund the protection costs.

(2) The individual assessments must be established using the following criteria:

(a) Each person or corporation who is responsible for fire protection pursuant to 76-13-108 and 76-13-201 and for whom the department provides fire protection must be assessed a per capita landowner fee. The total per capita landowner assessments statewide from persons or corporations who own 20 acres or less of land for which the department provides protection must be as close as administratively possible to 60% of the total private landowner assessments.

(b) A person or corporation who owns more than 20 acres of land for which the department provides protection shall, in addition to the fee assessed pursuant to subsection (2)(a), pay a per-acre fee for each whole acre that the person owns in excess of 20 acres. (c) A person who owns a share of property and has full ownership of a unit on the property must be assessed an amount not less than one-half of the amount established to be assessed for the property under subsection (2)(a).

(3) (a) Except as provided in subsection (3)(b), the per capita and per-acre fees must remain in effect for subsequent years.

(b) The department shall reset the per capita and per-acre fees whenever it is necessary to obtain up to one-third of the amount appropriated by the legislature.

History: En. Sec. 3, Ch. 25, L. 1953; Sec. 28-131, R.C.M. 1947; amd. and redes. 28-205 by Sec. 22, Ch. 253, L. 1974; R.C.M. 1947, 28-205; amd. Sec. 1, Ch. 529, L. 1981; amd. Sec. 1, Ch. 285, L. 1993; amd. Sec. 264, Ch. 418, L. 1995.

76-13-303. Creation of zone of infestation. Whenever the department determines that there exists an infestation of forest insect pests or forest tree diseases injurious to the timber or forest growth on forest lands within the state and that the infestation is of such a character as to be a menace to the timber or forest growth of this state, the department shall, with the approval of the board of land commissioners, declare the existence of a zone of infestation and fix the boundaries so as to definitely describe and identify the zone.

History: En. Sec. 5, Ch. 25, L. 1953; Sec. 28-133, R.C.M. 1947; amd. and redes. 28-206 by Sec. 23, Ch. 253, L. 1974; R.C.M. 1947, 28-206(1); amd. Sec. 2, Ch. 529, L. 1981.

76-13-304. Suppression and eradication of infestation. (1) The department may enter upon the land within the zone and cause the forest insect pest infestation or forest tree disease to be suppressed, eradicated, and destroyed in the manner approved by it.

(2) In order to accomplish the suppression, eradication, and destruction of the infestation, the department may enter into cooperative agreements with the federal government or other public or private agencies and with forest landowners, using such funds as are made available for those purposes.

(3) The department may consider controlled burning or logging as methods to suppress or eradicate forest insect pest infestation or forest tree disease.

History: En. Sec. 5, Ch. 25, L. 1953; Sec. 28-133, R.C.M. 1947; amd. and redes. 28-206 by Sec. 23, Ch. 253, L. 1974; R.C.M. 1947, 28-206(2); amd. Sec. 1, Ch. 115, L. 2007.

76-13-407. Reduction of slash and debris along right-of-way. (1) A person clearing right-of-way for any railroad, public highway, public trail, private road, trail, ditch, dike, pipeline or wire lines, or any other transmission or transportation utility right-of-way, except temporary roads located within the boundaries of the cutting area and which are used in the actual logging operations, shall reduce the hazard resulting from the clearing or from the cutting of material for the construction of the public or private utility unless exempted by the department. At least 10 days before commencement of the clearing, the person conducting the clearing shall notify the department of commencement of the clearing in the form and manner the department provides.

(2) Hazard reduction, excluding burning where this method is used, shall be done as rapidly as cutting or clearing progresses.

(3) This section applies to all clearing of rights-of-way across private land and on behalf of the state, county, highway districts, and road districts, whether the work is done by day labor or by contract, and unless unavoidable emergency prevents, provision shall be made by the proper officials conducting, directing, or letting the work for withholding until it is complete a sufficient portion of the payment to assure compliance with this part.

76-13-408. Fire hazard reduction agreement and bond — bond release and penalty — exemption. (1) Before cutting any forest product, constructing or reconstructing any road in contemplation of cutting any forest product, or conducting timber stand improvement, such as but not limited to precommercial thinning, weeding, or pruning, upon private forest lands within the state, the person conducting the work must be issued an exemption certificate by the department or shall provide for the reduction or management of the fire hazard to be created, except where a minimum slash hazard would exist, by entering into a fire hazard reduction agreement or a master fire hazard reduction agreement with the department, providing for the full and faithful compliance with all requirements under this part and the faithful reduction or management of the fire hazard in the manner prescribed by law and by rules adopted under this part.

(2) Either the person conducting the work or the purchaser, as provided in 76-13-409(2), shall post a bond to the state in a form and for an amount prescribed by the department, but the amount may not exceed $6 for each 1,000 board feet (log scale) or the equivalent if forest products other than logs are cut. Bond amounts for master fire hazard reduction agreements are calculated to cover the potential cost to the department for fire hazard abatement in case of default and are based on the average annual volume of uncompleted abatement. Master fire hazard reduction agreement bonds are to be administered as nonsite-specific umbrella bonds, for which the entire bond or any portion of the bond may be collected to pay for unabated fire hazards on all sites covered by the bond. The department shall review master fire hazard reduction agreement bond amounts at least annually. The bonds must be adjusted according to the volume of timber harvested and the level of compliance of the bond provider.

(3) The agreement must provide that:

(a) all fire hazard reduction or management work comprising nonburning methods and preparations for burning must be completed within 18 months of commencement of cutting in the area covered by the agreement; and

(b) all burning work must be completed as specified in the agreement and in compliance with rules adopted under this part.

(4) The bond must be released upon the issuance of the certificate of clearance. At the request of the fire hazard reduction agreement holder, cash bonds for fire hazard reduction agreements exceeding 200,000 board feet, or the equivalent, must be partially released upon satisfactory completion of slash piling if the fire hazard reduction agreement holder has a record of compliance with the provisions of 76-13-407 or this section. The department may inspect the sites for which release or partial release is being requested, or it may rely on the submittal of a signed affidavit provided by the person posting the bond. A person that submits a fraudulent affidavit is subject to the penalty provisions of 45-7-202, may have other fire hazard reduction agreements revoked, or may be denied the issuance of fire hazard reduction agreements in the future.

(5) If a minimum slash hazard will be created, the activity is exempt from the provisions of this part.

History: En. Sec. 1, Ch. 207, L. 1959; amd. Sec. 27, Ch. 253, L. 1974; amd. Sec. 2, Ch. 522, L. 1975; R.C.M. 1947, 28-404; amd. Sec. 5, Ch. 423, L. 1989; amd. Sec. 7, Ch. 513, L. 1989; amd. 76-13-409. Duty of purchaser to ensure compliance — statement — bond. (1) The initial purchaser of forest products that have been cut or are about to be cut from any private forest lands within the state shall, before making the purchase or contract to purchase, determine that the person engaged or about to engage in the cutting of these forest products has provided for the reduction or management of the fire hazard by entering into a fire hazard reduction agreement or that the person has been issued an exemption certificate as provided in 76-13-408.

(2) The purchaser shall withhold sufficient money to meet the requirements of the bond provided for in 76-13-408 plus the fees for administration, inspection, and enforcement by the department as provided in the fire hazard reduction agreement. The purchaser shall transmit all money and fees that are withheld and a report of volumes of products purchased to the department on or before the 15th day of the following month, clearly identifying by number the fire hazard reduction agreement to which the withheld money, fees, and product volumes pertain. The purchaser shall keep accurate records of the purchase and the amounts withheld, which may be inspected by the department at any reasonable time.

(3) If forest products are not received or purchased in a given month, a report showing a zero balance and stating that products were not purchased must be submitted to the department.

(4) The department may require the purchaser to post a bond to the state in a form and for an amount as may be prescribed by the department to ensure faithful compliance with this part.

History: En. Sec. 3, Ch. 207, L. 1959; amd. Sec. 29, Ch. 253, L. 1974; amd. Sec. 4, Ch. 522, L. 1975; R.C.M. 1947, 28-406; amd. Sec. 3, Ch. 670, L. 1979; amd. Sec. 8, Ch. 513, L. 1989; amd. Sec. 4, Ch. 279, L. 1999.

76-13-410. *(Temporary)* **Failure to comply.** (1) If a person fails, refuses, or neglects to properly reduce or manage the fire hazard in accordance with the requirements of 76-13-407 and 76-13-408, the person may be enjoined from further cutting, clearing, and construction operations until the department has found the person to be in compliance with 76-13-407 and 76-13-408. The department may initiate the proceedings and may obtain a temporary restraining order, injunction, or writ of mandate. The proceedings must be conducted in the district court of the county where the land is located.

(2) If a person claims to have a minimum slash hazard but the department's inspection determines otherwise, the hazard reduction requirements of this part apply.

(3) If a person fails to comply with 76-13-407 or 76-13-408 and fails to comply within 30 days after being notified to do so by the department, the department may complete, direct, or authorize the fire hazard reduction or management at the expense of the contractor or of the owner of the timber or other forest products cut or produced from the land upon which the unabated fire hazard remains.

(4) (a) The cost and expense of the fire hazard reduction or management work, plus 20% of the cost and expense of the work as a penalty, constitute a lien upon the forest products cut or produced from the land and upon the real and personal property of the contractor. If payment of the sum demanded is not made to the department within 15 days of its written demand, the performance bond required by 76-13-408 and 76-13-409, upon notice to the contractor, must be automatically forfeited to the extent needed to cover the cost and expenses of reducing or

managing the fire hazard, plus a penalty of 20% of the cost and expenses. If the bond is insufficient to cover the cost, expenses, and penalty, the department may bring legal action on behalf of the state to recover the cost, expenses, and penalty.

(b) Revenue from forfeited performance bonds required by 76-13-408 and 76-13-409 must be deposited into the fire hazard reduction fund established in 76-13-416.

(5) In addition to other remedies provided in this part, the department may, after notice, require a person to show cause why the department should not withhold the issuance of any further fire hazard reduction agreement or exemption certificate to a person that:

(a) harvests timber without a valid fire hazard reduction agreement; or

(b) has forfeited the performance bond on a fire hazard reduction agreement within the 2 preceding years and fails, refuses, or neglects to properly reduce or manage the fire hazard in accordance with 76-13-407 or 76-13-408 within 30 days after being notified by the department.

(6) If the person fails to show sufficient cause as required by subsection (5), the department may withhold the issuance of any further fire hazard reduction agreement or exemption certificate for a period not to exceed 3 years.

76-13-410. *(Effective July 1, 2019)* **Failure to comply.** (1) If a person fails, refuses, or neglects to properly reduce or manage the fire hazard in accordance with the requirements of 76-13-407 and 76-13-408, the person may be enjoined from further cutting, clearing, and construction operations until the department has found the person to be in compliance with 76-13-407 and 76-13-408. The department may initiate the proceedings and may obtain a temporary restraining order, injunction, or writ of mandate. The proceedings must be conducted in the district court of the county where the land is located.

(2) If a person claims to have a minimum slash hazard but the department's inspection determines otherwise, the hazard reduction requirements of this part apply.

(3) If a person fails to comply with 76-13-407 or 76-13-408 and fails to comply within 30 days after being notified to do so by the department, the department may complete, direct, or authorize the fire hazard reduction or management at the expense of the contractor or of the owner of the timber or other forest products cut or produced from the land upon which the unabated fire hazard remains.

(4) The cost and expense of the fire hazard reduction or management work, plus 20% of the cost and expense of the work as a penalty, constitute a lien upon the forest products cut or produced from the land and upon the real and personal property of the contractor. If payment of the sum demanded is not made to the department within 15 days of its written demand, the performance bond required by 76-13-408 and 76-13-409, upon notice to the contractor, must be automatically forfeited to the extent needed to cover the cost and expenses of reducing or managing the fire hazard, plus a penalty of 20% of the cost and expenses. If the bond is insufficient to cover the cost, expenses, and penalty, the department may bring legal action on behalf of the state to recover the cost, expenses, and penalty.

(5) In addition to other remedies provided in this part, the department may, after notice, require a person to show cause why the department should not withhold the issuance of any further fire hazard reduction agreement or exemption certificate to a person that:

(a) harvests timber without a valid fire hazard reduction agreement; or

(b) has forfeited the performance bond on a fire hazard reduction agreement within the 2 preceding years and fails, refuses, or neglects to properly reduce or manage the fire hazard in accordance with 76-13-407 or 76-13-408 within 30 days after being notified by the department.

(6) If the person fails to show sufficient cause as required by subsection (5), the department may withhold the issuance of any further fire hazard reduction agreement or exemption certificate for a period not to exceed 3 years.

When the department makes a determination of faithful compliance by the contractor with this part, the rules adopted under 76-13-403, and the fire hazard reduction agreement, the contractor must be issued a certificate of clearance by the department and be relieved of any further liability or responsibility for fire hazard reduction or management under the fire hazard reduction agreement.

76-13-413. Failure to submit withholding — remedy. (1) If a purchaser does not submit withheld money and required reports on or before the 15th day of the following month as provided in 76-13-409, the purchaser must be notified by certified mail that the purchaser is in noncompliance and be given 15 days to submit all money and reports then due. If the purchaser fails to submit all money due within the required time, the department may initiate a lien upon the real property of the purchaser and may initiate proceedings to enjoin further processing of all wood products until all money due is paid in full and all required reports are submitted.

(2) If payment and reports are not received by the department within the 15-day period after notification as provided in subsection (1), a penalty of 5% of the payment amount due must be assessed. The department may abate the penalty if the purchaser establishes that the failure to submit the amount due or the reports as required was due to reasonable cause and was not due to neglect on the purchaser's part. The department, in addition to the penalty, may impose interest at the rate of 10% a year on any balance remaining unpaid.

(2) (a) The fee for a fire hazard reduction agreement is $25 and must be collected by the department upon issuance of the agreement.

(b) In addition, a fee of 60 cents for each 1,000 board feet (log scale) must be charged or an equivalent fee must be charged if products other than logs are cut. This fee must be withheld by the purchaser as provided in 76-13-409(2), except that any fee money withheld for product volumes exceeding 500,000 board feet for each agreement in a calendar year must be returned to the contractor by the department.

(c) Either the person conducting the work or the purchaser, as described in 76-13-409, shall pay 15 cents for each 1,000 board feet (log scale) or the equivalent measure if forest products other than logs are cut. The assessment may not exceed $20,000 a year. The full amount of this money must be deposited in the forestry extension service account provided for in 76-13-415.

(iii) information on conservation district permit requirements related to stream crossings; and

(iv) any other information the department believes would assist the operator or the owner with conducting forest practices.

(b) The receipt of notification must include a statement that:

(i) forest practices may proceed; or

(ii) an onsite consultation is required prior to conducting forest practices.

(3) (a) An owner may submit to the department a notice providing an annual, semiannual, or quarterly operating plan that indicates the estimated starting date of forest practices for each timber sale planned by the owner during the operating period. The plan must be submitted no less than 15 days before the beginning of the operating period covered.

Part 1
General Provisions

76-15-101. Legislative determinations. It is declared, as a matter of legislative determination:

(1) that the farm and grazing lands of the state of Montana are among the basic assets of the state and that the preservation of these lands is necessary to protect and promote the health, safety, and general welfare of its people; that improper land use practices have caused and have contributed to and are now causing and contributing to a progressively more serious erosion of the farm and grazing lands of this state by wind and water; that the breaking of natural grass, plant, and forest cover has interfered with the natural factors of soil stabilization, causing loosening of soil and exhaustion of humus and developing a soil condition that favors erosion; that the topsoil is being blown and washed out of fields and pastures; that there has been an accelerated washing of sloping fields; that these processes of erosion by wind and water speed up with removal of absorptive topsoil, causing exposure of less absorptive and less protective but more erosive subsoil; that failure by any land occupier to conserve the soil and control erosion upon the occupier's lands causes a washing and blowing of soil and water from the occupier's lands onto other lands and makes the conservation of soil and control of erosion on other lands difficult or impossible;

(2) that the consequences of soil erosion in the form of soil blowing and soil washing are the silting and sedimentation of stream channels, reservoirs, dams, and ditches, the loss of fertile soil material in dust storms, the piling up of soil on lower slopes and its deposit over alluvial plains, the reduction in productivity or outright ruin of rich bottom lands by overwash of poor subsoil material, sand, and gravel swept out of the hills, the deterioration of soil and its fertility, the deterioration of crops and range cover grown on the land, declining acre yields despite development of scientific processes for increasing yields, the loss of soil and water that causes destruction of food and cover for wildlife, a blowing and washing of soil into streams that silts over spawning beds and destroys water plants, diminishing the food supply of fish, a diminishing of the underground water reserve, which causes water shortages, intensifies periods of drought, and causes crop and range vegetation cover failures, an increase in the speed and volume of rainfall runoff, causing severe and increasing floods that bring suffering, disease, and death, the impoverishment of families attempting to operate eroding and eroded lands, damage to roads, highways, railways, farm buildings, and other property from floods and from dust storms, and losses in municipal water supply, irrigation developments, farming, and grazing;

(3) that to conserve soil resources and control and prevent soil erosion and prevent floodwater and sediment damages and further the conservation, development, utilization, and disposal of water, it is necessary that land use practices contributing to soil wastage and soil erosion be discouraged and discontinued and appropriate soil-conserving land use practices and works of improvement for flood prevention and the conservation, development, utilization, and

disposal of water be adopted and carried out; that among the procedures necessary for widespread adoption are the carrying on of engineering operations such as the construction of water spreaders, terraces, terrace outlets, check dams, desilting basins, floodwater retarding structures, channel improvements, floodways, land drainage, dikes, ponds, ditches, and the like; the utilization of strip cropping, lister furrowing, contour cultivating, and contour furrowing; land drainage; land irrigation; seeding and planting of waste, sloping, abandoned, or eroded lands to water-conserving and erosion-preventing plants, trees, and grasses; forestation and reforestation; rotation of crops, restriction of number of livestock grazed, deferred grazing, rodent eradication; soil stabilization with trees, grasses, legumes, and other thick-growing, soil-holding crops; retardation of runoff by increasing absorption of rainfall; and retirement from cultivation of steep, highly erosive areas and areas now badly gullied or otherwise eroded.

76-15-102. Declaration of policy. It is hereby declared to be the policy of the legislature to provide for the conservation of soil and soil resources of this state, for the control and prevention of soil erosion, for the prevention of floodwater and sediment damages, and for furthering the conservation, development, utilization, and disposal of water and thereby to preserve natural resources, control floods, prevent impairment of dams and reservoirs, preserve wildlife, protect the tax base, protect public lands, and protect and promote the health, safety, and general welfare of the people of this state.

(c) a description of the territory proposed to be organized as a district, which description may not be required to be given by metes and bounds or by legal subdivisions but is sufficient if generally accurate;

(d) a request that:

(i) the department define the boundaries for the district;

(ii) a referendum be held within the territory defined on the question of the creation of a conservation district in the territory; and

(iii) the department determine that a district be created.

(3) Where more than one petition is filed covering parts of the same territory, the department may consolidate all or any part of the petitions.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(1), (2); amd. Sec. 1, Ch. 76, L. 1985; amd. Sec. 270, Ch. 418, L. 1995.

76-15-203. Hearing procedure if additional territory to be included. If it appears to the department after reviewing the record of the hearing that it may be desirable to include within the proposed district territory outside of the area within which due notice of the hearing has been given, the department shall adjourn the hearing and shall cause due notice of a further hearing to be given throughout the entire area considered for inclusion in the district. The further hearing must be held by the department.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 271, Ch. 418, L. 1995.

76-15-204. Determination of need for district. (1) After the hearing, if the department determines, upon the facts presented at the hearing and upon other relevant facts and information as may be available, that there is need, in the interest of the public health, safety, and welfare, for a conservation district to function in the territory considered at the hearing, it shall make and record that determination and shall define, by metes and bounds or by legal subdivisions, the boundaries of the district.

(2) If the department determines after the hearing, after due consideration of the relevant facts, that there is no need for a conservation district to function in the territory considered at the hearing, it shall make and record that determination and shall deny the petition. After 6 months have expired from the date of the denial of a petition, subsequent petitions covering the same or substantially the same territory may be filed and a new hearing held and determinations made on the petitions.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 272, Ch. 418, L. 1995.

76-15-205. Criteria for determining need. In making the determinations and in defining the boundaries, the department shall consider the topography of the area considered and of the state, the composition of soils in the area, the distribution of erosion, the prevailing land use practices, the desirability and necessity of including within the boundaries the particular lands under consideration and the benefits those lands may receive from being included within the boundaries, the relation of the proposed area to existing watersheds and agricultural regions and other conservation districts already organized or proposed for organization under this chapter, and such other physical, geographical, and economic factors as are relevant, having due regard to the legislative determination set forth in 76-15-101 and 76-15-102. The territory to be included within the boundaries need not be contiguous.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 273, Ch. 418, L. 1995.

76-15-206. Determination of administrative practicability of district. After the department has made and recorded a determination that there is need in the interest of the public health, safety, and welfare for the organization of a district in a particular territory and has defined the boundaries of the district, it shall consider the question whether the operation of a district within the boundaries with the powers conferred upon conservation districts in this chapter is administratively practicable and feasible.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 274, Ch. 418, L. 1995.

76-15-207. Referendum on question of creating district. (1) To assist the department in the determination of administrative practicability and feasibility, the department shall, within a reasonable time after entry of the finding that there is need for the organization of the proposed district and the determination of the boundaries of the district, hold a referendum within the proposed district upon the proposition of the creation of the district and cause due notice of the referendum to be given.

(2) The question must be submitted by ballots upon which the words "For creation of a conservation district of the lands below described and lying in the county(ies) of ...., ..., and ...." and "Against creation of a conservation district of the lands below described and lying in the county(ies) of .... and ...." must appear, with a square before each proposition and a direction to insert an "X" mark in the square before one or the other of the propositions as the voter may favor or oppose creation of the district. The ballot must set forth the boundaries of the proposed district as determined by the department.

(3) All qualified electors within the boundaries of the territory, as determined by the department, are eligible to vote in the referendum.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 275, Ch. 418, L. 1995.

76-15-208. Administration of hearings and referenda. (1) The department shall pay all expenses for the issuance of the notices and the conduct of the hearings and referenda and shall supervise the conduct of the hearings and referenda. It shall adopt appropriate rules governing the conduct of the hearings and referenda and providing for the registration prior to the date of the referendum of all eligible voters or prescribing some other appropriate procedure for the determination of those eligible as voters in the referendum.

(2) No informalities in the conduct of the referendum or in any matters relating thereto shall invalidate the referendum or the result thereof if notice thereof has been given substantially as herein provided and the referendum has been fairly conducted.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(5).

76-15-209. Procedure following referendum. (1) The department shall publish the result of the referendum, and shall consider and determine whether the operation of the district within the defined boundaries is administratively practicable and feasible.

(2) If the department determines that the operation of the district is administratively practicable and feasible, it shall record that determination and proceed with the organization of the district in the manner provided in this chapter.

(3) If the department determines that the operation of the district is not administratively practicable and feasible, it shall record that determination and deny the petition. After 6 months have expired from the date of entry of a determination by the department that operation of a proposed district is not administratively practicable and feasible and denial of a petition pursuant to the determination, subsequent petitions may be filed and action taken on the petitions in accordance with this part.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 276, Ch. 418, L. 1995.

76-15-210. Criteria for determining administrative practicability. (1) In making its determination, the department shall consider the attitudes of the qualified electors within the defined boundaries, the number of qualified electors eligible to vote in the referendum who voted, the proportion of the votes cast in the referendum in favor of the creation of the district to the total number of votes cast, the approximate wealth and income of the qualified electors of the proposed district, the probable expense of carrying on erosion-control operations within the district, and other economic and social factors relevant to the determination, having due regard to the legislative determinations set forth in 76-15-101 and 76-15-102.

(2) The department may not determine that the operation of the proposed district within the defined boundaries is administratively practicable and feasible unless a majority of the votes cast in the referendum upon the proposition of creation of the district has been cast in favor of the creation of the district.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 277, Ch. 418, L. 1995.

76-15-211. Appointment of supervisors. If the department determines that the operation of the proposed district within the defined boundaries is administratively practicable and feasible, it shall appoint two supervisors to act with the three supervisors first elected, as provided in this part, as the initial governing body of the district.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 278, Ch. 418, L. 1995.

(1) The two appointed supervisors shall present to the secretary of state an application signed by them, which must set forth:

(a) that a petition for the creation of the district was filed with the department pursuant to this chapter, that the proceedings specified in this chapter were taken pursuant to the petition, that the application is being filed in order to complete the organization of the district as a governmental subdivision and a public body, corporate and politic, under this chapter, and that the department has appointed them as supervisors;

(iii) notice was given and a referendum held on the question of the creation of the district; and

(iv) the result of the referendum showed a majority of the votes cast in the referendum to be in favor of the creation of the district and that the department determined that the operation of the proposed district is administratively practicable and feasible.

(b) The statement must also set forth the boundaries of the district as they have been defined by the department.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(part); amd. Sec. 279, Ch. 418, L. 1995.

76-15-213. Processing of application by secretary of state. (1) The secretary of state shall examine the application and statement, and if the secretary of state finds that the name proposed for the district is not identical with that of any other conservation district of this state or so nearly similar as to lead to confusion or uncertainty, the secretary of state shall receive and file the application and statement and shall record them in an appropriate book of record in the secretary of state's office.

Qualified electors may sign more than one nominating petition to nominate more than one candidate for supervisor.

(2) If more than twice the number of candidates are nominated than the number to be elected at the general election, the election administrator shall give due notice of a nominating election to be held for the selection of candidates for supervisor to appear on the next general election ballot. (b) The governing body may require that an election be held if, not more than 10 days after the close of filing by candidates, the governing body passes a resolution to hold an election and notifies the election administrator.

(1) setting forth:

(a) the adoption of the ordinance prescribing land use regulations;

(b) the failure of the defendant to observe such regulations and to perform particular work, operations, or avoidances as required thereby; and

(2) In all cases in which the person in possession of lands who fails to perform work, operations, or avoidances is not the owner, the owner of the lands must be joined as party defendant.

(3) The court may dismiss the petition, or it may require the defendant to perform the work, operations, or avoidances and may provide that, upon the failure of the defendant to initiate the performance within the time specified in the order of the court and to prosecute the performance to completion with reasonable diligence, the supervisors may enter upon the lands involved and perform the work or operations or otherwise bring the condition of the land into conformity with

the requirements of the regulations and recover the costs and expenses of the work or operations, with interest at the rate of 10% a year, from the defendant.

(2) Upon the basis of the findings and determination, the board of adjustment may order a variance from the terms of the land use regulations in their application to the lands of the petitioner that:

(a) will relieve the great practical difficulties or unnecessary hardship;

(b) will not be contrary to the public interest; and

Part 8

Alteration and Termination of Conservation Districts

76-15-801. Change of district name. Petitions for changing the name of a district organized under this chapter may be filed with the department. The petition shall be signed by a majority of the district supervisors and shall state the present name of the district and the proposed new name. If the department determines that the proposed new name is not identical with or so similar to that of any other district in the state as to lead to confusion or uncertainty, it shall present a statement of that determination to the secretary of state, who shall issue to the district a certificate, under the seal of the state, evidencing the change of name of the district. Upon the issuance of the certificate, the supervisors of the district shall cause due notice to be given of the change of the name of the district.

History: En. 76-117 by Sec. 1, Ch. 46, L. 1951; amd. Sec. 1, Ch. 41, L. 1959; amd. Sec. 13, Ch. 431, L. 1971; amd. Sec. 96, Ch. 253, L. 1974; R.C.M. 1947, 76-117(1).

76-15-802. Procedure to add territory to a district. Petitions for including additional territory within an existing district may be filed with the department, and the proceedings provided for in part 2 in the case of petitions to organize a district shall be followed in the case of petitions for the inclusion. The department shall prescribe the form for the petitions, which shall be as nearly as may be in the form prescribed in part 2 for petitions to organize a district. Where the total number of qualified electors in the area proposed for inclusion is less than 10, the petition may be filed when signed by a majority of the qualified electors of the area, and in that case no referendum need be held. In referenda upon petitions for the inclusion, all qualified electors within the proposed additional area are eligible to vote.

History: En. Sec. 5, Ch. 72, L. 1939; amd. Sec. 3, Ch. 73, L. 1961; amd. Sec. 4, Ch. 431, L. 1971; amd. Sec. 90, Ch. 253, L. 1974; amd. Sec. 1, Ch. 18, L. 1977; R.C.M. 1947, 76-105(10).

76-15-803. Combination or division of districts. (1) A petition may be filed with the department for the division of any district, for the combination of any two or more districts, or for the division of a district and the combination of any divided part of a district with any other district. Any or all of these actions may be initiated by the filing of a single petition with the department. The petition must be signed by a majority of the members of each of the governing bodies of the affected districts. The department shall prescribe the form for the petition. When a petition is filed, the department shall within 30 days give notice of a public hearing on the petition. All qualified electors within the affected districts and all other interested parties are entitled to attend the hearing and be heard. After the hearing, the department shall determine from the hearing record whether the proposed division, the combination, or the division and combination of territory is administratively practicable and feasible. In making the determination, the department shall give due regard to the legislative determinations set forth in 76-15-101 and 76-15-102 and to the considerations enumerated in 76-15-201 through 76-15-216, to the extent applicable, relative to determining the practicability and feasibility of creating a district.

(2) If the department determines that the proposed division, combination, or division and combination is administratively practicable and feasible, the department shall effect the proposed division, combination, or division and combination by filing with the secretary of state a statement certifying the changes made in the boundaries of the affected districts, together with any change in the name of the districts. If the determination is in the negative, the department shall make and record that determination and shall deny the petition. After 6 months from the denial of the petition, a new petition may be filed.

(3) When a district is divided, the supervisors of the district shall allocate the property, rights, and liabilities (including contractual obligations) of the district among the resulting parts of the district, giving due consideration to the proportionate size of each divided part, the number of qualified electors and operating units, the degree and extent of soil erosion in the district, and other relevant factors. A statement of the allocation must be filed with the department within 30 days after the notification of the board's determination in favor of the division of the district. If the supervisors fail to make or to agree upon the allocation, the division must be made by the department after a hearing as the department considers necessary and with due regard for the standards set out in this subsection for making the allocations.

(name of the conservation district or part of the district to be here inserted)" and "Against terminating the existence of the .... (name of the conservation district or part of the district to be here inserted)" shall appear with the square before each proposition and a direction to insert an "X" mark in the square before one or the other of the propositions as the voter may favor or oppose discontinuance of the district or a part of the district.

(2) All qualified electors within the boundaries of the district are eligible to vote in the referendum. No informalities in the conduct of the referendum or in any matters relative thereto shall invalidate the referendum or the result thereof if notice thereof is given substantially as herein provided and the referendum is fairly conducted.

(1) In the case of petitions for discontinuance of a district, the department shall publish the result of the referendum and shall consider and determine whether the continued operation of the district within the defined boundaries is administratively practicable and feasible.

(2) If the department determines that the continued operation of the district is administratively practicable and feasible, it shall record that determination and deny the petition.

(3) If the department determines that the continued operation of the district is not administratively practicable and feasible, it shall record that determination and shall certify the determination to the supervisors of the district.

76-15-808. Criteria for decision on discontinuance. (1) In making the determination, the department shall give due regard and weight to the attitudes of the qualified electors lying within the district, the number of qualified electors eligible to vote in the referendum who voted, the proportion of the votes cast in the referendum in favor of the discontinuance of the district or part of the district to the total number of votes cast, the approximate wealth and income of the qualified electors of the district, the probable expense of carrying on erosion control operations within the district, and such other economic and social factors as may be relevant to the determination, having due regard to the legislative findings set forth in 76-15-101 and 76-15-102.

(2) The department may not determine that the continued operation of the district or part of the district is administratively practicable and feasible unless at least a majority of the votes cast in the referendum are cast in favor of the continuance of the district or part of the district.

(2) The supervisors shall dispose of all property belonging to the district or part of the district at public auction and shall pay the proceeds of the sale into the state treasury.

(3) The supervisors shall file an application, duly verified, with the secretary of state for the discontinuance of the district or part of the district and shall transmit with the application the certificate of the department, setting forth the determination of the department that the continued operation of the district or part of the district is not administratively practicable and feasible. The application must state that the property of the district or part of the district has been disposed of and the proceeds paid to the treasury as provided in 76-15-804 through 76-15-810 and must set forth a full accounting of the properties and proceeds of the sale.

(4) The secretary of state shall issue to the supervisors a certificate of dissolution and shall record the certificate in an appropriate book of record in the secretary of state's office.

History: En. Sec. 14, Ch. 72, L. 1939; amd. Sec. 11, Ch. 431, L. 1971; amd. Sec. 94, Ch. 253, L. 1974; amd. Sec. 5, Ch. 18, L. 1977; R.C.M. 1947, 76-114(5); amd. Sec. 298, Ch. 418, L. 1995.

76-15-810. Effect of termination. (1) Upon issuance of a certificate of dissolution under 76-15-809, all ordinances and regulations theretofore adopted and in force within the district or in that part of the district are void.

(2) All contracts previously entered into, to which the district or supervisors are parties, remain in effect for the period provided in those contracts. The department shall be substituted for the district or supervisors as party to the contracts if the total district is discontinued. In this case the department is entitled to all benefits and subject to all liabilities under the contracts and has the same right and liability to perform, to require performance, to sue and be sued thereon, and to modify or terminate the contracts by mutual consent or otherwise as the supervisors of the district would have had.

(3) The dissolution does not affect the lien of any judgment entered under 76-15-708 through 76-15-710 or the pendency of an action instituted under those sections, and the department succeeds to all rights and obligations of the district or supervisors as to those liens and actions.

History: **En. Sec. 1, Ch. 531, L. 2001.**

76-15-902. Legislative findings and declaration of purpose. (1) The legislature finds that the need for an economical supply of clean-burning energy is a national and state priority.

(2) The legislature further finds that Montana possesses plentiful reserves of clean-burning natural gas contained in coal beds.

(3) The legislature further finds that the extraction of natural gas from coal beds may result in unanticipated adverse impacts to land and to water quality and availability.

(4) The legislature declares that there is a compelling public need to promote efforts that preserve the environment and protect the right to use and enjoy private property. The legislature further declares that the purpose of this part is to establish a long-term coal bed methane protection account and a coal bed methane protection program for the purpose of compensating private landowners and water right holders for damage to land and to water quality and availability that is attributable to the development of coal bed methane wells.

(5) The legislature further declares that the provisions of this part do not relieve coal bed methane developers or operators that own, develop, or operate coal bed methane wells and collection systems of their legal obligation to compensate landowners and water right holders for damages caused by the development of coal bed methane.

(6) The legislature further declares that the provisions of this part do not relieve coal bed methane developers or operators from:

(a) any liability associated with the exploration or development of coal bed methane; or

(b) the responsibility to comply with any applicable provision of Titles 75, 82, and 85 and any other provision of law applicable to the protection of natural resources or the environment.

(4) "Emergency" means the loss of a water supply that must be replaced immediately to avoid substantial damage to a landowner or a water right holder.
History: **En. Sec. 3, Ch. 531, L. 2001.**

76-15-904. Coal bed methane protection account — use. (1) There is a coal bed methane protection account in the state special revenue fund.

(2) All money paid into the account must be invested by the board of investments. Earnings from investments must be deposited in the account.

(3) Subject to the conditions of subsections (4) and (5), money deposited in the account must be used to compensate landowners and water right holders for damages attributable to coal bed methane development as provided in this part.

(4) Money deposited in the fund and earnings of the fund may not be expended until after June 30, 2005. For fiscal years beginning after June 30, 2005, principal and earnings may be expended only in the case of an emergency. For fiscal years beginning after June 30, 2011, principal and earnings in the account may be expended for any purpose authorized pursuant to this part.

(5) Subject to legislative fund transfers, money in the account must be appropriated to the department for use by conservation districts that have private landowners or water right holders who qualify for compensation as provided in 76-15-905.
History: **En. Sec. 4, Ch. 531, L. 2001; amd. Sec. 12, Ch. 522, L. 2003; amd. Sec. 11, Ch. 312, L. 2011.**

76-15-905. Coal bed methane protection program — restrictions. (1) There is a coal bed methane protection program administered by conservation districts that have coal beds within the exterior boundary of the district or whose water sources may be adversely affected by the extraction of coal bed methane. The purpose of the coal bed methane protection program is to compensate private landowners or water right holders for damage caused by coal bed methane development.

(2) A conservation district shall establish procedures, approved by the department, for evaluating claims for compensation submitted by a landowner or water right holder. The procedures must include:

(b) a process for determining the cost of the damage to land, surface water, or ground water, if any, caused by coal bed methane development;

(d) criteria for ranking applications related to available resources.

(3) An eligible recipient for compensation includes private landowners and water right holders who can demonstrate as the result of damage caused by coal bed methane development:

(a) a loss of agricultural production or a loss in the value of land;

(b) a reduction in the quantity or quality of water available from a surface water or ground water source that affects the beneficial use of water; or

(c) the contamination of surface water or ground water that prevents its beneficial use.

(4) (a) Subject to the conditions of subsections (5) through (8), an eligible landowner may be compensated for the damages incurred by the landowner for loss of agricultural production and income, lost land value, and lost value of improvements caused by coal bed methane development. A payment made under this subsection (4)(a) may only cover land directly affected by coal bed methane development.

(b) Subject to the conditions of subsections (5) through (8), an eligible water right holder may be compensated for damages caused by the contamination, diminution, or interruption of surface water or ground water.

(5) In order to qualify for a payment of damages under this section, the landowner or water right holder shall demonstrate that it is unlikely that compensation will be made by the coal bed methane developer or operator who is liable for the damage to land or the reduction in or contamination of surface water or ground water as the result of coal bed methane development.

(6) Compensation made to a landowner or a water right holder under this section may not exceed 75% of the cost of the damages. The maximum amount paid to a landowner or water right holder may not exceed $50,000.

(7) Conservation district administrative expenses for services provided under this section are eligible costs for reimbursement from the coal bed methane protection account.

(8) (a) Except as provided in subsection (8)(b), compensation for damages allowed under this section may be made only after June 30, 2011.

(b) Compensation for an emergency may be made after June 30, 2005.

76-16-309. Knowledge of state district boundaries responsibility of livestock owner. A person herding or in control of livestock in the approximate vicinity of a state district shall ascertain the boundary lines of the state district.

History: En. Sec. 11, Ch. 208, L. 1939; amd. Sec. 41, Ch. 253, L. 1974; R.C.M. 1947, 46-2311(part); amd. Sec. 24, Ch. 31, L. 2001.

76-16-310. Permit required to run livestock in state district. (1) An owner or person in control of livestock may not permit livestock to run at large or under herd within the exterior boundaries of a state district unless the owner or person in control of the livestock first obtains a grazing permit from the state district.

(2) The owner or person in control of livestock running at large or under herd within a state district without a permit from the state district or in excess of the permit is liable for all damages sustained by any member, permittee, or state district that are a result of the person's unpermitted use of the state district. If livestock wrongfully enter a state district, the owner or person in control of the trespassing livestock, who willfully or negligently permits livestock to run at large within the state district without first obtaining a permit from the state district, is guilty of a misdemeanor and, upon conviction, shall be punished by a fine in an amount not less than $10 or more than $500. In addition to a fine, the owner or person is liable for all damages that are caused by the trespassing livestock.

(3) This provision does not require any person to obtain a grazing permit to graze livestock on land that the person owns or controls within a state district if the stock being grazed are restrained from running at large within the state district and from grazing on any other lands within the state district.

History: En. Sec. 26, Ch. 208, L. 1939; amd. Sec. 7, Ch. 199, L. 1945; amd. Sec. 4, Ch. 257, L. 1955; R.C.M. 1947, 46-2326(1); amd. Sec. 25, Ch. 31, L. 2001.

76-16-311. Control of trespassing livestock. (1) The state district or its duly authorized agent controlling the land upon which wrongful entry is made by trespassing livestock may take the livestock into its possession and shall reasonably care for the livestock while in its possession and may retain possession of the livestock and have a lien and claim on the livestock as security for payment of damages and reasonable charges for the care of livestock while in its possession.

(2) The state district taking possession of trespassing livestock shall, within 72 hours after taking possession, notify the owner, owners, or person in charge of the livestock by a notice in writing describing the livestock by number of animals and brands on the livestock, if any, the amount of damages claimed to date, and the charge per animal unit per day for caring for and feeding the livestock thereafter. Charges may not exceed $2 per animal unit per day. The notice must generally describe the location where the livestock is held and require the owner or owners, within 10 days after receiving the notice, to take the livestock away after making full payment of all damages and costs.

(3) In case the parties do not agree as to the amount of damages, the state district taking possession of the livestock may at the expense of the owner retain a sufficient number of livestock to cover the amount of damages claimed by the state district. However, the owner may, upon furnishing a sufficient bond, conditioned for the payment to the state district of all sums, including costs that may be recovered by the state district in a civil action to foreclose its lien, have returned to the owner all livestock held. The state district is liable to the owner for any loss or injury to the livestock accruing through the state district's lack of reasonable care.

(4) If the state district taking possession of the livestock fails to recover in a civil action a sum equal to that offered to the state district by the owner of the livestock, the state district shall bear the expense of keeping and feeding the livestock while in its possession. Notice may be given by personal service on the owner, owners, or person in charge of the livestock by sending notice by prepaid registered or certified mail, addressed to that person's last-known place of residence. Service by registered or certified mail is considered complete upon the deposit of the notice in the post office.

Part 4
Grazing Permit System

76-16-401. Distribution of grazing preferences. When a state district is organized, grazing preferences must be distributed in the following manner:

(1) Any member of a state district owning or controlling dependent commensurate property may be given a grazing preference.

(2) If the carrying capacity of the range exceeds the reasonable needs of the members owning or controlling dependent commensurate property, members owning or controlling commensurate property shall have the grazing preference.

(3) If the carrying capacity of the range exceeds the reasonable needs of the members owning or controlling dependent commensurate property or commensurate property, temporary grazing permits may be issued to nonmembers or members, preferring those that have used the range 5 years immediately preceding the organization of the state district.

History: En. Sec. 20, Ch. 208, L. 1939; amd. Sec. 5, Ch. 199, L. 1945; amd. Sec. 3, Ch. 163, L. 1953; amd. Sec. 3, Ch. 257, L. 1955; R.C.M. 1947, 46-2320(part); amd. Sec. 32, Ch. 31, L. 2001.

76-16-402. Conversion of temporary permittee lands to dependent commensurate property. (1) When a temporary permit is utilized by a permittee in connection with forage-producing lands owned or controlled by the permittee within or near the state district for a period of any combination of 4 years out of 5, then the forage-producing lands owned or controlled by the permittee may be considered dependent commensurate property and, upon application, the state district may accordingly grant such permittee membership and grazing preference in the state district providing an application had been made for temporary rights for each of the 5 years.

(2) However, temporary permits are privileges granted from year to year, and their possession does not establish a grazing preference right unless a grazing preference right is expressly granted by the state district and in the manner provided in this part.

History: En. Sec. 20, Ch. 208, L. 1939; amd. Sec. 5, Ch. 199, L. 1945; amd. Sec. 3, Ch. 163, L. 1953; amd. Sec. 3, Ch. 257, L. 1955; R.C.M. 1947, 46-2320(part); amd. Sec. 33, Ch. 31, L. 2001.

76-16-403. Procedure if reduction in grazing privileges necessary. (1) If a reduction in grazing privileges becomes necessary, operators with temporary permits will be reduced on a proportionate basis prior to any reduction to any holder of grazing preference.

(2) Reductions of grazing preference for individual members that result from actions beyond the control of the state district or the board of directors of a state district or as a result of actions or of the failure to take appropriate actions by the holder of the grazing preference in question do not require a general reduction in grazing preference, and the state district may not be compelled to require proportionate reductions in grazing preference, by the membership of the state district.

History: En. Sec. 20, Ch. 208, L. 1939; amd. Sec. 5, Ch. 199, L. 1945; amd. Sec. 3, Ch. 163, L. 1953; amd. Sec. 3, Ch. 257, L. 1955; R.C.M. 1947, 46-2320(part); amd. Sec. 29, Ch. 401, L. 1999; amd. Sec. 34, Ch. 31, L. 2001.

76-16-404. Application for grazing preferences. Any person entitled to grazing preferences within any state district based on dependent commensurate property or commensurate property shall make application within 1 year after the state district is organized to qualify for grazing preference. However, all permittees must be entitled to benefits accruing under 76-16-401 through 76-16-403.

History: En. Sec. 21, Ch. 208, L. 1939; amd. Sec. 6, Ch. 199, L. 1945; R.C.M. 1947, 46-2321(part); amd. Sec. 35, Ch. 31, L. 2001.

76-16-405. Grazing preferences appurtenant to dependent commensurate property and commensurate property. Grazing preferences run with and are appurtenant to the dependent commensurate and commensurate property upon which they are based except as provided in this chapter. They are not subject to devise, bequest, attachment, execution, lease, sale, exchange, transfer, pledge, mortgage, or other process or transaction, except as provided in this section, 76-16-406 through 76-16-409, 76-16-412, and 76-16-413 or in the bylaws of a state district.

History: Ap. p. Sec. 22, Ch. 208, L. 1939; amd. Sec. 4, Ch. 163, L. 1953; amd. Sec. 1, Ch. 24, L. 1971; amd. Sec. 49, Ch. 253, L. 1974; Sec. 46-2322, R.C.M. 1947; Ap. p. Sec. 2, Ch. 208, L. 1939; amd. Sec. 1, Ch. 199, L. 1945, amd. Sec. 37, Ch. 253, L. 1974; Sec. 46-2302, R.C.M. 1947; R.C.M. 1947, 46-2302(part), 46-2322(part).

76-16-406. Transfer of grazing preferences. (1) Upon application by a permittee, the state district with the approval of the commission may allow a grazing preference based on ownership or control of dependent commensurate or commensurate property to be transferred to other property of sufficient commensurability. However, in any transfer of grazing preference from dependent commensurate or commensurate property controlled but not owned by the applicant, the applicant must have had control and use of the dependent commensurate or commensurate property and the grazing preference appurtenant to the property for 5 consecutive years and must have established and maintained the livestock operation upon which the dependency was established by use or priority immediately prior to the application for transfer.

(2) In addition, the transfer may not interfere with the stability of livestock operations or with proper range management and may not affect adversely the established local economy. A transfer may not be allowed without the written consent of the owner or owners of the dependent commensurate or commensurate property from which the transfer is to be made and the owner or owners of any encumbrances on the property. A transfer is not effective until approved by the commission.

(3) All expenses involved under the application must be borne by the applicant.

History: En. Sec. 22, Ch. 208, L. 1939; amd. Sec. 4, Ch. 163, L. 1953; amd. Sec. 1, Ch. 24, L. 1971; amd. Sec. 49, Ch. 253, L. 1974; R.C.M. 1947, 46-2322(part); amd. Sec. 24, Ch. 266, L. 1979; amd. Sec. 30, Ch. 401, L. 1999; amd. Sec. 36, Ch. 31, L. 2001.

76-16-407. Processing of application for transfer. (1) When an application for transfer is presented to the board of directors of a state district, the secretary of the state district upon the direction of that board shall give notice, setting forth in general the application and the time and place of a hearing on the application as fixed by the board. A copy of the notice must be given or mailed to the applicant and must be published at least once a week for 2 successive weeks prior to the hearing in a newspaper published or generally circulated within the state district. The notice must also be posted for at least 2 full weeks prior to the hearing in three public places within the state district.

(2) The date of the hearing must be at least 15 days from the first publication of the notice. At the hearing the directors shall fully hear and determine the application and any objections to the application.

History: En. Sec. 22, Ch. 208, L. 1939; amd. Sec. 4, Ch. 163, L. 1953; amd. Sec. 1, Ch. 24, L. 1971; amd. Sec. 49, Ch. 253, L. 1974; R.C.M. 1947, 46-2322(2); amd. Sec. 37, Ch. 31, L. 2001.

76-16-408. Effect of transfer of grazing preference. Upon the allowance of a transfer under 76-16-405 through 76-16-407, the property from which the transfer is made loses its grazing preference to the extent of the grazing preference transferred.

History: En. Sec. 22, Ch. 208, L. 1939; amd. Sec. 4, Ch. 163, L. 1953; amd. Sec. 1, Ch. 24, L. 1971; amd. Sec. 49, Ch. 253, L. 1974; R.C.M. 1947, 46-2322(3); amd. Sec. 38, Ch. 31, L. 2001.

76-16-409. Transfer of underlying property. (1) When the land to which a grazing preference is attached changes its control or ownership, the grazing preference changes with the land and the person to which the control or ownership changes shall secure a nonuse permit or shall pay the usual grazing fees.

(2) If the person fails to secure a nonuse permit or refuses to pay the grazing fees, the grazing preferences may be revoked by the state district.

History: En. Sec. 22, Ch. 208, L. 1939; amd. Sec. 4, Ch. 163, L. 1953; amd. Sec. 1, Ch. 24, L. 1971; amd. Sec. 49, Ch. 253, L. 1974; R.C.M. 1947, 46-2322(part); amd. Sec. 39, Ch. 31, L. 2001.

76-16-410. Compensation to state district for range improvements. Subsequent lessees or owners of land shall compensate a state district for the value of range improvements constructed with the consent of the owner upon lands leased by the state district. The value must be the value at the expiration date of the lease. If the owner and the state district cannot agree as to the value, the state district may either remove or abandon the improvement. If the subsequent lessee and the state district cannot agree as to the value, it must be fixed by the commission.

History: **En. Sec. 23, Ch. 208, L. 1939; amd. Sec. 50, Ch. 253, L. 1974; R.C.M. 1947, 46-2323; amd. Sec. 40, Ch. 31, L. 2001.**

76-16-411. Grazing permits to owners of land not controlled by state district. (1) When any land is situated within the boundaries of a state district and is not leased or controlled by the state district and not surrounded by a legal fence, any person owning or controlling these lands has the right to obtain a grazing permit from the state district, the size of which must be determined by the carrying capacity of the land, full consideration being given for location of necessary stock water. The use of the permit is subject to all regulations by the state district.

(2) If the person owning or controlling the land declines to secure a permit or fails to lease the land to the state district at a fair lease rental and fails to fence the land at the person's expense, the person is not entitled to recover damages for trespass by stock grazing under permit, but the state district may not issue a permit to use the carrying capacity of the land.

History: **En. Sec. 27, Ch. 208, L. 1939; R.C.M. 1947, 46-2329(part); amd. Sec. 41, Ch. 31, L. 2001.**

76-16-412. Revocation of grazing preferences upon failure to obtain permits, pay fees, or obey rules. (1) If a person controls but does not own land and does not secure a nonuse permit and refuses to pay grazing fees, the state district shall notify the owner of the land by certified mail that the grazing preference attached to the land will be revoked unless the owner pays the usual grazing fees to the state district within 60 days from the time of receipt of the notice. The state district may revoke the grazing preference if the owner or mortgagor does not pay the fees or secure a nonuse permit.

(2) If a permittee fails to pay grazing fees or assessments levied by the state district or fails to obtain a nonuse permit or violates any of the rules of the state district, the state district may notify the permittee and owner of the land by certified mail that the grazing preference attached to the land will be revoked unless the grazing fees or assessments are paid or the permittee ceases to violate the rules laid down by the state district within 60 days from the time of receipt of the notice. The state district may revoke the grazing preference if the permittee or owner fails to pay the charges or comply.

History: **En. Sec. 22, Ch. 208, L. 1939; amd. Sec. 4, Ch. 163, L. 1953; amd. Sec. 1, Ch. 24, L. 1971; amd. Sec. 49, Ch. 253, L. 1974; R.C.M. 1947, 46-2322(part); amd. Sec. 42, Ch. 31, L. 2001.**

76-16-413. Effect of revocation. (1) When a grazing preference is revoked, it is detached from the dependent commensurate or commensurate property to which it was formerly appurtenant and it immediately shifts to the state district. A revocation includes all rights, privileges, and authorities associated with a grazing preference.

(2) The state district may then allocate it to either dependent commensurate or commensurate property in the manner provided by its bylaws.

History: **En. Sec. 22, Ch. 208, L. 1939; amd. Sec. 4, Ch. 163, L. 1953; amd. Sec. 1, Ch. 24, L. 1971; amd. Sec. 49, Ch. 253, L. 1974; R.C.M. 1947, 46-2322(7); amd. Sec. 31, Ch. 401, L. 1999; amd. Sec. 43, Ch. 31, L. 2001.**

76-16-414. Equalization of state district assets. (1) Whenever a state district possesses reserves, the values of which are greater than its liabilities, and the state district determines that a part of the reserves is in excess of its reasonable needs to operate the state district, the state district may refund to the permittee members their proportionate share of the reserves as determined at the last annual accounting.

(2) Whenever a state district possesses reserves and physical assets, the values of which are greater than its liabilities, and a permittee member loses a grazing preference or any portion of a grazing preference, the permittee member is entitled to receive a proportionate share of the value of the excess from the state district, as determined by the annual accounting of the state district. Valuation must be as prescribed by the bylaws of the state district. The state district may set off the amount of any claim it may have against a former member.

(3) Whenever a new member receives a grazing preference, the new member shall, as a condition of receiving the grazing preference, pay to the state district the value of the equitable interest in the physical assets and reserve fund that accrues to the new member by virtue of membership. The value must be determined at the time of receiving a grazing preference, as

prescribed by the bylaws of the state district, and upon the basis of the determination of value of physical assets and reserves made at the last annual accounting.

History: En. Sec. 24, Ch. 208, L. 1939; amd. Sec. 5, Ch. 163, L. 1953; R.C.M. 1947, 46-2324; amd. Sec. 32, Ch. 401, L. 1999; amd. Sec. 44, Ch. 31, L. 2001.

76-16-415. Application to trespass actions. Sections 76-16-405 through 76-16-409, 76-16-412, and 76-16-413 do not apply to trespass violations.

77-1-101. Definitions. Unless the context requires otherwise and except for the definition of state land in 77-1-701, in this title, the following definitions apply:

(1) "Board" means the board of land commissioners provided for in Article X, section 4, of the Montana constitution.

(2) "Commercial or concentrated recreational use" means any recreational use that is organized, developed, or coordinated, whether for profit or otherwise. Commercial or concentrated recreational use includes all outfitting activity and all activities not included within the definition of general recreational use.

(3) "Department" means the department of natural resources and conservation provided for in Title 2, chapter 15, part 33.

(4) "Distributable revenue" applies to all land trusts managed by the board, except property held pursuant to the Morrill Act of 1862, 7 U.S.C. 301 through 308, and the Morrill Act of 1890, 7 U.S.C. 321 through 329, and includes:

History: En. Sec. 1, Ch. 107, L. 1999.

77-1-108. Trust land administration account — administrative costs — appropriation. (1) There is a trust land administration account in the state special revenue fund. Money in the account is available to the department by appropriation and must be used to pay the costs of administering state trust lands. This includes the cost of managing assets, including but not limited to real property and monetary assets.

(2) Appropriations from the account for each fiscal year may not exceed an amount equal to 25% of the distributable revenue, as defined in 77-1-101, generated in the fiscal year completed prior to the legislative session that will appropriate money for the next biennium. This excludes revenue generated by the forest improvement fee provided for in 77-5-204.

(3) (a) Pursuant to subsection (1), the administrative costs must be determined for each land trust. The department may adopt rules regarding the calculation of administrative costs as necessary.

(b) Each fiscal year, the department shall compare administrative costs for each land trust to the amount of revenue that land trust generates for the account. If the amount of revenue deposited pursuant to 77-1-109(2) exceeds the administrative costs for a specific land trust, the excess revenue must be distributed as provided in subsection (4) of this section.

(c) If revenue deposited from a specific land trust is insufficient to defray the administrative costs associated with managing that land trust and the money held for that trust in the earnings reserve account established in 77-1-132 is also insufficient, the board may receive a general fund loan pursuant to 17-2-107 to offset the difference. A general fund loan made pursuant to this subsection (3)(c) must be repaid within 5 years and must bear interest at a rate of return equal to that earned by the board of investments' short-term investment pool during that period.

(4) (a) Except as provided in subsections (4)(b) and (5), up to one-third of the unreserved distributable revenue remaining in the account at the end of a fiscal year may be transferred to the earnings reserve account provided for in 77-1-132 and accounted for by trust. The remaining unreserved revenue must be transferred to each of the permanent funds in proportionate shares to each fund's contribution to the account.

(b) At the end of the fiscal year, unreserved funds received pursuant to 77-1-109(2)(a)(ii) and (2)(a)(iii) must be transferred to each of the permanent funds or to the appropriate trust or distributed to the beneficiary in proportionate shares to each fund's contribution to the account.

(5) (a) The amount of $80,000 each biennium is transferred from the state general fund to an account in the state special revenue fund. The account is statutorily appropriated, as provided in 17-7-502, to the department for the purposes of administering the land granted to the state pursuant to the Morrill Act of 1862, 7 U.S.C. 301 through 308, and the Morrill Act of 1890, 7 U.S.C. 321 through 329. Any unexpended portion of the statutory appropriation may be retained in the account and used for the administration of the Morrill Act land.

(b) At the end of each fiscal year, the department shall pay from the appropriation in subsection (5)(a) to the trust containing proceeds derived from land granted to the state pursuant to the Morrill Act of 1862, 7 U.S.C. 301 through 308, and the Morrill Act of 1890, 7 U.S.C. 321 through 329, an amount calculated to be the cost of administering the investment of the fund derived from that trust. The payment must be based upon the percentage that the Morrill Act fund constitutes of the total fund derived from all trust lands. If the appropriation in subsection (5)(a) is insufficient to pay the calculated administrative cost, a general fund loan may be used pursuant to 17-2-107 to offset the difference.

This excludes revenue generated by the forest improvement fee provided for in 77-5-204.

(2) (a) Subject to subsection (1), the department shall deposit into the trust land administration account the following:

(i) distributable revenue;

(ii) the proceeds or income from the sale of easements and timber, except timber from public school and Montana university system lands;

(iii) mineral royalties; and

(iv) fees collected pursuant to 77-2-328.

(b) As deposits are made, they must be identified and accounted for by trust.

(c) The department may not make deductions from interest or income generated from lands granted to the state pursuant to the Morrill Act of 1862, 7 U.S.C. 301 through 308, and the Morrill Act of 1890, 7 U.S.C. 321 through 329.

(3) After the deposits in subsection (2) have been made, the remainder of the proceeds, other than proceeds from timber from Montana university system lands and other than those purchased pursuant to 17-6-340, must be deposited in accordance with 17-3-1003, 18-2-107, and 20-9-341(2). Timber proceeds from university system lands must be paid over to the state treasurer, who shall deposit the money to the credit of the proper fund for use as provided in 17-3-1003. Royalty payments purchased pursuant to 17-6-340 must be used as provided in that section and 20-9-622.

(2) In any civil action seeking an injunction or restraining order concerning a decision of the board or department approving a use or disposition of state lands that would produce revenue for any state lands trust beneficiary, the court shall require a written undertaking for the payment of damages that may be incurred by the trust beneficiary if the board or the department is wrongfully enjoined or restrained.

77-1-122. Environmental review of energy development projects on state land. (1) Except as provided in subsection (2), the scope of any environmental review under Title 75, chapter 1, parts 1 and 2, for a proposed action on state land is limited to the impacts of the proposed action within the boundaries of the state land parcel or parcels in which the proposed state action is taking place if the:

(a) board or the department, pursuant to this title, is proposing a sale or exchange or to issue a right-of-way, easement, placement of improvement, lease, license, or permit or if the department or board is acting in response to an application for an authorization for a proposal; and

(b) state action is part of a larger energy development project that includes private or federal land that is not subject to permitting or certification under Title 75 or Title 82.

(2) If more than 33% of the total land area physically occupied by the proposed energy development project provided for in subsection (1) is state land, then the scope of the environmental review under Title 75, chapter 1, parts 1 and 2, for the proposed action must include the total land area, including federal and private land, that will be occupied by the proposed energy development project.

History: En. Sec. 1, Ch. 239, L. 2009.

77-1-123 and 77-1-124 reserved.

77-1-125. Liability for unauthorized installation or construction of facility or structure on state trust land — penalty. (1) A person, other than the lessee of the affected state trust land, may not, after September 30, 1997:

(a) install or construct a road, pipeline, ditch, utility line, fence, building, or other facility or structure on state trust land without obtaining an easement, lease, license, or other written permission of the department; or

(b) disturb state trust land in anticipation of the installation or construction of the facility or structure.

(2) A person who violates subsection (1) is liable to the department for a civil penalty in an amount determined by the board. The penalty may be an amount up to three times the full market value of the land disturbed or affected or $500, whichever is greater.

(3) In addition to the penalty provided for in subsection (1), a person who installs or constructs a facility or structure on state trust land without permission is liable for any permanent damage to the state trust land and may be required to remove the facility or structure and to reclaim the disturbed land to the satisfaction of the department or to pay the department's cost of removal and reclamation.

(4) If the department allows the facility or structure to remain on state trust land, the department shall also require payment of full market value of any easement, lease, or license required for the facility or structure.

(5) The penalties provided in this section do not apply to the lessee of the affected state trust land. The remedies and penalties provided in a state trust easement, lease, or license and the statutes and regulations under which the easement, lease, or license was entered are the exclusive remedies and penalties that may be applied to a lessee.

(6) The penalties provided in this section do not apply to persons who have inadvertently installed or constructed pipelines or utility lines within 20 feet of the easement boundaries granted by the state.

(7) The penalties provided in this section do not apply to facilities or structures installed on lands acquired by the state through exchange or purchase that were authorized with the permission of the previous landowner or through authority granted by an appropriate government agency.

History: En. Sec. 1, Ch. 460, L. 1997.

77-1-126. Notice of noncompliance. (1) When the department finds that noxious weeds on leased state land or on state land subject to a license or permit have not been controlled as required by 7-22-2116, the lease, the license, or the permit, the department shall contact the lessee, licensee, or permittee and require that a weed management and control program be implemented. The lessee, licensee, or permittee may request that an inspection of the state land be made with department staff. The department shall seek voluntary compliance with a noxious weed management and control program for the state lands prior to issuing a notice of noncompliance. If the lessee, licensee, or permittee fails to implement a weed management and control program when directed by the department, the department shall notify the lessee, licensee, or permittee by mail of the noncompliance. The notice must specify:

(a) the basis for the determination of noncompliance;

(b) the geographic location of the area of noncompliance by legal description or other reasonably identifiable description;

(c) measures to be undertaken in order to comply with the weed control responsibilities of the lease, license, or permit;

(d) a reasonable period of time, not less than 15 days, in which compliance measures must be initiated;

(e) the right of the person to request, within 15 days, an administrative hearing as provided by 77-1-128; and

(f) the right of the person to request an extension if the measures in subsection (1)(c) cannot be implemented due to climatic or growing conditions.

(2) At least 2 weeks prior to sending a notice of noncompliance, the department shall send by certified mail to the lessee, licensee, or permittee a final notice that the weed management and control program has not been implemented.

(3) This section may not be construed to interfere with the right of the owner of property adjacent to a navigable river or stream to control noxious weeds on the land adjacent to the navigable river or stream.

History: En. Sec. 2, Ch. 164, L. 2007; amd. Sec. 7, Ch. 472, L. 2009.

77-1-127. Department authorized to control weeds — billing for weed control. (1) If the lessee, licensee, or permittee fails to take corrective action or if a request for an administrative hearing is not made within the time specified in the notice, the department may enter state land covered by the lease, license, or permit and institute appropriate weed control measures. The department may enter into an agreement with a commercial applicator, as defined in 80-8-102, or with the appropriate weed management district organized under 7-22-2102 to control the weeds. The commercial applicator or the weed management district shall agree to carry any insurance required by the department.

(2) The department shall submit a bill to the lessee, licensee, or permittee itemizing the hours of labor, material, and equipment time and listing the actual total cost incurred by the department to take the weed control measures, together with a penalty not exceeding 50% of the total cost. The bill must specify and order a payment due date of 30 days from the date the bill is sent. If payment is not received within 30 days, the department may cancel the lease, license, or permit. Money recovered under this section must be placed in the trust land administration account established in 77-1-108, except that penalties collected must be distributed annually to the trusts for the lands on which the weed control action was taken.

(3) If a person receiving an order to take corrective action requests an administrative hearing, the department may not institute control measures until the matter is finally resolved, except in case of an emergency. In an emergency, the person is liable for department costs allowed by this section only to the extent determined appropriate by the director or the court that finally resolves the matter.

(4) This section may not be construed to interfere with the right of the owner of property adjacent to a navigable river or stream to control noxious weeds on the land adjacent to the navigable river or stream.

77-1-128. Administrative hearings. (1) A person adversely affected by any notice, action, or order of the department may, within the timeframe stated in the notice of noncompliance provided for in 77-1-126, request an administrative hearing before the director or the director's designee. The director or the director's designee shall hold a hearing within 30 days of the request. Participants may be represented by legal counsel. The director or the director's designee shall make a record of the proceeding and enter an order and findings within 30 days after the hearing.

(2) Within 30 days after the director or the director's designee renders an order and findings, the person adversely affected may file a petition in district court requesting that the order and findings be set aside or modified. The court may affirm, modify, or set aside the order complained of, in whole or in part.

An application must be accompanied by:

(a) an application fee of $50;

(b) a notarized affidavit:

(i) demonstrating that the applicant or the applicant's predecessor in interest used the right-of-way applied for before 1997 and that the use has continued to the present;

(ii) describing the purpose for which the right-of-way was used before 1997; and

(iii) demonstrating that the historic right-of-way applied for is the right-of-way demonstrated in the evidence provided in subsection (1)(c); and

(c) (i) aerial photographs taken by an agency of the United States demonstrating use of the right-of-way applied for; or

(ii) other evidence of the use of the right-of-way applied for.

(2) The department shall review an application and other evidence submitted pursuant to subsection (1) and shall issue a historic right-of-way deed in the name of the applicant if:

(a) the applicant pays the application fee provided in subsection (1)(a) and the fair market value of the historic right-of-way as provided in subsection (4);

(b) the applicant has shown by substantial evidence the matters required in subsections (1)(b) and (1)(c)(i) or (1)(c)(ii);

(c) the department has, if necessary, made a field inspection of the right-of-way applied for; and

(d) the deed is approved by the board.

(3) A historic right-of-way deed issued in the name of the applicant must contain the description of the property of the applicant to which it is appurtenant as provided in the application, and the right-of-way must thereafter be considered appurtenant to that dominant estate. A deed may be assigned by the applicant to the applicant's successor in interest with the approval of the department. The department may not withhold approval for any reason other than that the use of the historic right-of-way is contrary to subsection (5).

(4) (a) At the time of issuing the historic right-of-way deed, the department shall collect from the applicant the full market value of the acreage of the historic right-of-way.

(b) The amount collected pursuant to subsection (4)(a) must be deposited in the appropriate trust fund established for receipt of income from the land over which a historic right-of-way is granted.

(5) If application is made in accordance with this section, a historic right-of-way deed must be issued by the department, subject to the approval of the board, on the following terms:

(a) the right-of-way is only for the minimum width necessary, as negotiated by the department and the applicant; and

(b) the right-of-way is only for the physical condition of the road or utility facilities existing on the date the historic right-of-way deed is issued by the department.

(6) Issuance of a historic right-of-way deed pursuant to this section is exempt from the requirements of Title 22, chapter 3, part 4, and Title 75, chapter 1, parts 1 and 2.

(7) The survey requirements of 77-2-102 may be waived by the department for the issuance of a historic right-of-way deed if the department determines that there is sufficient information available to define the boundaries of the right-of-way for the purposes of recording the easement.

(8) The department may attach conditions to a historic right-of-way deed necessary to ensure compliance with this chapter.

(9) For the purposes of this section, "historic right-of-way deed" means a document issued by the department granting to the applicant a nonexclusive easement over state land. *(Terminates October 1, 2025—secs. 2 through 7, Ch. 325, L. 2011.)*

All selections shall as far as possible be in legal subdivisions. In the selection and location of these lands, careful attention shall be given to the water available and which may be appropriated for these lands for domestic use, livestock, and irrigation.

77-1-402. Basis for classification or reclassification. (1) The classification or reclassification shall be so made as to place state land in the class which best accomplishes the powers and duties of the board as specified in 77-1-202 and 77-1-203. When state lands are classified or reclassified in accordance with these duties and responsibilities, special attention shall be paid to the capability of the land to support an actual or proposed land use authorized by each classification.

(2) It is the duty of the department to classify or reclassify state lands so that no state land will be sold, leased, or used under a different classification from that to which it actually belongs.

77-1-403. Capability inventory. A capability inventory shall be made prior to changing the classification of state lands. Such inventory shall include, when appropriate to the classification, information on soils capability, vegetation, wildlife use, mineral characteristics, public use, aesthetic values, cultural values, surrounding land use, and any other resource, zoning, or planning information which is related to the classification.

77-1-404. Records of state lands. All field books, plats, maps, and records of the department shall show the class to which each tract therein belongs and whether it belongs to the public schools of the state or to a state institution or other entity according to the grant or instrument by which title to the land has passed to the state. They shall also show whether or not the coal or other minerals in the land are reserved by the United States and shall contain any other information the department considers necessary.

77-1-405. Island parks established — development limited. (1) In order to retain the integrity of the recreational experience associated with Montana's river and lake islands, development of undisputed state-owned or state-leased island property, which is hereby designated as island parks, including islands designated as state property under 70-18-203, lying within and surrounded by a navigable river, stream, or lake is limited, after April 30, 1997, to:

(a) the installation of minimal signage indicating that the island is a designated island park in which development has been limited and encouraging the public to help in maintaining the island park's primitive character by packing out trash;

(b) necessary latrine facilities if approved by the fish, wildlife, and parks commission;

(c) footings or pilings necessary for the construction of a bridge; and

(d) oil and gas leasing.

(2) Improvements made to and agricultural operations on state-owned or state-leased island property prior to April 30, 1997, may be maintained or continued, but further development is limited as provided in this section.

(3) Notwithstanding the provisions of 77-1-203 regarding multiple-use management, the legislature finds that the highest and best use of island property administered as school trust land, except islands designated as natural areas pursuant to Title 76, chapter 12, is for recreation and grazing and that those islands should be left in as primitive state as possible to protect from the loss of potential future revenue that could result from the failure to leave the islands in an undeveloped condition.

(4) For purposes of this section, state ownership or state lease of island property is disputed if the dispute arises before, on, or after April 30, 1997.

History: En. Sec. 1, Ch. 449, L. 1997.

Part 5
State Land Equalization

77-1-501. List of state lands by county. The department shall, before the first Monday of April of every year, prepare and transmit a statement to the department of revenue that designates each county in which the state has real property in excess of 6% of the total land area of the county and from which the state derives grazing, agricultural, or forest income. The statement must contain the total number of acres owned by the state in that county and list the acres separately as grazing, agricultural, or forest land.

History: En. Sec. 1, Ch. 235, L. 1967; amd. Sec. 54, Ch. 391, L. 1973; amd. Sec. 77, Ch. 428, L. 1973; R.C.M. 1947, 81-1115; amd. Sec. 140, Ch. 27, Sp. L. November 1993.

77-1-502. Computation of state land equalization amount. (1) The department of revenue shall compute the amount of taxes that would be payable on the county assessments of state-owned grazing, agricultural, or forest property as if it were owned by and taxable to a taxpayer of the county.

(2) If the land is not classified, the sum must be determined by the average tax payment made on like property within the county in which the land is situated, not to exceed 12 cents per grazing acre, 35 cents per agricultural acre, and 12 cents per forest acre. The average tax may be derived from the most recent biennial report of the department of revenue. The total figure arrived at by this method must be called the gross assessment figure.

(3) The county exemption factor must be determined by dividing the percentage that the state-owned land bears to the total land area of the county into 6%. This quotient must be multiplied by the gross assessment figure, and the product is called the state exemption figure.

(4) The state exemption figure must be subtracted from the gross assessment to give the state land equalization amount.

77-1-503. Form to be completed by department of revenue. The department shall provide a form for each county to be followed and completed by the department of revenue. The department of revenue shall, before October 1, make the computations required and submit to the department the completed forms, which must show the computations and method used in arriving at the state land equalization amount.

History: En. Sec. 3, Ch. 235, L. 1967; amd. Sec. 56, Ch. 391, L. 1973; amd. Sec. 78, Ch. 428, L. 1973; R.C.M. 1947, 81-1117; amd. Sec. 141, Ch. 27, Sp. L. November 1993; amd. Sec. 201, Ch. 574, L. 2001.

77-1-504. Processing of statements. The department shall examine for accuracy the statement returned by the department of revenue, and the state land equalization amount may not be approved unless the state exemption figure is deducted from the gross assessment figure in the statement. The department shall, before November 1 of each year, prepare and file a claim with the department of administration for all counties that are eligible for state land equalization amounts, and this claim must show the amount of money that each eligible county receives through the entitlement share provided for in 15-1-121.

Development of State Lands

77-1-601. Statement of policy. (2) In order to increase the volume of timber sold at the earliest possible time while continuing to meet the requirements of applicable state and federal laws and in order to avoid unnecessary delays and extra costs that would result from increasing its permanent staff, the department may contract for services that will enable achievement of the purposes of this section and that will achieve the highest net return to the trusts.

(3) The department may contract with the department of fish, wildlife, and parks for the distribution and sale of recreational use licenses through the license agents appointed by and the administrative offices of the department of fish, wildlife, and parks and in accordance with the provisions of Title 87, chapter 2, part 9.

77-1-804. Rules for recreational use of state lands — penalty. (1) The board shall adopt rules authorizing and governing the recreational use of state lands allowed under 77-1-203. The board shall use local offices of the department to administer this program whenever practical.

(2) Rules adopted under this section must address the circumstances under which the board may close legally accessible state lands to recreational use. Action by the board may be taken upon its own initiative or upon petition by an individual, organization, corporation, or governmental agency. Closures may be of an emergency, seasonal, temporary, or permanent nature. State lands may be closed by the board only after public notice and opportunity for public hearing in the area of the proposed closure, except when the department is acting under rules adopted by the board for an emergency closure. Closed lands must be posted by the lessee at customary access points, with signs provided or authorized by the department.

(3) Closure rules adopted pursuant to subsection (2) may categorically close state lands whose use or status is incompatible with recreational use. Categorical or blanket closures may be imposed on state lands due to:

(a) cabin site and home site leases and licenses;

(b) the seasonal presence of growing crops; and

(c) active military, commercial, or mineral leases.

(4) The board shall adopt rules that provide an opportunity for any individual, organization, or governmental agency to petition the board for purposes of excluding a specified portion of state land from a categorical closure that has been imposed under subsection (3).

(5) Under rules adopted by the board, state lands may be closed on a case-by-case basis for certain reasons, including but not limited to:

(a) damage attributable to recreational use that diminishes the income-generating potential of the state lands;

(b) damage to surface improvements of the lessee;

(c) the presence of threatened, endangered, or sensitive species or plant communities;

(d) the presence of unique or special natural or cultural features;

(e) wildlife protection;

(f) noxious weed control; or

(g) the presence of buildings, structures, and facilities.

(6) Rules adopted under this section may impose restrictions upon general recreational activities, including the discharge of weapons, camping, open fires, vehicle use, and any use that will interfere with the presence of livestock. The board may also by rule restrict access on state lands in accordance with a block management program administered by the department of fish, wildlife, and parks. Motorized vehicle use by recreationists on state lands is restricted to federal, state, and dedicated county roads and to those roads designated by the department to be open to motorized vehicle use.

(7) The board shall adopt rules providing for the issuance of a recreational special use license. Commercial or concentrated recreational use, as defined in 77-1-101, is prohibited on state lands unless it occurs under the provisions of a recreational special use license. The board may also adopt rules requiring a recreational special use license for recreational use that is not commercial, concentrated, or within the definition of general recreational use.

(8) For a violation of rules adopted by the board pursuant to this section, the department may assess a civil penalty of up to $1,000 for each day of violation. The board shall adopt rules providing for notice and opportunity for hearing in accordance with Title 2, chapter 4, part 6. Civil penalties collected under this subsection must be deposited as provided in 87-1-601(8).

The department may impose restrictions it considers necessary to coordinate the uses of state trust land or to preserve the purposes of the various trust lands. Hunting, fishing, and trapping on state trust land must be conducted in accordance with rules and provisions provided in this part.

(2) An agreement may be issued to the department of fish, wildlife, and parks for a term of up to 10 years. Through this agreement, the board shall recover for the beneficiaries of the trust the full market value for the use and impacts associated with hunting, fishing, and trapping on legally accessible state trust land. The department may use funds appropriated from the trust land administration account provided for in 77-1-108 to implement and manage the agreement. Part 9
Commercial Leasing of State Trust Land

77-1-901. Declaration of policy and purpose. (1) Pursuant to Article X of the Montana constitution, the legislature declares that it is the policy of the state that state trust land is to be treated as a sacred trust and is subject to fiduciary principles in its management. It is the intent of the legislature that state trust land be managed in the best financial interest of current and future individual beneficiaries for whom this land is managed and held.

(2) A purpose of this chapter is to implement Article X of the Montana constitution. To fulfill its commitment to the management of state trust land in the best long-term financial interests of the beneficiaries, the Montana legislature finds that the state can prudently maximize the long-term revenue accruing to the beneficiaries by issuing commercial leases on land where the chief value exists in its use for commercial purposes.

History: En. Sec. 1, Ch. 404, L. 2003.

77-1-902. Definitions. As used in this part, unless the context requires otherwise, the following definitions apply:

(1) "Cancellation" means the cessation of a lessee's possessory rights and privileges under a lease due to the lessee's breach of some term of the lease, applicable statutes, or applicable administrative rules.

(2) "Commercial lease" means a contract to use state trust land for a commercial purpose.

(3) (a) "Commercial purpose" means an industrial enterprise, retail sales outlet, business and professional office building, warehouse, motel, hotel, hospitality enterprise, commercial or concentrated recreational use, multifamily residential development, and other similar business.

(b) The term does not include the following uses:

(i) agriculture;

(ii) grazing;

(iii) exploration or development of oil and gas, mineral, and geothermal resources;

(iv) single-family residences, home sites, and cabin sites; and

(v) utility rights-of-way.

(4) "Termination" means the automatic completion or ending of the term of a contract according to its provisions. Upon termination, the lessee ceases to have any possessory rights or privileges under a lease.

History: En. Sec. 2, Ch. 404, L. 2003.

77-1-903. Authority of board to determine development. The board shall determine how the development of state trust land for commercial purposes is to proceed before any state trust land is offered for lease. In making this determination, the board may consider the following factors:

(1) the purpose of any development or development plan;

(2) the allocation and location of specific uses of the land, including residential, commercial, industrial, recreational, or other appropriate uses;

(3) the densities and intensities of designated land uses;

(4) the timing and rate of development; and

(5) the timely delivery of adequate facilities and services, including water, wastewater collection and treatment systems, parks and public recreational facilities, drainage facilities, school sites, roads, and transportation facilities.

History: En. Sec. 3, Ch. 404, L. 2003.

77-1-904. Commercial leasing authorized. (1) State trust land may be leased for a term not to exceed 99 years for commercial purposes to the highest and best bidder responding to a department request for proposals for commercial uses of a specified tract.

(2) The board may enter into contracts with lessees of state trust land for commercial purposes upon terms and conditions that the board may reasonably determine to be in the best interests of the beneficiary.

(3) A request for proposals for the commercial leasing of state trust land must reserve the board's right to reject any and all bids and the right to reoffer the tract for lease if the bids received are not acceptable to the board.

(4) The board and the department, when preparing plans or proposals under this part, shall implement review criteria in consideration of the following local government provisions except to the extent that the provisions violate Article X, section 4 or 11, of the Montana constitution:

(a) a growth policy or a neighborhood plan adopted pursuant to Title 76, chapter 1;

(b) zoning regulations;

(c) subdivision review as provided in Title 76, chapter 3;

(d) annexation;

(e) plans for the extension of services; and

(f) other actions related to local planning.

History: En. Sec. 4, Ch. 404, L. 2003; amd. Sec. 2, Ch. 335, L. 2005.

77-1-905. Rental provisions for commercial leasing — payments and credits — administration — lease options. (1) The first year's annual rental payment for state trust land leased for commercial purposes must be paid by cashier's check, and payment is due upon execution of the lease. The department may require the lessee of state trust land for commercial purposes to pay the department's cost of the request for proposals process, including publication and other reasonable expenses. Failure to pay the first year's rental at the time of lease execution must result in the cancellation of the lease and forfeiture of all money paid. In the event of cancellation or in the event that the successful proposer is offered and does not accept the lease, the board may enter into negotiations with other persons who submitted a proposal for commercial purposes in response to the department request for proposals on that tract.

(2) The board shall specify in any commercial lease an annual rental equal to the full market rental value of the land. The annual rent may not be less than the product of the appraised value of the land multiplied by a rate that is 2 percentage points a year less than the rate of return of the unified investment program administered by the board of investments pursuant to 17-6-201. The rate of return from the unified investment program used in this subsection must be determined no less than 30 days prior to the execution of the competitive bid. A commercial lease may include a rental adjustment formula established by the board that periodically adjusts the annual rent provided for in the lease at frequencies specified in the lease. The board may allow a credit against the annual rent due for payments made by the lessee on behalf of the state of Montana for construction of structures and improvements, special improvement district assessments, annexation fees, or other city or county fees attributable to the state's property interest in land leased for commercial purposes. The board may accept as lawful consideration in-kind payments of services or materials equal to the full market value of the rent calculated to be owed on any commercial lease. A lease issued under this part may include an amortization schedule to be used to determine the value to the lessee of improvements when the lease is terminated.

(3) The department may use funds appropriated from the trust land administration account provided for in 77-1-108 to contract with realtors, property managers, surveyors, legal counsel, or lease administrators to administer the commercial lease, either singly or in common with other leases, or to provide assistance to the department in the administration of commercial leases.

(4) In anticipation of entering into a commercial lease, the board may issue an option to lease at a rental rate that the board determines to be appropriate. An option to lease may not exceed a term of 2 years. An option to lease may not be construed to grant a right of immediate possession or control over the land but may only preserve the optionholder's exclusive right to obtain a commercial lease on the land in the future.

History: En. Sec. 5, Ch. 404, L. 2003; amd. Sec. 9, Ch. 247, L. 2007; amd. Sec. 18, Ch. 465, L. 2009.

77-1-906. Requirements for commercial lease — improvements. (1) The board shall require, subject to the board's supervision and jurisdiction, that the lessee be solely responsible for the expense of maintenance and operation of the enterprise, business, or venture and all improvements made and constructed in support of any commercial purpose during the term of the lease. This requirement does not apply to the installation and construction by the lessee of infrastructure and improvements, such as public roads, parks, sewers, or utilities, if they were required by a local government as a condition of development.

(2) Upon expiration of the lease, the title to all permanent improvements and fixtures located on the leased property and used in the operation and maintenance of the enterprise vests in the state. The lease must describe in detail the manner and subject matter of the transfer to the state.

History: En. Sec. 6, Ch. 404, L. 2003.

77-1-907. Qualifications for commercial lessees — bonds. (1) Before accepting any offer for a commercial lease, the board shall establish, to its satisfaction, the financial capability of the person seeking the commercial lease and the legal authority of the person to conduct business in the state. Prior to executing a commercial lease, the board may require the posting of bonds, sureties, guarantees, or a letter of credit sufficient to ensure that the commercial purposes will be conducted as proposed with no harm to the financial interests of the beneficiaries.

(2) All commercial leases of which the commercial purpose includes the use of a hazardous substance as defined in 75-10-602 must be bonded to ensure a degree of cleanup of the hazardous substance that ensures protection of public health, safety, and welfare and of the environment in a manner that protects the long-term financial interest of the beneficiaries.

History: En. Sec. 7, Ch. 404, L. 2003.

77-1-908. Land use license issuance following reclassification. Following cancellation of a preexisting lease due to a reclassification pursuant to 77-1-401 through 77-1-403, the department may issue a land use license for the commercial lands reclassified for a term the department considers necessary to protect the income to the trust and to protect the state.

History: En. Sec. 8, Ch. 404, L. 2003.

77-1-909. Cancellation or termination of commercial lease. A commercial lease may be canceled at the option of the board or its designated representative for any violation of a lease provision. Upon cancellation or termination of a lease, the department may seek a new lessee in accordance with this part. If the costs of the commercial development have not been recovered by the state at the time of cancellation or termination, a subsequent lessee under this section shall reimburse the state for development costs, assessments, or fees only to the extent that the proportionate part of the costs, assessments, and fees to the state for obtaining the development have not been recovered.

History: En. Sec. 9, Ch. 404, L. 2003.

77-1-910. Encumbrance on leased land. (1) An encumbrance may not be placed upon the state's interest in land leased for commercial purposes.

(2) A commercial lease of state trust land may contain provisions that will permit the encumbering of the lessee's interest in the lease by mortgage or deed of trust.

History: En. Sec. 10, Ch. 404, L. 2003.

77-1-911. Notice and payment of assessments. (1) The lessee of a commercial lease on state trust land shall furnish to the department:

(a) officially certified descriptions of all state trust land included within the boundaries of a city or county improvement district that is the subject of the commercial lease; and

(b) a description and listing of the amount of assessments and charges of every character made against the leasehold interest of the lessee and the leasehold interest of the state, as soon as the assessments or charges are levied.

(2) A promise by the lessee to make timely payment of all assessment charges and an acknowledgment of the assessment must be inserted in any lease for state trust land.

(3) If assessments have been levied against any state trust land prior to commercial lease, the board shall require that all unpaid installments on assessments be paid to the improvement district before executing a lease.

(4) If an installment on an assessment or charge against the leasehold interest of the lessee of land subject to a commercial lease is not paid when due, the nonpayment constitutes a breach of the lease.

History: En. Sec. 11, Ch. 404, L. 2003.

77-1-912. Rulemaking. The board may adopt rules to:

(1) establish procedures for the issuance of requests for proposals for commercial purposes and the commercial leasing of state trust land;

(2) prescribe the form and content of commercial leases; and

(3) develop any other procedures necessary to fulfill the purposes of this part or to implement the commercial leasing of state trust land.

Part 10
Management of Crown Butte Land Exchange Property Interests

77-1-1001. Inventories and assessments. (1) The department may, in consultation with appropriate state agencies and the Northern Cheyenne tribe, conduct resource inventories and assessments of all or parts of the property interests acquired from the federal government in the Crown Butte land exchange to assist in the leasing, promotion, and development of those property interests. Those inventories and assessments include but are not limited to:

(a) cultural resource inventories and assessments;

(b) coal resource inventories and assessments;

(c) market analysis of the mineral resources; or

(d) any other inventories and assessments required by law or that the department determines are necessary.

(2) The department may place all or parts of the property interests acquired from the federal government in the Crown Butte land exchange up for lease in accordance with the procedures provided for in Title 77.

(3) Nothing in this section prevents the department from receiving applications to place the tracts for lease prior to the completion of inventories and assessments, and the department may lease the property interests acquired from the federal government in the Crown Butte land exchange in accordance with the applicable provisions of Title 77.

77-1-1109. Legislative findings — purpose. (1) The legislature finds that:

(a) Article IX, section 3, of the Montana constitution provides that the use of all water that is or may be appropriated for sale, rent, distribution, or other beneficial use, the right-of-way over the lands of others for all ditches, drains, flumes, canals, and aqueducts necessarily used in connection with the beneficial use, and the sites for reservoirs necessary for collecting and storing water are a public use;

(b) a person who has historically used the bed of a navigable river in conjunction with a legal use of water or for other uses or a person who desires to use the bed of a navigable river in conjunction with a legal use of water or for other uses must be able to do so provided that statutory provisions are met; and

(c) any person who uses the bed of a navigable river after October 1, 2011, shall apply to the state for a lease, license, or easement and pay full market value for the use of the riverbed.

(2) The purpose of this part is to clarify the process for the use of the beds of navigable rivers and how the state should be compensated for that use.

(3) Nothing in this part diminishes the state's ownership of the beds of navigable rivers, streams, or lakes under any other law.

77-1-1112. Historic use of navigable riverbeds — authorization required — exemptions. (1) A person using the bed of a navigable river below the low-water mark without written authorization from the department prior to October 1, 2011, who wants to continue use of the bed of a navigable river after October 1, 2011, shall file for authorization of the use on a form prescribed by the department for a lease, license, or easement by July 15, 2017.

(2) A person using the bed of a river below the low-water mark without written authorization from the department who wants to continue use of the bed after the date the river is determined to be a navigable river shall file for authorization of the use on a form prescribed by the department for a lease, license, or easement within 5 years after the date that notice is issued by the department as provided in 77-1-1114.

(3) The application must include:

(a) an application fee of $50;

(b) a notarized affidavit:

(i) demonstrating that the applicant or the applicant's predecessor in interest used the bed of a navigable river and that the use continues;

(ii) describing the acreage covered by the footprint prior to October 1, 2011, or, for applications under subsection (2), the acreage covered by the footprint prior to the date the river was determined to be navigable; and

(iii) demonstrating that the use applied for under this section is the use shown in the evidence provided in subsection (3)(c); and

(c) (i) aerial photographs demonstrating the use to which the application for authorization applies; or

(ii) other evidence of the use to which the application for authorization applies.

(4) The department shall issue the authorization for a lease, license, or easement if:

(b) the applicant pays the application fee and the full market value of the footprint acreage;

(c) the department has, if necessary, made a site inspection of the use to which the application for authorization applies;

(d) the authorization is for only the acreage of the footprint historically used by the applicant or the applicant's predecessor in interest; and

(e) the authorization is approved by the board.

(5) Proceeds from the application fee must be deposited in the account in 77-1-1113 and must be used by the department to administer the provisions of this section.

(6) The full market value collected pursuant to subsection (4)(b) must be deposited in the appropriate trust fund established for receipt of income from the land over which an authorized use is granted.

(7) Issuance of an authorization pursuant to this section is exempt from the requirements of Title 22, chapter 3, part 4, and Title 75, chapter 1, parts 1 and 2.

(8) The department shall waive the survey requirements of 77-2-102 if the department determines that there is sufficient information available to define the boundaries of the proposed use for the purposes of recording the easement or issuing a license or lease.

(9) The requirements of this section do not apply to footprints:

(a) related to hunting, fishing, or trapping;

(b) that existed prior to November 8, 1889;

The state may not impede access to a footprint or use of a footprint during the applicable timeframe or after a lease, license, or easement is obtained.

(2) An applicant for authorization to use the bed of a navigable river pursuant to 77-1-1112 or for a lease, license, or easement under this section may challenge the requirement of the authorization based on the navigability of the river, the location of the footprint related to the low-water mark, or other factors. 77-2-102. Application for easement. (1) Application for an easement on state land must be made to the department. Except as provided in subsections (3) through (5), the application must describe the proposed right-of-way according to survey, show the necessity for the proposed highway or street or other easement, and give any additional information that the department requires.

(2) This application must be accompanied by two exact copies of the official plat of the proposed highway, street, or other easement, verified by the affidavit of the engineer or surveyor who prepared the application. These plats must show the quantity of land taken by the proposed highway or street or other easement for each 40-acre tract or government lot of state land over or through which it passes and also the amount of land remaining in each portion of that 40-acre tract or government lot. When considered necessary by the department, these plats must show all these facts for smaller subdivisions as the circumstances may render desirable for the state.

(3) The application must include the affidavit of a licensed engineer or professional surveyor stating that the methodology used is known to be accurate to within 5 meters. The survey must be tied to an established section corner or 1/4 corner monument. The department may request greater accuracy if the department determines that the information is needed to adequately describe the easement.

(4) If the purpose of the right-of-way applied for is the transmission or distribution of electrical energy or the construction and operation of pipelines or telephone, telegraph, or radio systems, the plats and measurements need not be given. An exact geographical survey is not required, but the application must include the description of the location of the center line of the right-of-way that refers to an established monument within a filed corner recordation form, certificate of survey, or subdivision plat. The accuracy requirements of subsection (3) must be met. The entire right-of-way may be applied for in one application with only one plat of the entire right-of-way required. An archaeological survey is not required if, in the opinion of the department, heritage property would not be impacted.

(5) (a) If the purpose of the right-of-way applied for is a regional water authority provided for in Title 75, chapter 6, part 3, the plats and measurements need not be given. An exact geographical survey is not required, but the application must include the description of the location of the center line of the right-of-way.

(b) The application provided for in subsection (5)(a) must be accompanied by electronic global positioning system data in the Montana coordinate system, easement location depicted on a topographical map to a scale of 1:24,000, easement coordinates, and the quantity of land taken in each quarter-quarter section.

77-2-103. Processing of application. (1) Upon the filing of an application and plats, the department shall, whenever it considers it necessary, examine the proposed right-of-way and report its findings to the board. The board shall consider the application and report and take any action it considers proper, including the fixing of compensation and damages to be paid to the state. The compensation must be the full market value of the estate or interest disposed of through the granting of the right-of-way easement, and the damages must be the actual damages resulting to the remaining land as nearly as they can be ascertained. If the right-of-way is granted according to the plat, the plat is the official plat of the right-of-way and must be retained in the office of the department.

(2) If the state land over or through which a right-of-way is applied for is under certificate of purchase or sales contract, the purchaser or the purchaser's assignee must be made a party to

the proceedings and the purchaser's or assignee's consent in writing to the laying out and establishment of the proposed highway, street, or other easement and to the amount of compensation and damages to be paid must be filed with the board before the right-of-way is granted. The board is the judge of how much compensation and damages must be paid to the state and applied on the certificate of purchase or sales contract and of how much, if any, must be paid to the purchaser, as the circumstances in each individual case warrant. This subsection applies to all grants of rights-of-way on state lands.

(3) If the purpose of the right-of-way applied for is a regional water authority provided for in Title 75, chapter 6, part 3, the provisions of 77-2-351 related to public entities apply.

77-2-107. Involvement of lessee when land subject to prior lease. (1) Whenever any kind of right-of-way easement has been granted under this part and the state land in which it is granted is under lease, the party receiving the grant shall give timely notice to the lessee and shall make just settlement with the lessee for any damages resulting to the lessee's improvements, crops, or leasehold interests.

(2) After the settlement is made, the lessee shall open or move any fences that may obstruct the right-of-way over the lands under lease and otherwise cooperate in the opening of the right-of-way. Proof must be filed with the board that the settlement has been made before the deed to the easement is issued.

(3) (a) If the lessee and the party receiving the right-of-way easement are unable to agree on the value of the damages resulting from the easement, the value of the damages must be ascertained and fixed by three arbitrators, one of whom must be appointed by the lessee, one by the party receiving the easement, and the third by the two appointed arbitrators.

(b) If a party refuses to appoint an arbitrator within 15 days of being requested to do so by the director of the department, the director may appoint an arbitrator for that party. An arbitrator appointed by the director has the same duties and powers as if appointed by one of the parties.

(c) The arbitrators may fix reasonable compensation for their services. The compensation must be paid in equal shares by the owner of the easement and the lessee.

(d) The value of the damages as ascertained and fixed by the arbitrators is binding on both parties; however, if either party is dissatisfied with the valuation, the party may, within 10 days, appeal from their decision to the department. The department shall examine the easements, and, except as provided in subsection (3)(e), its decision on the appeal is final. The department shall collect the actual cost of the reexamination from the owner of the easement and the lessee in the proportion that, in its judgment, justice may demand.

(e) If either party is dissatisfied with the valuation fixed by the department, the party may within 30 days after receipt of the department's decision petition the district court in the county in which the majority of the state land is located or the district court in Lewis and Clark County for judicial review of the decision.

Authority of Board to exchange land, Art. X, sec. 4, Mont. Const.

77-2-201. Exchange of land with United States or tribal governments. (1) (a) The board may enter into contracts or agreements with the United States or any department thereof having jurisdiction for the waiving and relinquishment to the United States of any rights of the state in and to sections 16 and 36 of any township and to any other parcel of state lands, provided that the state shall, in lieu of the rights so waived and relinquished, receive from the United States other lands of equal or greater value.

(b) The current user of the land transferred to the United States may continue to enjoy the use of the land under terms and conditions required by the federal government and in accordance with Public Law 88-607, as amended, (43 U.S.C. 1411 through 1418), and the current user of the land received from the United States may continue to utilize the land on the terms and conditions imposed by law or by the board.

(2) The board may enter into a contract or agreement with a tribal government as defined in 18-11-102 or with the United States for the relinquishment to the tribal government or to the United States in trust for the tribal government of any rights of the state to some or all state lands located wholly within the exterior boundaries of the tribal government's reservation as recognized by the federal government; however, the state, in exchange for these relinquished rights, must receive from the tribal government or the United States lands of equal or greater value. No contract or agreement may be entered into under this section without first consulting with the board of county commissioners of the county or counties in which the lands to be exchanged are located.

77-2-203. Exchange for nongovernment, state government, and other state and local public entity land. (1) Subject to subsection (2), the board is authorized to exchange state land for land owned by:

(a) the state or an agency of the state;

(b) a political subdivision of the state, including a county, city, town, public corporation, or district created pursuant to state law;

(c) any other public body of the state; or

(d) a nongovernmental entity, including but not limited to an individual, association, partnership, or corporation.

(2) The board may exchange the land described in subsection (1) if the land is of equal or greater value, as determined by the board after appraisal by a qualified land appraiser, than the state land and as closely as possible equal in area. The contents of the appraisal must be made available to any person who makes a written request to the board. The board shall place priority on exchanges that result in consolidation of state lands into more compact bodies. This section does not apply to exchanges undertaken under 76-12-107.

(3) If the requirements of 77-2-204 and subsections (1) and (2) of this section are met, state lands bordering on navigable lakes and streams or other bodies of water with significant public use value may be exchanged for nongovernment-owned land if the nongovernment-owned land borders on similar navigable lakes, streams, or other bodies of water.

History: En. Sec. 1, Ch. 472, L. 1975; R.C.M. 1947, 81-307(1), (3); amd. Sec. 2, Ch. 136, L. 1983; amd. Sec. 1, Ch. 287, L. 1985; amd. Sec. 1, Ch. 139, L. 2001.

77-2-204. Notification of proposed exchange — hearing. (1) Upon receipt of a proposal for an exchange of land under this part, the board shall give notice of the proposed exchange by certified mail to each person who has leased, under chapter 1 of this title, any portion of land involved in the proposed exchange. Any such leaseholder may present written or oral comments on the proposed exchange to the board before or during the hearing required by subsection (2). The notice must contain a statement informing the recipient of this right to comment.

(2) A public hearing on any exchange under this part shall be held in the county containing the state land to be exchanged. When specific objections to the proposed exchange are raised before or during any such hearing pursuant to subsection (1), the board shall make findings of fact responding to such objections and explaining their action.

History: En. Sec. 1, Ch. 472, L. 1975; R.C.M. 1947, 81-307(2); amd. Sec. 2, Ch. 287, L. 1985.

77-2-205. Restriction on exchange for nongovernment-owned land. An exchange for nongovernment-owned land under 77-2-203 may not be made that will induce or encourage large-scale commercial, industrial, or residential development unless the development value is considered in determining the fair market value and unless the proposed development will not adversely affect the resources of the existing state tracts or those tracts that the state would receive under the proposed exchange.

History: En. Sec. 1, Ch. 472, L. 1975; R.C.M. 1947, 81-307(4); amd. Sec. 2, Ch. 139, L. 2001.

77-2-206. Settlement for improvements. If any state land is exchanged on which there are improvements belonging to a lessee and some person other than the lessee is the transferee, that person shall settle with the lessee for all improvements on the land belonging to the lessee before the exchange is completed. The provisions of 77-6-301 through 77-6-303 and 77-6-306 relating to the payment and settlement for improvements on state lands between a former lessee and a new lessee apply to the settlement between a lessee and the transferee in an exchange. If settlement is not reached within 6 months of the date of exchange, all improvements become the property of the state unless the department for good cause shown grants both parties additional time in which to exhaust arbitration.

History: En. Sec. 4, Ch. 287, L. 1985; amd. Sec. 3, Ch. 270, L. 2001.

77-2-207. Approval or disapproval of exchanges. All exchanges of state lands are subject to approval and confirmation by the board, and no exchange is considered completed until after such approval and confirmation. The board has the power and it is its duty to disapprove any exchange which in its opinion would be disadvantageous to the state.

History: En. Sec. 3, Ch. 287, L. 1985.

77-2-208 through 77-2-210 reserved.

77-2-211. Exchange of timbered, cut-over, or burned-over lands. The board may accept on behalf of the state title in fee simple to any timbered lands or lands from which the timber has been cut or burned and in exchange may convey lands not to exceed an equal value, as determined by the board after appraisal by a qualified land appraiser, of similar state land. However, an exchange may not be made unless the exchange, in the opinion of the board, will benefit the public interest. For the purpose of an exchange, all state lands, including those referred to in 77-2-303(2), 77-2-311, and 77-5-101, are subject to be offered for exchange, and any restrictions against their sale or disposal are, for the purpose of an exchange, released.

77-2-212. Rules. The board shall adopt and promulgate such rules and methods of procedure affecting or touching the exchanges of lands under 77-2-211 through 77-2-217 as in its judgment seems advisable to the end that the public interests may be conserved.

(2) The estimated fair market value must be determined by a Montana-licensed and Montana-certified appraiser.

(1) The department shall, as soon as it concludes its investigation thereof, report to the board the facts disclosed by its investigation and include in its report a recommendation concerning the proposal, including its reasons therefor in writing.

(2) After considering the report and recommendation and making such further investigation as it considers advisable, the board shall consider the entire matter, make findings and conclusions concerning the proposal, and make an order:

(a) rejecting and dismissing the proposal if in the judgment of the board the exchange is not in the public interest; or

(b) accepting the proposal and ordering the exchange to be made if in the judgment of the board the exchange is in the public interest and should be made.

(3) An order accepting the proposal shall contain an accurate description of all lands to be exchanged.

Except to the extent that the following provisions violate Article X, section 4 or 11, of the Montana constitution, the board and the department shall consider the ordinances of the appropriate city or town or the resolutions of the appropriate county regarding:

77-2-315. Participation in irrigation districts — lien status of land. (1) A purchaser of state lands is authorized and empowered to sign any petition that the purchaser may desire to sign for the creation of an irrigation district and the inclusion of the land purchased from the state in the irrigation district and any other petition relating to irrigation districts affecting the land purchased by the person from the state. The petition or petitions have the effect of making all the interest that the person then has in the land purchased from the state and all interest that the person may subsequently acquire in the land subject to the same liens and charges as privately owned lands under the irrigation district. If for any reason the person's certificate to the state lands and the person's rights under the certificate are canceled and the certificate is reinstated or a new certificate is issued, the liens and charges are valid against the interest in the lands of the holder of the certificate.

(2) The board for and on behalf of the state of Montana may sign a petition for the inclusion of any lands belonging to the state in an irrigation district organized or to be organized for the purpose of cooperating with the United States under the federal reclamation laws or any act of congress relating to reclamation projects and to sign any petition for the execution of a contract between the district and the United States. The interest of the state in any lands within an irrigation district is not subject to assessment or taxation for any purpose, and the state is not liable for the payment of any costs or charges arising from the fact that its lands are included within an irrigation district.

(3) The interest of a purchaser of state lands in the land purchased is subject to the same liens as other real estate. However, in the case of sale, only the interest of the purchaser or of the assignee may be sold. In the case of any sale under the provisions of this section, including the sale for taxes, the purchaser shall succeed to all the rights of the purchaser from the state under the certificate of purchase and a new certificate of purchase must be issued to the person entitled to the certificate upon satisfactory proof being submitted to the board. In the case of sale under execution or court decree, the new certificate of purchase may not be issued by the board until the period of redemption from the sale has expired and the sheriff's deed has been issued. In the case of sale for taxes, the new certificate may not be issued until the tax deed has been issued.

77-2-329. Terms of payment. (1) A purchaser of state land shall pay on the day of sale that portion of the purchase price that the purchaser desires, but not less than 10% of the total sales price. If the balance on the purchase price is not an exact multiple of $25, the purchaser shall pay the additional sum that is necessary to reduce the balance to an even multiple of $25.

(2) The purchaser shall pay the balance of the purchase price within 30 days. The department may extend this deadline up to 30 additional days for good cause.

77-2-330. Computation of interest and payment schedule. The balance of the purchase price shall draw interest from the date on which the sale was confirmed and approved by the board, and all installments on principal and interest shall become due and payable on that date in each succeeding year until payment has been made in full.

History: En. Sec. 86, Ch. 60, L. 1927; re-en. Sec. 1805.86, R.C.M. 1935; R.C.M. 1947, 81-922.

77-2-331. Manner of making payments. (1) The department is not required to accept fractional payments of the installments on certificate of purchase on account of the complications arising from the division of payments.

(2) The purchaser may make payment of one or more installments before the same becomes due, but unless such payments are made at least 6 months before the installments become due, no reduction may be made in the interest payments. If installments on principal and interest are

paid more than 6 months prior to the due date, the interest from the date of such payment shall be figured upon the balance of the principal unpaid after the advance payment has been made up to the date on which it comes due.

(3) If for any reason any installment is not paid when due, the total of that installment, including payment on the principal and payment on interest, shall draw penalty interest at the rate of 6% per annum from the date due until the date actually paid.

(4) Payment may be made in full at any time before maturity by paying the balance on the principal and interest accrued up to the date of such payment.

History: En. Sec. 87, Ch. 60, L. 1927; re-en. Sec. 1805.87, R.C.M. 1935; amd. Sec. 63, Ch. 428, L. 1973; R.C.M. 1947, 81-923.

77-2-332. Procedure in case of default. (1) If a purchaser or assignee of state land defaults for a period of 30 days or more in the payment of any of the installments due on the certificate of purchase, the certificate is subject to cancellation. The department shall mail to the purchaser at the purchaser's last-known post-office address a notice of default and pending cancellation. The notice must give the purchaser 60 additional days from the date of mailing the notice in which to make payment of the delinquent installment or installments with penalty interest.

(2) If the purchaser fails to make the payment within 60 days, the certificate of purchase from that date and without further notice is void, the duplicate of the certificate in the office of the department must be canceled, and the land under the certificate reverts to and becomes the property of the state to the same extent as other state lands and must be open to lease and sale.

(3) All buildings, fences, and other improvements placed on the land subsequent to the date of execution of the certificate of purchase must be and remain the property of the purchaser named in the certificate of purchase or of the purchaser's heirs, assigns, or devisees and may be removed from the land at any time within 90 days after the date of the cancellation. If the buildings, fences, and other improvements are not removed prior to the expiration of the 90-day period, they become the property of the state.

(4) In case of cancellation of certificate of purchase or surrender of certificate of purchase and when the land is again open to lease, the former lessee has the prior right to lease the tract at the existing rate or at the rate set by competitive bidding if bidding occurs.

77-2-333. Reinstatement of canceled certificates of purchase. (1) In all cases in which a certificate of purchase of state lands has been canceled and annulled as provided by law and the lands under the certificate have not been resold to another purchaser, the board may in its discretion reinstate the canceled certificate upon:

(a) proper application made in writing by the original purchaser or the original purchaser's heirs, assigns, or devisees, filed within 1 year and 6 months from the cancellation;

(b) payment of all delinquent installments of principal and interest on the certificate, together with penalty interest at the rate of 6% a year upon all delinquent installments from the date due until the date of actual payment; and

(c) the furnishing of proof from the county treasurer showing that there are no tax liens against the land.

(2) This reinstatement does not have the effect of canceling any lease that the state may have issued on the land or affecting any of the provisions of the lease.

77-2-334. Assignment of certificate. Certificates of purchase may be assigned to a citizen of the United States or to a person who has declared an intention to become a citizen or to a corporation organized under the laws of this state. These assignments must be made on forms prescribed by the department, must be duly acknowledged as other conveyances of real estate, and must be executed in duplicate with one copy to be filed and retained in the office of the department and one copy to be retained by the assignee. A person is not qualified to receive an assignment if the lands that the person has already purchased from the state, together with the lands included in the assignment, exceed one section. The assignee must in all respects possess the same qualifications as an original purchaser.

This application must be accompanied by an affidavit from the owner of the certificate setting forth the facts in regard to the loss or unlawful withholding of the certificate and by a certificate from the county clerk and recorder of the county in which the land is located showing all instruments of record in the clerk and recorder's office affecting the title to the land under the certificate. 77-2-336. Lien on improvements and crops for amount due state. (1) The state has a lien prior and superior to all other liens, except thresher's liens and seed liens as specified in 71-3-701 and 71-3-801, that have priority, but only for the aggregate amount of the indebtedness then existing, including any advances made, interest due, and other charges, as evidenced by the original loan contract and indebtedness accumulating on that basis, exclusive of any other future advances originally contemplated. This lien is upon all buildings, structures, fences, and other improvements upon the land sold and upon all crops growing upon any of the land and also upon crops after they have been separated from the land for all due and delinquent installments of principal and interest and penalty interest and taxes under the certificate of purchase and also for all installments becoming due during the calendar year in which the crop is harvested, and this lien is expressly reserved.

(2) Any person purchasing or otherwise acquiring the improvements or crops or any part of the improvements or crops takes them subject to the lien.

(3) Any representative of the department or the sheriff of the county in which the land is located or the sheriff's deputy may demand of the purchaser or the purchaser's agent payment of the amounts due the state, and if they are not paid upon demand, the officer making the demand or any representative of the department may immediately seize the improvements and crops and, upon giving 3 days' notice, sell and dispose of, either at private or public sale, sufficient of the crops or improvements or of both to pay the amounts due the state, together with cost and expenses of seizure and sale.

Notwithstanding any other section in this chapter, any lands may be sold to or exchanged for other land or for other consideration with another public entity on terms and in a manner that the board, after consultation with the appropriate legislative committee, may determine to be in the state's best interest, subject to The Enabling Act and constitutional restrictions. In the case of land that is not granted to or held by the state in trust for the support of the common schools, for a state institution, or for another specific purpose, the board may accept as partial or total consideration for the transfer of the land a binding commitment by the transferee to use the property to provide a community service or a benefit that fulfills a public purpose. The sale or exchange of the property may not be finally concluded until 60 days' public notice of the terms of the proposed sale or exchange has been given. 77-2-361. Definitions. As used in 77-2-361 through 77-2-367, the following definitions apply:

(1) "Isolated parcel" means any state land not possessing a legal right of access by the public.

(2) "Land banking" means a process of selling various parcels of state land and using the proceeds from the sales to purchase other land, easements, or improvements that are likely to provide greater or equal trust revenue, as may be reasonably expected over a 20-year accounting period with an acceptable level of risk, for the affected trust and to diversify the land holdings of the various trusts.

History: En. Sec. 11, Ch. 355, L. 2003.

77-2-362. State land bank fund — statutory appropriation — rules. (1) There is a state land bank fund. The proceeds from the sale of state trust land authorized by 77-2-361 through 77-2-367 must be deposited into the state land bank fund. The purpose of the state land bank fund is to temporarily hold proceeds from the sale of trust land pending the purchase of other land, easements, or improvements for the benefit of the beneficiaries of the respective trusts. A separate record of the proceeds received from the sale of trust land for each of the respective trusts must be maintained. Proceeds from the sale of lands that are part of a trust land grant may be used only to purchase land for the same trust.

(2) (a) Proceeds deposited in the state land bank fund, except earnings on those proceeds, are statutorily appropriated, as provided in 17-7-502, to the department for the purposes described in 77-2-361 through 77-2-367. All earnings on the proceeds deposited in the state land bank fund are subject to the provisions of Article X, sections 5 and 10, of the Montana constitution.

(b) Funds appropriated from the trust land administration account provided for in 77-1-108 may be used by the department to fund the transactional costs of buying, selling, appraising, or marketing real property. Transactional costs may include realtor's fees, title reports, title insurance, legal fees, and other costs that may be necessary to complete a conveyance of real property.

(c) Proceeds from the sale of lands held pursuant to the Morrill Act of 1862, 7 U.S.C. 301 through 308, and the Morrill Act of 1890, 7 U.S.C. 321 through 329, may not be used for any transactional costs or trust administration purposes for those lands.

(d) The department may hold proceeds from the sale of state land in the state land bank fund for a period not to exceed 10 years after the effective date of each sale. If, by the end of the 10th year, the proceeds from the subject land sale have not been encumbered to purchase other lands, easements, or improvements within the state, the proceeds from that sale must be deposited in the public school fund or in the permanent fund of the respective trust as required by law, along with any earnings on the proceeds from the land sale, unless the time period is extended by the legislature.

(3) The board shall adopt rules providing for the implementation and administration of the state land bank fund, purchases, and sales.

History: En. Sec. 12, Ch. 355, L. 2003; amd. Sec. 115, Ch. 2, L. 2009; amd. Sec. 20, Ch. 465, L. 2009.

77-2-363. Land banking land sales and limitations — sale preparation costs. (1) (a) The board may not cumulatively sell or dispose of more than 250,000 acres of state land. Seventy-five percent of the acreage cumulatively sold must be isolated parcels that do not have a legal right of access by the public. At any one time during the life of the land banking process, the board may not sell more than 20,000 acres of state land unless the board has acted to use the revenue from that land to make purchases pursuant to 77-2-364.

(b) The estimated fair market value must be determined by a Montana-licensed and Montana-certified appraiser.

(2) (a) A person bidding to purchase state land offered for sale shall 20 days prior to the day of auction deposit with the department a bid bond in the form of a certified check or cashier's check drawn on any Montana bank equal to at least 20% of the minimum sale price specified by the department pursuant to 77-2-323(1) to guarantee the bidder's payment of the purchase price.

(b) If the current lessee of the land to be sold has initiated the sale as authorized by 77-2-364, the lessee may cancel the sale by giving notice to the department at least 10 days prior to the day of the auction. When the sale is canceled by the lessee, the lessee shall pay the costs incurred by the department for the preparation of the sale, including any costs incurred for preparation of documents required by 75-1-201.

(c) The department shall retain the bid bond of the successful bidder and shall return the bid bonds of the unsuccessful bidders. If the successful bidder fails to comply with the terms of the sale for any reason, the successful bidder's bid bond must be forfeited and credited to the interest and income account of the proper trust.

(3) Except for a sale that is initiated by the lessee of the parcel of land proposed for sale, prior to the proposed sale of any parcel of state land under the land banking process, the board shall give 60 days' notice of the proposed sale to the lessee of the parcel to allow the lessee sufficient time to determine whether the lessee wishes to propose an exchange of the land to the board.

(4) For a sale initiated by the board or the department, the lessee of the land must be afforded all the rights and privileges to match the high bid, as provided in 77-2-324.

(5) (a) When the lessee has initiated a sale of land under this section, the lessee shall remit to the department the estimated costs of preparing the parcel for sale, including but not limited to appraisals, cultural surveys, environmental review pursuant to Title 75, chapter 1, parts 1 through 3, and land surveys. Payment must be made within 10 days after the board has provided preliminary approval for the sale of the parcel.

(b) If the parcel is sold to the lessee, the funds remitted for the costs of the sale must be applied to the actual costs at closing. If the parcel is sold to a party other than the lessee, the funds remitted by the lessee must be refunded to the lessee and actual costs of preparing the parcel for sale must be assessed to the purchaser at closing.

77-2-364. Land banking purchases. (1) The board may select and purchase, lease, receive by donation, hold in trust, or in any manner acquire for and in the name of the state of Montana, in trust for the beneficiaries specified in sections 10 through 19 of The Enabling Act of Congress (approved February 22, 1889, 25 Stat. 676), as amended, any interest in real property and improvements, tracts, and leaseholds of land that the board considers proper in order to best provide prudent, maximum, long-term revenue for the beneficiaries.

(2) Sales of state land may be initiated only by the board, by the department, or at the request of a lessee, pursuant to 77-1-202, 77-1-301, 77-2-301, or 77-2-308. The board shall ensure

that the full market value of the land sold is realized for each trust by using the appraisal, sale, advertising, and competitive bid procedures contained within 77-2-303, 77-2-321, 77-2-322, 77-2-323, and 77-2-324. The estimated fair market value must be determined by a Montana-licensed and Montana-certified appraiser.

(3) When it is not inconsistent with the purpose of the trust, the board shall purchase land possessing legal access for all legal purposes.

(4) When purchasing land, easements, or improvements for the existing trusts, the board shall develop and apply appraisal and revenue projection procedures to ensure that the land or easements proposed for purchase or that the improvements proposed to be acquired are likely to produce more net revenue for the affected trust than the revenue that was produced from the land that was sold. The board may not purchase land, easements, or improvements pursuant to 77-2-361 through 77-2-367 unless it has first prudently determined that the land, easements, or improvements are likely to produce a greater or equal annual rate of return, as may be reasonably expected over a 20-year accounting period for Class 1, 3, and 4 lands and over a 60-year accounting period for Class 2 lands, as described in 77-1-401, with an acceptable level of risk for the affected trust, than the current annual rate of return from the state land that has been sold pursuant to 77-2-363. As guidance, the board shall use generally accepted accounting standards and the Uniform Appraisal Standards for Federal Land Acquisitions published by the U.S. department of justice and the appraisal institute.

(5) Prior to purchasing any land, easements, or improvements, the board shall determine that the financial risks and benefits of the purchase are prudent, financially productive investments that are consistent with the board's fiduciary duty as a reasonably prudent trustee of a perpetual trust. For the purposes of implementing 77-2-361 through 77-2-367, that duty requires the board to:

(a) discharge its duties with the care, skill, prudence, and diligence that a prudent person acting in a similar capacity with the same resources and familiar with similar matters should exercise in the conduct of an enterprise of similar character and aims;

(b) diversify the land holdings of each trust to minimize the risk of loss and maximize the sustained rate of return;

(c) discharge its duties and powers solely in the interest of and for the benefit of the trust managed;

(d) discharge its duties subject to the fiduciary standards set forth in 72-34-114; and

(e) maintain, as closely as possible, the existing land base of each trust, consistent with the state's fiduciary duty.

(6) Prior to purchasing a parcel of land in excess of 160 acres in any particular county, the board shall consult with the county commissioners of the county in which the parcel is located.

77-2-365. Right of access not created. Nothing in 77-2-361 through 77-2-367 creates any express or implied right of access, right-of-way, or easement for the benefit of the board, the department, or any purchaser of state land over or through any other property.

History: En. Sec. 15, Ch. 355, L. 2003.

77-2-366. Land banking — report to environmental quality council. The department shall provide a report to the environmental quality council by the July 1 prior to each regular legislative session that describes the results of the land banking program in detail. At a minimum, the report must summarize the sale and purchase transactions made through the program by type, location, acreage, value, and trust beneficiary. The environmental quality council shall make any recommendations that it determines necessary regarding the implementation of the state land banking process, including recommendations for legislation.

(2) Upon the filing of an application for a mining lease the board may, if the lands covered by the application have not been examined by the department, require the applicant for the lease to deposit with the department an amount of money, not exceeding $500 in any one case, which in its judgment will cover the cost of a special examination to enable the board to pass upon the application in accordance with this part. Such deposit shall be used to reimburse the state for the actual cost of the examination, and any portion of the deposit not required for such reimbursement shall, upon the approval or rejection of the application, be repaid to the applicant by the department.

This royalty may not be less than 5% of the returns from or of the full market value of the metalliferous minerals or gems recovered by the lessee from the state lands or reserved mineral rights covered by the lease.

(2) From each cleanup of values under such unit operations in which any yardage or area mined on lands to which the state holds the mineral rights is included, the state is entitled to royalties computed on that proportion of the whole value of recoveries from the cleanup as the yardage or area mined from lands included in the agreement in which the state holds the mining rights bears to the total yardage or area mined and included in the cleanup.

(3) The board may also enter into agreements for the unit operation of such placer mining deposits and the apportionment of royalties upon any other equitable basis the board considers in the best interest of the state. In issuing mining leases, the board and the state have leased only such right, title, and interest as the state has in the lands, metalliferous minerals, or gems therein contained. Neither the state, the board, nor any representative, agent, or employee of the state or the board are under any liability for the failure of the title of the state, in whole or in part, to the lands, metalliferous minerals, or gems covered by the lease.

77-3-130. Limitation on public inspection rights. The department may withhold from public inspection any information obtained from a mining lessee or permittee under this part if the information relates to the geology of the mining lease or permit. The withholding is effective for as long as the department considers it necessary either to protect the mining lessee's or permittee's economic interest in the geologic information against unwarranted injury or to protect the public's best interest.

77-3-131. Limitations on prospecting permits. (1) During the life of any permit the permittee may apply for a lease of the lands or mineral rights covered by the permit, and if a lease is granted it must be in the form and subject to all the terms and conditions specified in this part, as in the case of a mining lease issued under this part.

(2) If some other person makes a better bid for a mining lease upon the land covered by the permit and if the board awards a mining lease to a better bidder, the board shall also require the mining lessee to pay to the permittee, prior to the issuance of the lease, the full value of all the work the permittee has performed upon the land under the permit in connection with prospecting and exploration work. Within 30 days from the date the board gives the permittee notice of the issuance of the mining lease or within a further time as the board upon good cause shown allows, the permittee may remove any machinery, equipment, improvements, and other property placed on the land by the permittee.

2011 Amendment: Chapter 332 in (2) at beginning substituted "The board shall consider whether" for "if, after a determination of the amount, location, and quality of the coal on the lands for lease"; and made minor changes in style. Amendment effective May 6, 2011.

Applicability: Section 8, Ch. 332, L. 2011, provided: "[This act] applies to coal mining leases in effect on [the effective date of this act] and to all coal mining leases entered into on or after [the effective date of this act]." Effective May 6, 2011.

77-3-306. Conditions on manner of mining. (1) Every coal lease shall be conditioned upon compliance with Title 82, chapter 4, parts 1 and 2.

(2) These coal leases are subject to the condition that the coal must be mined, handled, and marketed in a manner that will prevent as far as possible all waste of coal and are also subject to the condition that the mining operations shall be carried on in a systematic and orderly manner that will not make subsequent mining operations more difficult or expensive. A violation of any of these conditions is grounds for the forfeiture of the lease after a hearing before the board.

77-3-307. Improvements of former lessee. (1) When a coal mining lease is applied for on land where mining operations have been carried on by a former lessee and there are surface or underground improvements on the land used at the former operations, disposition must be made of the improvements satisfactory to the board before a new lease is issued. If the owner of the improvements desires to sell the improvements to the new lessee, the new lessee shall pay the owner the reasonable value of the improvements as far as they are suitable for the new mining operations. If they fail to agree on the value of the improvements, the value must be ascertained and fixed as provided in 77-6-306.

(2) Before a new lease is issued, the applicant shall show to the satisfaction of the board that the applicant has paid the owner for the improvements as agreed on between them or as fixed under the provisions of 77-6-306, that the applicant has tendered payment as fixed, or that the owner desires to remove the owner's improvements.

77-3-308. Limitation on public inspection rights. The department may withhold from public inspection any information obtained from a coal mining lessee or permittee under this part if the information relates to the geology of the mining lease or permit. The withholding is effective for as long as the department considers it necessary either to protect the lessee's or permittee's economic interest in the geologic information against unwarranted injury or to protect the public's best interest.

77-3-312. Leasing procedures. (1) (a) Prior to issuing a coal mining lease, the board shall evaluate the coal and land proposed to be leased for the purpose of determining the fair market value of any coal reserves located on the land, giving opportunity for and consideration to public comments on the evaluation.

(b) (i) The board may determine fair market value by competitive bid or through an appraisal.

(ii) If no competitive bids are offered on the coal and land to be leased, the board may enter into a lease that is at least at the full market value as determined by the appraisal pursuant to subsection (1)(b)(i).

(2) Except as provided in subsection (1)(b), leases must be awarded by a competitive bid system, including a bonus bid for the first year's rental that may be amortized for a period of up to 5 years at the discretion of the board, and a lease may not be awarded at less than fair market value.

However, a lessee may, in lieu of furnishing a surety company bond, increase the cash deposit provided for under this part in an amount that in the judgment of the board makes the furnishing of a bond unnecessary.

(b) If a lease under this part or a corresponding permit issued pursuant to Title 82, chapter 4, parts 1 and 2, is challenged before an administrative agency or in court, the primary term of the lease must be extended for the period of time that the lease or permit was subject to challenge.

(2) A lease not producing coal in commercial quantities at the end of the primary term must be terminated, unless the leased lands are described in a strip mine permit issued under 82-4-221 or in a mine-site location permit under 82-4-122 prior to the end of the primary term, and the lease may not be terminated so long as the lands are covered and described under valid permit.

(3) For the purpose of this part:

(a) "commercial quantities" means that quantity of coal that can be sold at profit in the commercial market;

(b) "covered and described" under a valid permit or "described" in a strip mine or mine-site location permit means that the leased lands or a portion of the leased lands within or outside of the boundaries of the permit area are expected to be affected or disturbed at some point during the life of the permittee's strip-mining or underground-mining operation and are identified in the permittee's permit application.

(ii) the size, shape, and nature of the coal vein, strata, or body; and

(iii) the shipping and marketing facilities for the product.

(b) Consideration must also be given to every other known factor affecting the value of each particular coal mining lease, but the royalty for the coal mined may not be less than 10% of the f.o.b. mine price of a ton prepared for shipment.

2011 Amendment: Chapter 332 in (3) substituted "may be on a per-acre basis or per-ton basis" for "shall be on a per acre basis"; and made minor changes in style. Amendment effective May 6, 2011.

Applicability: Section 8, Ch. 332, L. 2011, provided: "[This act] applies to coal mining leases in effect on [the effective date of this act] and to all coal mining leases entered into on or after [the effective date of this act]." Effective May 6, 2011.

77-3-317. Report and payment of royalty. (1) On or before the last day of each month every holder of a producing coal mining lease shall make a report to the department on a form the department prescribes showing:

(a) the number of tons mined during the preceding calendar month;

(b) the price obtained therefor at the mine;

(c) the total amount of all sales; and

(d) any additional information required by the department.

(2) The report shall be verified by the oath of the lessee and be accompanied by payment of the royalty due the state for the preceding month as shown by the report.

77-3-322. Obligation to pay royalties under coal lease contract — interest. (1) The obligation arising under a coal lease to pay coal royalties to the department, to deliver coal to a purchaser to the credit of the department, or to pay a portion of the proceeds of the sale of the coal to the department is of the essence in the lease contract.

(2) If the operator under a coal lease fails to pay coal royalties to the department within 120 days after the initial coal produced under the lease is marketed and within 90 days for all coal produced and marketed thereafter, the unpaid royalties must bear interest at the legal rate of interest authorized under 31-1-106 from the date due until paid. The operator may remit semiannually to the department the aggregate of 6 months' royalties if the aggregate amount is less than $50 and annually if the aggregate amount is less than $10.

(3) An action for failure to make payments under the lease or seeking payments under this section must be filed in the district court for the county in which the coal mine is located, and that court has jurisdiction over any actions brought under this section. The prevailing party in a proceeding brought under this section is entitled to recover court costs and reasonable attorney fees.

(4) This section does not apply if the department has elected to take the owner's or assignee's proportionate share of production in kind or if there is a dispute as to the title to the minerals or entitlement to royalties, the outcome of which would affect distribution of royalty payments.

(1) Except as provided in subsection (2), the department may, within 5 years of the filing of a report pursuant to 77-3-317, commence an audit of a lessee's or former lessee's operation to determine whether the report is complete and accurate and whether all royalties owed have been paid. The department shall notify the lessee in writing of the audit. The notice must describe the period for which the audit is being conducted. Upon conclusion of the audit, the department shall notify the lessee of the department's conclusions and, if the department has determined that additional royalties are owed, the basis for that determination. An action to compel payment of royalties due must be commenced within 2 years of the date of mailing the notice.

(2) If a lessee or former lessee, with intent to evade payment of royalties, purposely or knowingly files a false report or purposely or knowingly fails to pay royalties owed, the department may conduct an audit and file an action to collect royalties at any time after the royalties are due.

(3) The board may grant reasonable extensions of the primary term of a state oil or gas lease upon a showing that the lessee, despite due care and diligence, is or has been directly or indirectly prevented from exploring, developing, or operating the lease or is threatened with substantial economic loss, due to litigation regarding the lease or another lease in the immediate area held by the same lessee, state compliance with the Montana Environmental Policy Act, Title 75, chapter 1, parts 1 through 3, rules adopted under Title 75, chapter 1, or adverse conditions caused by natural occurrences.

If oil or gas is recovered from any such well drilled or being drilled at or after the expiration of the primary term of the lease, the lease continues in force so long as oil or gas in paying quantities is produced from the leased premises.

(2) In addition to the sum of $1.50 per acre, the rental for the first year of the lease must also include any sum in excess of $1.50 per acre offered and accepted for the first year's rental.

(3) The annual rental under this section may not be less than $100 a year.

(4) The first year's rental must be paid before the issuance of the lease. The rentals for each subsequent year of the lease are due and payable before the beginning of the subsequent lease year. (a) commence the drilling of a well for oil and gas upon the leased premises; or

(b) pay a delay drilling penalty as follows:

(i) for the sixth year of the lease $1.25 per acre per year; and

(ii) for the remainder of the primary term of the lease an amount per acre per year as the board may in its discretion determine.

(2) Notice of that determination must be given to the lessee, and if the lessee applies for a hearing thereon within 10 days after receipt of the notice, the determination becomes final only after the hearing has been held.

(3) This annual delay drilling penalty must be paid each year in advance. The board shall refund delay drilling penalties paid on a lease for any year in which the lessee commences drilling on that lease.

(4) If a well for oil and gas is commenced, the drilling of the well must be prosecuted with due diligence and dispatch to such depth as is necessary to make a reasonable test for oil or gas.

Oil and gas leases issued under the provisions of this part must all be subject to the conditions that the lessee in conducting explorations and mining or drilling operations shall use all reasonable precautions to prevent waste of oil or gas developed in the land or the entrance of water through wells drilled by the lessee to the oil or gas sands or oil-bearing or gas-bearing strata to the destruction or injury of the oil or gas deposits. Violations of any of these conditions constitutes grounds for the forfeiture of the lease after a hearing on the violations before the board.

77-3-427. Provision for offset wells — compensatory royalties. (1) Oil and gas leases granted by the state shall contain suitable provisions imposing upon all lessees the obligation to drill offset wells wherever and whenever necessary to prevent waste and damage to the property of the state.

(2) The board may allow the lessee the following options in lieu of drilling an offset well:

(a) releasing the lands in question; or

(b) paying a compensatory royalty on a nonproducing lease if the board determines that such compensatory royalty will fully compensate the state for waste and damage to the property of the state. The compensatory royalty shall be based upon the estimated drainage, as determined by the board, and shall be paid on a monthly basis unless circumstances require otherwise.

(3) If the board or the lessee terminates the lease, that termination does not impair any implied covenant against drainage or the right of the board to seek damages from the lessee for the lessee's failure to protect the lease from drainage of oil or gas by a well adjacent to the state lease.

77-3-428. Additional development following completion of productive well. (1) The lessee shall be required, upon completing a commercially productive oil or gas well upon the leased premises, to proceed with reasonable diligence to drill such additional wells to the depth of the formation found commercially productive or to such depth as may be necessary to economically test, develop, and operate the deposits discovered.

(2) No lessee shall, however, be required to drill to completion more than one well under any one lease during any one calendar year or a total number of wells under any one lease in excess of the total number of 40-acre subdivisions of land held under such lease. As to lands found valuable for gas production only, the drilling obligation of the lessee shall be confined to a total number of wells equal to the total number of tracts comprising 160 acres of land included in the lease, except as the drilling of offset oil or gas wells necessary to protect the leased premises and deposits from loss or depletion due to wells drilled on contiguous lands shall require greater diligence in drilling and a greater number of wells to be drilled.

(3) The performance of said well drilling operations may be suspended only by and with the consent of the board during the time oil or gas previously discovered cannot be marketed at a profit or for other good cause shown.

77-3-429. Operating agreements. Owners of state oil and gas leases may enter into agreements with other persons, associations, firms, and corporations for drilling and other operations on the state lands under their leases. No such operating agreements are in any way binding upon the state until filed with the board and approved by it. 77-3-430. *(Temporary)* **Pooling agreements and unit operations.** Nothing contained in this or in prior related laws prevents the board from entering into agreements for the pooling of acreage with others for unit operations for the production of oil or gas or both and the apportionment of oil or gas royalties or both on an acreage or other equitable basis and from modifying leases with respect to delay rentals, delay drilling penalties, and royalties in accordance with such pooling agreements and such unit plans of operation. However, such agreements may not change the percentage of royalties to be paid to the state from the percentages as fixed in its leases. The board may modify existing pooling and unit agreements so as to commit the state lands included therein for as long as the unitized substance or substances for which the state lands are committed is produced from any lands in the unit.

77-3-432. Royalty. In each oil and gas lease granted by the state under this part, there must be reserved to the state as consideration for the lease a royalty in all oil and gas produced and saved from all lands covered by the lease and not used for light, fuel, and operation purposes on the leased premises, which must be equivalent to the full market value, as ascertained by the board at the date of the lease, of the estate or interest of the state in the lands and oil and gas deposits disposed of under the lease. The royalty reservation must be set by the board but may not be less than 12 ½% on gas and not less than 12 ½% on oil or casinghead gasoline for each producing well for the calendar month. The state may share the expense of transporting the oil to the nearest market on a basis proportional to the state's royalty interest in the oil and at a rate per mile acceptable to the department.

The royalty on gas, including casinghead gas and all gaseous substances not sold or used off the premises, must be at the rate of $400 per lease each year or the amount of the annual rental provided in the lease, whichever is the greater, payable on or before the annual anniversary date of the lease. As long as the leased lands contain a well capable of production in paying quantities and the requisite payment is made, the lease must be considered as a producing lease under the lease terms.

77-3-434. Manner of making royalty payment. Such lease shall provide for the rendering of payment of such royalty on all oil and gas produced and saved and sold or used off the premises in the following manner and upon the following terms:

(1) the lessee shall pay to the state in cash, for all oil and gas royalty reserved, the posted field price existing on the day such oil or gas is run into any pipeline or storage tank to the credit of the lessee, plus any bonus actually paid or agreed to be paid to the lessee for such oil or gas; or

(2) at the option of the state exercised in writing by the board not oftener than every 30 days, the lessee shall deliver the state's royalty oil or gas free of cost or deductions into the pipeline to which the wells of the lessee may be connected or into any storage designated by the state and connected with such wells.

77-3-435. Payments due to state — audit — notice — action. (1) The report under 77-3-431 must be accompanied by payment of the amount due the state as royalty for the month covered by the report unless the state's royalty is being or has been paid directly by the purchaser. However, when the amount of royalty due from a lease is determined by the board to be so small as to make it uneconomical to collect monthly, the board may authorize royalty payments to be made semiannually.

(2) Oil and gas leases granted by the state must contain suitable provisions imposing upon all lessees the obligation to make payments due the state in the manner, at the time, and to the representative of the state that may be required by the board.

(3) Except as provided in subsection (4), the department may, within 7 years of the filing of a report pursuant to 77-3-431, commence an audit of a lessee's or a former lessee's operation to determine whether the report is complete and accurate and whether all royalties owed have been paid. The department shall notify the lessee in writing of the audit. The notice must describe the period for which the audit is being conducted. Upon conclusion of the audit, the department shall notify the lessee of the department's conclusions and, if the department has determined that additional royalties are owed, the basis for that determination. An action to compel payment of royalties due must be commenced within 2 years of the date of mailing the notice.

(4) If a lessee or former lessee, with intent to evade payment of royalties, purposely or knowingly files a false report or purposely or knowingly fails to pay royalties owed, the department may conduct an audit and file an action to collect royalties at any time after the royalty is due.

77-3-436. Disposition of royalties and other money. All fees, rentals, penalties, royalties, and bonuses collected for or under state oil and gas leases shall be paid to the department and credited as follows:

(1) All fees and penalties shall be credited to the state general fund.

(2) All rentals shall be credited to the income fund of the grant to which the lands under each lease belong.

(3) All moneys collected as royalties and bonuses shall be credited to the permanent fund arising from the grant to which the land under each particular lease belongs and become and forever remain an inseparable and inviolable part thereof. However, all royalties and bonuses collected from the lands forming part of the capitol building grant shall be available as income, the same as all other receipts from such lands.

(4) All moneys received as rentals, royalties, and bonuses for or under leases on state lands and not held in trust for the public schools of the state or for any state institution shall be credited to the state general fund unless other disposition is provided by law.

77-3-438. Assignments of leases. (1) The assignment of any oil and gas lease issued under this part, either in whole or as to subdivisions of land embracing not less than 40 acres covered thereby, made to an assignee qualified as provided herein is permitted. Such assignment is not, however, binding upon the state until filed with the department and accompanied by the required fees, together with such proof of qualifications required by the board, and approved by the board or its lawful representative. The approval of any assignment so filed and supported may not be withheld in any case where the rights or interest of the state in the property assigned will not in the judgment of the board be prejudiced thereby, and the decision of the board in all cases is subject to appeal upon proper court proceedings.

(2) All other assignments of oil and gas leases issued under this part or interests therein are subject to approval by the board and are binding upon the state in the discretion of the board.

77-3-439. Surrender of leases. The lessee under any oil and gas lease granted by the state may at the termination of any rental year, by giving to the department 30 days' previous notice in writing, surrender and relinquish the lease to the state in whole or as to any legal subdivision of the lands covered thereby and be discharged from any obligation not yet accrued as to lands so surrendered and relinquished without prejudice to the continuance of the lease as to lands not surrendered or relinquished.

77-3-440. Forfeiture and cancellation of leases. (1) All oil and gas leases granted by the state pursuant to the terms of this part shall provide for forfeiture and cancellation thereof upon failure of the lessee to fully discharge the obligations provided therein, after written notice from the state and reasonable time allowed to the lessee for performance of any undertaking or obligation specified in such notice concerning which the lessee is in default.

(2) Any lessee, upon application therefor, shall be granted a hearing on any notice or demand of the board before any lease is declared forfeited or canceled by the board.

In all cases where an oil and gas lease issued after March 3, 1955, is surrendered for cancellation before its expiration, relinquished to the state, or canceled through proceedings on the part of the state, no new lease on the lands under such lease may be issued within 30 days from the date of cancellation or relinquishing. This restriction does not apply, however, in cases of bona fide assignment.

77-3-442. Disposition of property of lessee upon termination of lease. (1) Upon the termination for any cause of a lease issued under this part, the former lessee has 6 months after the date of the termination to remove from the premises all machinery, fixtures, improvements, buildings, and equipment belonging to the lessee, except for casing in the wells and other equipment or apparatus necessary for the preservation of any oil or gas well or wells and the structures described in 77-1-134. As to the casing, equipment, and apparatus, any succeeding lessee or, in the event there is no succeeding lessee, the state wishing to have the property left upon the premises shall pay a reasonable value for the property to the former lessee.

(2) If the succeeding lessee or the board is unable to agree with the former lessee upon the reasonable cash value of the casing, equipment, and apparatus, the succeeding lessee or, if there is no succeeding lessee, the state shall pay in cash to the former lessee a sum fixed as a reasonable price by a board of three appraisers, one of whom must be chosen by the successful bidder, one by the former lessee, and the third by the two appraisers chosen. If a person refuses to appoint an appraiser within 15 days of a request to do so by the department, the department may appoint an appraiser for that person. The appraisal must be reported to the respective parties in writing and is final and conclusive.

(3) Except as provided in 77-1-134, unless the department gives written authorization, the former lessee may not remain in possession or manage the land and property formerly covered by the lease. During the time the former lessee remains in authorized possession, the lessee may retain the same share of the products of the premises as inured to the lessee during the term of the lease. Except as provided in 77-1-134, if the state or other bidder does not desire any of the lessee's property as provided in this section, the lessee shall properly plug all wells and remove all of the lessee's property from the premises.

77-3-443. Reservation in lease for disposition of surface. In every oil and gas lease granted pursuant to the terms hereof there shall be reserved unto the state the right to sell, lease, or otherwise dispose of the surface of the lands covered thereby, subject always to the rights and privileges granted unto the lessee under such oil and gas lease.

77-3-444. Limitation on overriding royalties and payments out of production. (1) A person, partnership, or association may not enter into an agreement that in the aggregate creates overriding royalties or payments out of the production of oil and gas in excess of 5% above the landowner's royalty payable to the state of Montana unless that agreement expressly provides that the obligation to pay overriding royalties or payments out of production may be suspended by the director of the department at any time upon a determination that the excess overriding royalties or payments out of production constitute a burden on lease operations to the extent that:

(a) proper and timely development may be retarded;

(b) continued operation of the lease may be impaired; or

(c) premature abandonment of the wells may occur.

(2) This section applies separately to any zone or portion of a lease segregated for computing a royalty due to the state of Montana.

(3) All agreements of any kind creating overriding royalties or payments out of production of oil and gas must be filed with the department within 30 days of their creation by the lessee.

77-3-451. Limitation on public inspection rights. The department may withhold from public inspection any information obtained from an oil or gas lessee under this part if the information, including drill logs, seismic data, and lithographic descriptions, relates to the geology of the oil or gas lease. The withholding is effective for as long as the department considers it necessary either to protect the lessee's economic interest in the geologic information against unwarranted injury or to protect the public's best interest.

(2) Whenever another person becomes the geothermal lessee, the person shall pay the former lessee the reasonable value of the improvements at the time the new lessee takes possession of the improvements.

(3) In determining the value of these improvements, the original cost, the present condition, and the suitability of the improvements for the uses ordinarily made of geothermal resources must be considered.

(4) The former lessee may remove or dispose of the movable improvements from the land within 60 days from the expiration of the former lessee's lease except for the well casing and other equipment necessary for the preservation of any geothermal well. If not removed within 60

days, improvements become the property of the state unless the board grants additional time for the removal of the improvements. Before a lease is issued to the new lessee, the new lessee shall show that the new lessee has paid the former lessee the value of the improvements as agreed upon by them or as fixed and determined under 77-4-129, that the new lessee has offered to pay the value of the improvements as fixed and determined, or that the former lessee elects to remove the improvements.

77-4-129. Procedure to fix value of improvements. (1) If the owner of any improvements on state lands of the type authorized by law at the time they were placed on the land desires to sell these improvements to the new lessee and they are unable to agree on the value of the improvements, the value must be ascertained and fixed by three arbitrators, one of whom must be appointed by the owner of the improvements, one by the new lessee, and the third by the two arbitrators appointed. The reasonable compensation that the arbitrators may fix must be paid in equal shares by the owner of the improvements and the new lessee. The value of the improvements as ascertained and fixed is binding on both parties.

(2) If either party is dissatisfied with the valuation as fixed, the party may within 10 days appeal the arbitrators' decision to the department and the department shall examine the improvements and make the final decision as to the value of the improvements. The department shall apportion the actual cost of the reexamination to the owner and the new lessee as justice may require. The value of the improvements must be ascertained and fixed as provided in 77-4-128.

77-4-210. Joint development with United States. (1) If the state land constituting a power site is part of a larger power site owned or controlled by the government of the United States, then the board may grant a joint lease or license with the United States for the development of the power site and the distribution, use, and disposition of the electrical energy generated at the power site under the laws of the United States and regulations issued pursuant to those laws.

(2) The lease or license may be granted for a term not exceeding 50 years.

(3) The share or percentage of ownership of the state in the joint power site must be in proportion to the total contribution that the lands of the state make to the value of the entire power site. Before the share of the state in the power site is advertised for lease or license, the percentage of the state's share in the entire power site must be calculated and agreed upon between the state and the United States.

(4) The fee or compensation to be paid to the state under the lease or license must be calculated on the basis of the state's share of ownership in the entire power site as calculated and agreed to. However, the fee or compensation may not be less than the full market value of the estate or interest disposed of in the lands through the granting of the lease or license to be carefully ascertained from all available sources.

(5) Before the lease or license is issued, notice of the lease or license must be given in the same manner as required in this chapter for the issuance of a separate lease or license by the state.

77-4-211. Amortization of investment. (1) In all cases where the lease or license issued by the United States requires the amortization of the investment made in dams, machinery, equipment, and appurtenant works, such amortization requirement shall also apply to that portion of the investment representing the state's part or share in the power site so that the state will at all times retain its full share of ownership in the power site and in the dams, machinery, equipment, and appurtenant works.

(2) If the state lands constitute a separate power site wholly owned by the state and independently developed, the lease or license issued by the state may provide for the amortization of the capital invested in the dam, machinery, equipment, and appurtenant works, not including the distribution system, so that ultimately the state will become the owner of the power site including the dam, machinery, equipment, and appurtenant works, not including the distribution system.

Unless the full market value of the property interest or of the revenue foregone is obtained, the board and the department are prohibited from either temporarily or permanently designating, treating, or disposing of any interest in any state forest lands for the following purposes:

(1) as a natural area pursuant to Title 76, chapter 12, part 1, or as otherwise provided for by law;

(4) as a wildlife management area.

Part 2
Timber Sales and Removal

77-5-201. Sale of timber. (1) Under the direction of the board, the department may sell the timber crop and other crops of the forests after examination, estimate, appraisal, and report and under any rules established by the board. Timber or forest products sold from state trust lands may be sold by a stumpage method or a lump-sum method or marketed by the state through contract harvesting as provided in 77-5-214 through 77-5-219.

(2) Timber proposed for sale in excess of 100,000 board feet must be advertised in a paper of the county in which the timber is situated for a period of at least 30 days, during which time the department must receive sealed bids up to the hour of the closing of the bids, as specified in the notice of sale.

(3) (a) In cases of emergency because of fire, insect, fungus, parasite, or blowdown or to address forest health concerns or in cases when the department is required to act immediately to take advantage of access granted by permission of an adjoining landowner, timber proposed for sale not in excess of 1 million board feet may be advertised by invitation to bid for a period of not less than 10 days. The department may reject any bids, upon approval of the board, or it shall award the sale to the highest responsible bidder.

(b) (i) In cases when the department is required to act immediately to take advantage of access granted by permission of an adjoining landowner and there is only one potential buyer with legal access, the department may negotiate a sale of timber not in excess of 1 million board feet without offering the timber for bid if the sale is for fair market value.

(ii) The provisions of subsection (3)(b)(i) do not apply to situations when the only access is totally controlled by a potential purchaser of the timber, in which case the department shall seek to negotiate permanent, reciprocal access.

(c) In the situations described in subsections (3)(a) and (3)(b)(i), the department is not required to comply with the provisions of 75-1-201(1) to the extent that compliance is precluded by limited time available to take advantage of the sales opportunities described by this subsection (3).

77-5-202. Agreement with purchaser — bond. (1) Upon award of sale the purchaser shall execute a formal agreement, approved by the board, which describes the area on which the timber is to be cut, the approximate quantity to be cut by species, and the rate for each product of each species. The agreement shall stipulate that all timber shall be paid for in advance of cutting, fix a date for termination of the agreement, and define rules of silviculture, cutting, utilization, scaling, and slash disposal and such other rules as in the discretion of the board are essential to the perpetuation of the state forests.

(2) (a) Except as provided in subsection (2)(b), as a guarantee for the faithful performance of the agreement, the purchaser shall be required to furnish a bond, with sufficient sureties, to the state of Montana, in an amount equal to the potential loss to the state, as determined by the department.

(b) The bond required under this section must be in an amount equal to at least 5% of the estimated value of the timber sold.

77-5-204. Sale of timber — fee for forest improvement. (1) The board may sell timber on state lands or other forest products removed from state lands, as provided in 77-5-214 through 77-5-219, at a per-unit price when, in the board's judgment, it is in the best interest of the state, provided that live timber is not sold for less than full market value.

(2) Timber sold or cut from state lands must be cut and removed under rules that may be prescribed by the board for standing timber preservation and fire prevention. In all cases, the board shall require the person cutting the timber to pile and burn or otherwise dispose of the brush and slash in the manner that may be prescribed by the board.

(3) Before the sale of timber is granted, the value of the timber must be appraised under the direction of the department, upon the request and subject to the approval of the board. An appraisal must show as nearly as possible the per-unit value, when appropriate, of all merchantable forest products.

(4) In addition to the price of the forest products established under subsection (1), the board may require a timber or other forest product purchaser to pay a fee for forest improvement unless the timber is to be harvested from land granted to the state pursuant to the Morrill Act of 1862, 7 U.S.C. 301 through 308, and the Morrill Act of 1890, 7 U.S.C. 321 through 329. Revenue from the fee must be deposited in the forest improvement account, established in 77-5-224, to the credit of the department and, as appropriated by the legislature, may be used only for:

(a) disposing of logging slash;

(b) acquiring access and maintaining roads necessary for timber harvesting on state lands;

(c) reforesting, thinning, and otherwise improving the condition and income potential of forested state lands; and

(d) complying with legal requirements for timber harvesting.

(2) It shall instruct and supervise the cruisers, forest wardens, and scalers in the conduct of their work and fix and establish the standard practice in timber sales administration.

(3) Records of converting factors, units of measure, and the scale of logs shall be kept as a permanent public record showing the date of scale or measurement, the designation of the scale, and the name of the scaler.

77-5-207. Salvage timber program. (1) The department shall establish a salvage timber program that provides for the timely salvage logging on state forests of dead or dying timber or timber that is threatened by insects, disease, fire, or windthrow. In managing the harvest of salvage timber, the department shall consider:

(a) the economic value of the timber to be salvaged;

(b) the cost of salvage efforts; and

(c) the long-term costs to all forest resources from insects, disease, or fire that otherwise might be controlled through salvage operations.

(2) The department shall, to the extent practicable, harvest dead and dying timber before there is substantial wood decay and value loss.

(3) The department may sell salvage timber pursuant to this part.

(4) The department's salvage timber program may not take precedence over the timely sale and harvest of green timber.

History: En. Sec. 2, Ch. 285, L. 1993.

77-5-208. Timber conservation license in lieu of sale. (1) Under the direction of the board, the department may offer and provide a timber conservation license in lieu of the sale and harvesting of the timber to any person under all of the following conditions:

(a) During the environmental review process required by Title 75, chapter 1, for a proposed timber sale, an interested person shall provide to the department a written request that the department defer the sale or a specific portion of the sale and that a timber conservation license for the sale or portion of the sale be authorized.

(b) Upon receipt of a written request, the department shall prepare and recommend the timber sale for consideration by the board, using the alternatives of the sale with and the sale without a timber conservation license provision.

(c) The department shall solicit bids simultaneously for each alternative authorized by this section to ensure that the full, fair market value is secured for the beneficiaries.

(d) The successful purchaser of a timber conservation license is required to furnish a bond, as required by 77-5-202, to ensure the terms of the contract for a timber conservation license.

(e) The successful purchaser of a timber conservation license is required to pay the fees for forest improvement, as required by 77-5-204, that are included in the terms of the sale bid and applicable to the issuance of a timber conservation license.

(2) If a request for the timber sale analysis and authorization of a timber conservation license is not submitted to the department prior to the completion of the environmental review

process for the sale, as required by Title 75, chapter 1, a timber conservation license may not be authorized.

(9) Proposed timber sales under subsection (1)(b) do not take precedence over the timely sale and harvest of green timber pursuant to 77-5-207.

(10) Permit applications made pursuant to this section may be subject to further environmental review, and the number of permits may be limited if the department determines that sales may have a cumulative effect on geographic area.

77-5-214. Statement of policy. (1) The application of contract harvesting on Montana's trust lands provides an opportunity to improve forest health and long-term productivity, increase options for managing forests in environmentally sensitive areas, and provide potential revenue benefits for trust beneficiaries.

(2) It is important that the department has clear authorization and direction for conducting contract harvesting, including marketing and selling log sorts and other forest products.

(3) A clear funding mechanism addressing the receipt of revenue and payment for costs associated with contract harvesting projects provides the transparent process that allows beneficiaries to understand the costs and benefits associated with contract harvesting.

(4) Contract harvesting has the potential to result in increased bidder activity, better use and merchandising of products, improved harvesting results and environmental protection, and quicker completion of projects when time constraints are a factor.

History: En. Sec. 1, Ch. 494, L. 2007.

77-5-215. Definitions. As used in this part, unless the context indicates otherwise, the following definitions apply:

(1) "Contract harvesting" means a timber harvest or timber sale occurring on state trust lands by which:

(a) the department solicits bids and contracts with a firm or individual awarded the bid to:

(i) perform all necessary work to harvest and process trees into merchantable forest products;

(ii) sort trees pursuant to contract specifications and department use standards; and

(iii) transport and deliver the products to forest product purchasers; and

(b) the department sells the forest products to one or more forest product purchasers through the competitive bidding process pursuant to 77-5-201(1) and (2).

(2) "Contract harvesting costs" means expenses related to the production of log sorts or other merchantable products from a stand of timber and the transportation of the products to point-of-sale locations. These expenses may include but are not limited to:

(a) sale preparation and development costs;

(b) marketing of forest products and administration of contract harvesting contracts;

(c) road building and maintenance;

(d) labor for felling, bucking, yarding, and loading;

(e) scaling of forest products; and

(f) the transportation of sorted logs and other merchantable products from the harvest site to a point of sale.

(3) "Decked" means a pile of logs or other merchantable forest products that have been prepared for sale or shipment and placed upon a landing.

(4) "Forest health concerns" means issues that can be addressed through management or harvest of merchantable or nonmerchantable trees and includes:

(a) forested lands that are overcrowded or stagnant and that are showing declining annual growth;

(b) wildland-urban interface areas where timber harvest or forest management is necessary to prevent catastrophic or other damage to forested lands, livestock, buildings, or other infrastructure;

(c) fire fuel buildup and treatment on forested lands;

(d) forested lands susceptible to imminent or repeated insect or disease attack and timber degradation;

(e) forested lands that are in a high state of decline or decay or are rapidly deteriorating;

(f) forested lands with high recreational use and high degradation risk; and

(g) forested lands under drought stress.

(5) "Forest products" means any product produced from the forest that the department can sell through competitive bid or direct negotiation.

(6) "Log sorts" means trees or portions of trees that are grouped and sorted into various product categories, including but not limited to pulp logs, sawlogs, and house logs.

(7) "Sawlogs" means merchantable timber prepared and sorted as decked, scaled logs and sold f.o.b., as defined in 30-2-319, at a designated location, expressed in terms of dollars per thousand board feet or dollars per ton.

(8) "Scaled" means the measured volume, weight, or other measurement of a log, load of logs, or other products.

(9) "Stumpage" means the value of timber as it exists, uncut, within a harvest unit, expressed in terms of dollars per thousand board feet, dollars per ton, or other appropriate value per-unit designation.

(10) (a) "Timber" means any wood growth on state trust land, mature or immature, alive or dead, standing or down, that is capable of furnishing merchantable raw material used in the manufacture of lumber or other forest products.

(b) The term does not include cultivated Christmas trees.

History: En. Sec. 2, Ch. 494, L. 2007.

77-5-216. Contract harvesting authorized. (1) Under direction of the board and after submitting the various portions of the sale for bid, as described in 77-5-201, the department is authorized to sell timber and forest products from contract harvesting sales through the competitive bidding process pursuant to 77-5-201(1) and (2) and to contract with firms and individuals for the removal of timber and forest products from state trust lands, the preparation of those materials into merchantable form, the transportation of those materials to a point of sale, and other purposes that the department determines to be necessary.

(2) Except as provided in subsection (3), the department may not conduct contract harvesting on state trust lands in an amount greater than 10% of the annual sustained yield.

(3) If the department is addressing forest health concerns as provided in 77-5-217, the department may exceed the annual sustained harvest level by up to 10% using contract harvesting, provided that the contract harvest volume in excess of the annual sustained harvest level contains no more than 25% merchantable sawlog volume.

History: En. Sec. 3, Ch. 494, L. 2007; amd. Sec. 1, Ch. 116, L. 2009.

77-5-217. Contract harvesting to address forest health concerns. All contract harvesting sales meant to address specific forest health concerns must be designed to:

(1) improve the overall health, productivity, and long-term revenue potential for the timber stand;

(2) be consistent with the state forest land management plan; and

(3) comply with all applicable state laws, rules, and regulations.

History: En. Sec. 4, Ch. 494, L. 2007.

77-5-218. Rules. (1) (a) The board may adopt rules to implement the contract harvesting program. The board shall evaluate each proposed contract harvest to determine if, in the board's judgment, contract harvesting will fulfill its duty to prudently obtain the maximum long-term revenue for the trust beneficiaries or to address forest health concerns or other environmental concerns.

(b) The board shall adopt rules describing the procedures necessary to ensure that the trust beneficiaries receive the full market value of the forest products.

(2) The board may adopt rules that impose specific appraisal requirements and sale procedures for any forest products directly marketed and sold by the department.

History: En. Sec. 5, Ch. 494, L. 2007.

77-5-219. Contract harvesting account — authorized expenditures — termination. (1) An account, called the contract harvesting account, must be created as a subaccount of the trust land administration account established in 77-1-108, in which to deposit gross revenue and for the payment of expenditures associated with contract harvesting sales. All proceeds of the sale of forest products from a contract harvesting sale must be deposited into this account and must be retained in the account to be used to pay for all contract harvesting costs, as provided in subsection (2).

(2) Expenditures may be credited against the account for contract harvesting costs. Personnel services costs for state employees may not be credited against the account.

(3) An amount equal to the contract harvesting costs must be retained in the account and must be deducted from the gross proceeds to determine the net proceeds. The net proceeds from the sale of the forest products must be distributed to the appropriate trust.

(4) An initial account balance must be created by transferring up to $500,000 into the contract harvesting account from the trust land administration account.

(5) If the contract harvesting program is terminated or discontinued for more than 10 years, any balance remaining in the contract harvesting account in excess of $500,000 must be distributed to the appropriate trust. The remaining balance up to $500,000 must be transferred back to the trust land administration account provided for in 77-1-108.

History: En. Sec. 6, Ch. 494, L. 2007; amd. Sec. 22, Ch. 465, L. 2009.

77-5-220 reserved.

77-5-221. Definition. As used in 77-5-222, 77-5-223, and this section, "annual sustainable yield" means the quantity of timber that can be harvested from forested state lands each year in accordance with all applicable state and federal laws, including but not limited to the laws pertaining to wildlife, recreation, and maintenance of watersheds, and in compliance with water quality standards that protect fisheries and aquatic life and that are adopted under the provisions of Title 75, chapter 5, taking into account the ability of state forests to generate replacement tree growth.

History: En. Sec. 1, Ch. 517, L. 1995.

77-5-222. Determination of annual sustainable yield. (1) The department, under the direction of the board, shall commission a new study by a qualified independent third party to determine, using scientific principles, the annual sustainable yield on forested state lands. The department shall direct the qualified independent third party to determine the yield pursuant to, but not exceeding, all state and federal laws.

(2) Until the new study required by subsection (1) is completed, the department is directed to set the annual timber sale target at 50 million board feet a year.

History: En. Sec. 2, Ch. 517, L. 1995; amd. Sec. 1, Ch. 440, L. 2003.

77-5-223. Annual sustainable yield as timber sale requirement — review. (1) The annual sustainable yield constitutes the annual timber sale requirement for the state timber sale program administered by the department. This annual requirement may be reduced proportionately by the amount of sustained income to the beneficiaries generated by site-specific alternate land uses approved by the board.

(2) After it is determined under 77-5-222, the annual sustainable yield must be reviewed and redetermined by the department, under the direction of the board at least once every 10 years.

History: En. Sec. 3, Ch. 517, L. 1995.

Part 3
Streamside Management Zones

Part Cross-References

Water Use, Title 85.

77-5-301. Findings and purpose. (1) The legislature finds that the streamside management zone:

(a) acts as an effective sediment filter to maintain water quality;

(b) provides shade to regulate stream temperature;

(c) supports diverse and productive aquatic and terrestrial riparian habitats;

(d) protects the stream channel and banks;

(e) provides large, woody debris that is eventually recruited into a stream to maintain riffles, pools, and other elements of channel structure; and

(f) promotes flood plain stability.

(2) The legislature further finds that maintaining the integrity of forest streams is crucial to the quality and quantity of water available to Montanans for domestic, agricultural, industrial, and recreational use.

(3) The legislature further finds that forest streams are highly susceptible to impacts from land development and that in many cases forest practices in streamside zones in Montana are causing excessive and unnecessary damage to the banks, beds, and protective vegetation of forest streams.

(4) The legislature further finds that, through careful management in the streamside zone, owners and operators can achieve timber harvest goals without sacrificing water quality or impairing the beneficial uses of the water.

(5) The purposes of this part are:

(a) to protect the legitimate public interest in the quality and quantity of forest waters;

(b) to provide for standards, oversight, rehabilitation, and penalties to ensure that forest practices are conducted in a manner that conserves the integrity of Montana's streamside zones;

(c) to provide guidelines for the management of wildlife habitat in streamside zones; and

(d) to allow operators necessary flexibility to use practices appropriate to site-specific conditions in the streamside management zone.

History: **En. Sec. 1, Ch. 608, L. 1991.**

77-5-302. Definitions. As used in this part, the following definitions apply:

(1) "Alternative practices" means forest practices that are:

(a) conducted in the streamside management zone and that are different from practices required by rules adopted under this part;

(b) designed for site-specific conditions encountered during a timber sale; and

(c) subject to department approval under 77-5-303.

(2) "Department" means the department of natural resources and conservation provided for in 2-15-3301.

(3) "Forest practices" means, within a timber sale, the harvesting of trees, road construction or reconstruction associated with harvesting and accessing trees, site preparation for regeneration of a timber stand, reforestation, and management of logging slash. The term does not include activities related to the operation of a Christmas tree farm or nursery that do not involve new road construction.

(4) "Operator" means a person responsible for conducting forest practices. An operator may be the owner or a person who, through contractual agreement with the owner, is obligated to or entitled to conduct forest practices or carry out a timber sale.

(5) "Owner" means an individual, firm, partnership, corporation, or association of any nature that holds an ownership interest in forest land or timber.

(6) "Person" means an individual, firm, partnership, company, commercial entity, corporation, or association.

(7) "Stream" means a natural watercourse of perceptible extent that has a generally sandy or rocky bottom or definite banks and that confines and conducts continuously or intermittently flowing water.

(8) "Streamside management zone" or "zone" means a stream, lake, or other body of water and an adjacent area of varying width where management practices that might affect wildlife habitat or water quality, fish, or other aquatic resources need to be modified. The streamside management zone encompasses a strip at least 50 feet wide on each side of a stream, lake, or other body of water, measured from the ordinary high-water mark, and extends beyond the high-water mark to include wetlands and areas that provide additional protection in zones with steep slopes or erosive soils.

(9) "Timber sale" means a series of forest practices designed to access, harvest, or regenerate trees on a defined land area for commercial purposes.

History: **En. Sec. 2, Ch. 608, L. 1991; amd. Sec. 1, Ch. 320, L. 1993; amd. Sec. 325, Ch. 418, L. 1995.**

77-5-303. Standards for forest practices in streamside management zones. (1) The following practices are prohibited in a streamside management zone:

(a) broadcast burning;

(b) the operation of wheeled or tracked vehicles except on established roads;

(c) the forest practice of clearcutting;

(d) the construction of roads except when necessary to cross a stream or wetland;

(e) the handling, storage, application, or disposal of hazardous or toxic materials in a manner that pollutes streams, lakes, or wetlands or that may cause damage or injury to humans, land, animals, or plants;

(f) the side-casting of road material into a stream, wetland, or watercourse; and

(g) the deposit of slash in streams or other water bodies.

(2) The department shall publish and distribute the rules implementing the streamside management standards.

History: En. Sec. 3, Ch. 608, L. 1991.

77-5-304. Inspection — onsite consultation. (1) The department may inspect forest practices on any federal, state, or private land in this state to assess compliance with the provisions of this part and rules adopted pursuant to this part.

(2) The department may conduct an onsite consultation with an owner or operator to review harvest plans and watershed conditions. During the onsite consultation, the department may review and, if appropriate, approve the proposed use of alternative streamside management practices, as provided in 77-5-303.

History: En. Sec. 4, Ch. 608, L. 1991.

77-5-305. Responsibility for compliance — penalties — administrative orders. (1) (a) Except as provided in subsection (1)(b), it is the responsibility of the owner to ensure compliance with the provisions of this part and rules adopted pursuant to this part.

(b) If a written contract between an owner and an operator specifies that the operator is responsible for compliance with laws relating to forest practices, the operator is considered the responsible party for all enforcement actions taken by the department under this section.

(2) A person who violates a provision of this part, a rule adopted pursuant to this part, or an order issued under this section shall be subject to a civil penalty not to exceed $1,000. Each day of violation constitutes a separate violation.

(3) (a) When the department determines that an owner or operator has violated a provision of this part or a rule adopted pursuant to this part and has caused damage to watershed or wildlife resources, the department may serve an order requiring the person responsible for the conduct of forest practices to undertake necessary site rehabilitation within a reasonable period of time stated in the order. The order must specify the nature of the violation and the damage or unsatisfactory condition resulting from the violation.

(b) The order becomes final unless, within 30 days after the notice is served, the person named requests in writing a hearing before the department. On receipt of the request, the department shall schedule a hearing. Service by mail is complete on the date of mailing.

(c) If, after a hearing, the department finds that a violation has occurred and the watershed or wildlife habitat damage warrants site rehabilitation, it shall affirm or modify the order previously issued. If the department finds that a violation has not occurred or that site rehabilitation is not warranted, it shall rescind the order.

(d) The department may include in an order a provision that the owner or operator immediately cease causing further damage and take immediate action to alleviate the damage or to prevent future damage. The department may institute an action for injunctive relief under Title 27, chapter 19, if the recipient of the order does not comply with it.

(4) Subsection (3) does not prevent the department from seeking voluntary compliance and site rehabilitation through warning, conference, or any other appropriate means.

(5) All fines and penalties levied under this section must be deposited in the state general fund.

History: En. Sec. 6, Ch. 608, L. 1991.

77-5-307. Rulemaking. The department shall adopt rules:

(1) implementing each of the management standards provided in 77-5-303;

(2) providing specific direction necessary for owners and operators to understand and comply with the management standards, including additional definition of the streamside management zone and the forest practices permissible within the zone;

(3) providing alternative practices for the standards provided for in 77-5-303; and

(4) regulating the harvest of timber in streamside management zones.

77-6-112. Liens on crops and improvements. (1) The state has a lien upon all crops growing upon any of its land and upon the crops after they have been separated from the land for any rentals and penalties due or delinquent under the lease on the land or becoming due during the calendar year in which the crops are harvested, for any year or part of a year that the land has been held or used by the lessee. This lien applies to all buildings, structures, fences, and other improvements and is prior and superior to all other liens, except thresher's liens and seed liens specified in 71-3-701 and 71-3-801, which have priority, but only for the aggregate amount of the indebtedness then existing, including any advances made, interest due and other charges as evidenced by the original loan-contract, and indebtedness accumulating, exclusive of any other future advances originally contemplated.

(2) Any person acquiring any of these crops or improvements takes them subject to this lien. The department or the sheriff of the county in which the land is located may demand of the lessee payment of the amounts due the state, and if they are not paid upon demand, the officer making the demand or the department may seize and sell, either at a private or public sale, upon giving notice for not less than 3 days of the sale, sufficient of those crops or improvements, or of both, to pay the amounts due the state, together with costs and expenses of seizure and sale. These provisions relating to liens on crops and improvements must be embodied in all leases for agricultural and grazing lands and for town, city, or other lots.

77-6-113. Lease conditions — cancellation. (1) It is a condition of all leases of agricultural or grazing state lands that:

(a) in the case of agricultural lands, the lessee shall observe the ordinary rules for good management of agricultural lands and shall handle the leased land with the view of maintaining its productivity and minimizing wind and soil erosion and noxious weeds and planting crops with a view of securing the greatest yields of good quality; and

(b) in the case of grazing lands, the lessee shall observe the ordinary rules for good range management and shall manipulate the numbers, class, distribution, and season of the range use and the handling, feeding, breeding, and marketing of grazing livestock with a view of securing the production of the maximum of livestock and livestock products, consistent with the conservation of the land resources and the perpetuation of its productivity, and to these ends the state land lease may not be abused by overgrazing.

(2) For the gross violation of any of these rules, the lease involved must be canceled by the department, subject to the appeal procedure provided in 77-6-211.

(3) This section may not be construed to interfere with the right of the owner of property adjacent to a navigable river or stream to control noxious weeds on the land adjacent to the navigable river or stream.

77-6-115. Acquisition of water right by lessee — limitation. (1) Subject to subsection (4), the lessee of state lands may at any time prior to 1 year before the expiration of the lease make application to the board for permission to secure a water right to the land under the lease. The application must be in writing and must show how much of the land can be irrigated, the permanency of the water supply, and the probable cost of placing the land under irrigation. If the proposed plan meets with the approval of the board, permission must be granted the lessee to secure the desired water right for the land and to place the land under irrigation.

(2) Subject to subsection (4), if the water right becomes a permanent and valuable improvement, then in case of the sale or lease of the land to other parties, the former lessee is entitled to receive compensation in the amount of the reasonable value of the water right, as in the case of other improvements, from the new lessee or the purchaser.

(3) These provisions may not be construed to make the state liable to the lessee for the payment of the cost or value of the irrigation improvements.

(4) A water right acquired under this section may not interfere with a water right used in conjunction with a structure described in 77-1-134.

77-6-116. Voluntary termination of lease to allow concurrence with federal conservation reserve program — competitive bidding required. (1) A lessee of state land who wishes to enter the state land in the federal conservation reserve program may request voluntary termination of the remainder of the lease prior to scheduled expiration in order to seek a renewal lease that will run concurrently with the federal program. The lessee shall apply for voluntary termination to the department on a form prescribed by the department. The form must specify:

(a) the name of the lessee and a designation of the leased land for which voluntary termination is sought;

(b) the scheduled termination date of the lease; and

(c) the term of eligibility of the land under the federal conservation reserve program.

(2) Upon receipt of a proper application, the department shall terminate the remainder of the lease. When a request for voluntary termination is granted, the department shall fulfill the notification requirements of 77-6-204, and the lease is subject to the same competitive bidding process as renewal leases under 77-6-205. However, the lessee requesting voluntary termination retains the preference right allowed under 77-6-205.

(3) If a lease renewal is granted pursuant to 77-6-205 to a lessee who has requested voluntary termination under this section, the term of the renewal lease must coincide with the term of eligibility under the federal conservation reserve program.

77-6-201. Appraisal of grazing lands. (1) The department shall appraise the grazing lands owned by the state as to their animal-unit-month carrying capacity and make and preserve records of carrying capacity in its office and from time to time reexamine these lands as to their animal-unit-month carrying capacity in order to keep the records in its office reasonably accurate.

(2) In appraising these grazing lands, the following factors must be taken into consideration:

(a) inventory of the forage resources, including kind, amount, and location of vegetation;

(b) accessibility and usability of this forage resource as influenced by topography, availability of stock water, and season of usability;

(c) condition of soils, including the erosion situation;

(d) other and related resources such as timber, game animals, and need for watershed protection;

(e) record of needed improvements and facilities, including fuel and stock water, revegetation, rodent control, trails, fences, and the like;

(f) pertinent facts and figures submitted by stockgrowers living in the area and directors of state grazing districts including the land or in its vicinity;

(g) carrying capacity set for similar land in a state grazing district in which the land is situated.

77-6-202. Lease by competitive bidding — full market value required. When the department receives an application to lease an unleased tract, it shall advertise for bids on the tract. The tract must be leased to the highest bidder unless the board determines that the bid is not in the state's best interest for the reasons set forth in 77-6-205(2). The board may not accept a bid that is below full market value. If the high bid is rejected, the board shall set forth the reasons for the rejection in writing. The lease may be issued, at a rental rate to be determined by the board, to the first bidder who is willing to pay the board-determined rate whose name is selected through a random selection process from all bidders on the tract.

(2) The department shall retain the deposit of the successful bidder, apply it on the rental for the first year of the lease only, and return any balance of the deposit at the end of the first year

to the successful bidder. The department shall return the deposits of the unsuccessful bona fide bidders. If the department finds a bid has been submitted that is frivolous, forged, or a bad faith bid or a bid submitted for purposes of harassment, the deposit is forfeited. The department shall make a reasonable attempt to notify the bidder in writing of the forfeiture and reasons therefor.

(3) If the successful bidder fails to execute the lease for any reason, the deposit is forfeited.

77-6-205. Renewal leases. (1) A lessee of state land classed as agricultural, grazing, town lot, city lot, or land valuable for commercial development who has paid all rentals due the state or who has voluntarily terminated a lease under 77-6-116 is entitled to have the lease renewed for a period not to exceed the maximum lease period provided in 77-6-109 at any time within 30 days prior to its expiration or within 30 days following voluntary termination if no other applications for lease of the land have been received 30 days prior to the expiration of the lease or within 30 days following voluntary termination. The renewal must be at the full market rental rate established by the board for the renewal period and subject to any other conditions at the time of the renewal imposed by law as terms of the lease. Except as provided in 77-6-212, if other applications have been received, the holder of the lease has the preference right to lease the land covered by the former lease by meeting the highest bid made by any other applicant. Applications for lease of lands in this section must be given preference in the order of their receipt at the office of the department.

(2) The board shall accept the highest bid. If the lessee exercises the preference right and believes the bid to be excessive, the lessee may request an administrative hearing. The request must contain a statement of reasons why the lessee believes the bid not to be in the state's best interest. The department shall grant the request for a hearing if it determines that the statement indicates evidence that the bid may not be in the state's best interests. The board may, after the hearing, reduce the rental from the amount bid if the lessee shows that the bid is not in the best interest of the state because it is above community standards for a lease of the land, would cause damage to the tract, or would impair its long-term productivity. If the board reduces the bid, it shall set forth its findings and conclusions in writing and inform the lessee and competitive bidder of the reduction. It is the duty of the board to secure the best lessees possible, so that the state may receive the maximum return possible with the least injury occurring to the land.

(3) A renewal lease may be canceled pursuant to 77-6-113, 77-6-208, 77-6-209, or 77-6-210 for a violation by the lessee that occurred during the previous lease term but no more than 3 years prior to the date on which the notice of cancellation required by 77-6-211 is issued. Cancellation procedures instituted but not completed before renewal are applicable to the renewal lease.

(4) A renewal lease may be voluntarily terminated pursuant to 77-6-116.

77-6-208. Assignment of leases — subleasing — loss of preference right. (1) Leases to state lands may be assigned on blanks prescribed by the department, but an assignment is not binding on the state unless the assignment is filed with the department and approved by it and payment made of the assignment fee under 77-1-302.

(2) Preference must always be given to the applicant who wants the land for the applicant's own individual use, so that the full advantage coming from the leasing and use of the lands may reach those who actually till the soil and so that they are not compelled to pay a higher rental than that due the state.

(3) (a) If a lessee, other than a holder of a commercial lease, subleases state lands on terms less advantageous to the sublessee than the terms given by the state, the department shall cancel the lease, subject to the appeal procedure provided in 77-6-211.

(b) If a lessee subleases state lands without filing a copy of the sublease with the department and without receiving the department's approval, the department may cancel the lease, subject to the appeal procedure provided in 77-6-211.

(c) Upon approval by the department, a commercial leaseholder may sublease state land on terms less advantageous to the sublessee than the terms given to the lessee by the state. However, the department may adjust the lease rate to require that the lessee pay the state a portion of what the sublessee pays to the lessee.

(4) The subleasing of state land may result in loss of the preference right to renew the lease as provided in 77-6-212.

(5) An assignment or series of assignments may not be made to avoid the loss of the preference right under 77-6-212.

77-6-209. Change from grazing lease to agricultural lease. (1) When land is leased for grazing purposes and the lessee desires to cultivate any part of the land, the lessee shall, before doing any cultivation, make application to the department stating how much land the lessee desires to cultivate and showing the location in the section of the land and agree that for the remainder of the term of the lease the annual rental will be at the rate of the original lease until the time that the first crop is harvested from the cultivated portion of the lease. At the time of the first harvest, the lease must be at the original rate for that portion remaining as grazing land plus the crop share rental for that portion cultivated. If any person cultivates lands leased for grazing purposes without first securing the right to do so under this section, the department shall either cancel the lease, subject to the appeal procedure provided in 77-6-211, or require the lessee to pay twice the regular agricultural rental on the land cultivated in addition to the grazing rental.

(2) The provisions of this section must be incorporated in every lease.

77-6-210. Cancellation of leases. (1) The department may cancel a lease for any of the following causes:

(a) fraud, misrepresentation, or concealment of facts relating to its issue, which if known would have prevented its issue in the form or to the party issued;

(b) subleasing state land contrary to the provisions of 77-6-212;

(c) using the land for other purposes than those authorized by the lease;

(d) conviction of the lessee for a felony offense involving a dangerous drug, as defined in Title 50, chapter 32, and involving the planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or concealing of a dangerous drug on any portion of the unit; however, when a state land lease is held by an association, company, or corporation, conviction of a member of the association, company, or corporation under this subsection does not result in cancellation of the lease unless it appears that the operator, manager, or family in control of the association, company, or corporation is a consenting party or privy to the violation of this subsection;

(e) for any other cause which in the judgment of the department makes the cancellation of the lease necessary in order to do justice to all parties concerned and to protect the interests of the state.

(2) Cancellation of a lease under this section does not entitle the lessee to any refund of rentals paid or exemption from the payment of any rentals, penalties, or other compensation due the state.

77-6-211. Procedure to cancel lease — appeal. (1) When the department cancels a lease pursuant to 77-6-113, 77-6-208, 77-6-209, or 77-6-210, it shall immediately notify the lessee by certified mail of the cancellation and the reasons therefor. The date of cancellation is 15 days from the date the notice is received by the lessee.

(2) The lessee has 15 days after the receipt of the notice to file with the department a notice of appeal for a hearing before the board. If notice of appeal is filed, the lease remains in effect until the decision of the board. Within 10 days after notice of appeal has been filed, the department shall set the time and place of hearing and shall so notify the lessee. The board may, after 10 days' notice to the lessee, change the time and place of hearing.

(3) Under rules it adopts, the board shall conduct an open hearing to determine whether the lease should be reinstated. The burden of proof is on the lessee to show why the lease should not be canceled. If the lease is reinstated, all of the lessee's rights and privileges thereunder shall be preserved; if not, the land shall be open for re-leasing as provided by law. If the board finds that the terms of the lease have been violated but in its judgment the violation is not serious enough to warrant cancellation, it may reinstate the lease and assess a penalty up to three times the annual rental against the lessee.

77-6-212. Loss of preference right — cancellation of lease — subleasing — pasturing agreements. (1) Except as provided in subsections (3) and (4), a lessee of state land classed as agricultural or grazing land may not exercise the preference right provided in 77-6-205 if the lessee subleases the land for more than 2 years in the term of the lease.

(2) The department shall cancel a lease of state agricultural or grazing land if the lessee subleases the land for more than 3 years during the term of the lease unless the sublease is made between members of a family as provided in subsection (3).

(3) A lessee under subsection (1) or (2) may sublease the land for a period of not more than 5 years without losing the preference right or the lease to state land if, during the term of the lease, the land is subleased only to a spouse, son, daughter, adopted child, or sibling of the lessee.

(4) The lessee does not lose the preference right or right to lease because of subleasing as provided under this section if:

(a) the sublease is one-third or less acres of the lease; or

(b) the sublease is considered to be a pasturing agreement and is approved in writing by the department prior to the initiation of the agreement.

(5) For purposes of this section, a sublease may not be considered a pasturing agreement unless the lessee personally retains management and physical control of the land and livestock. "Management" includes but is not limited to:

(a) providing all costs for improvements, land maintenance, and range renovation, if range renovation is approved by the department;

(b) making all decisions regarding rotation or other placement of livestock on state land;

(c) making all decisions regarding turn-in and turn-out dates of the livestock on state land; and

(d) making all decisions regarding proper range management, including placement of water, fencing, and salt.

(6) A lessee of state land classified as agricultural or grazing land loses the preference right provided in 77-6-205 upon conviction of a felony offense involving a dangerous drug, as defined in Title 50, chapter 32, and involving the planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or concealing of a dangerous drug on any portion of the unit. When a state land lease is held by an association, company, or corporation, conviction of a member of the association, company, or corporation under this subsection does not result in loss of lease preference unless it appears that the operator, manager, or family in control of the association, company, or corporation is a consenting party or privy to the violation of this subsection.

Part 3
Improvements

77-6-301. Improvements authorized. A lessee of state lands may place upon the lands a reasonable amount of improvements directly related to conservation of the land or necessary for proper utilization of it. These improvements may consist of fences, cultivation, improvement of the land itself, irrigation ditches, sheds, wells, reservoirs, and similar improvements.

77-6-302. Compensation for improvements — actual costs. (1) Except for the improvements described in 77-1-134, prior to renewal of a lease, the department shall request from the lessee a listing of improvements on the land associated with the lease, including the reasonable value of the improvements. This information must be provided to any party requesting to bid on the lease. Except for the improvements described in 77-1-134, when another person becomes the lessee of the land, the person shall pay to the former lessee the reasonable value of the improvements. The reasonable value may not be less than the full market value of the improvements.

(2) If the former lessee is unable to produce records establishing the reasonable value or if the former lessee and the new lessee are unable to agree on the reasonable value of the improvements, the value must be ascertained and fixed as provided in 77-6-306. The former lessee shall initiate this process within 60 days of notification from the department that there is a new lessee. The department notification must include an explanation of the requirements of 77-6-306. Failure to initiate the process within this time period results in all improvements, except those described in 77-1-134, becoming the property of the state.

(3) Upon the termination of a lease, the department may grant a license to the former lessee to remove the movable improvements from the land. Upon authorization, the movable improvements must be removed within 60 days or they become the property of the state unless the department for good cause grants additional time for the removal. The department shall charge the former lessee for the period of time that the improvements remain on the land after the termination of the lease.

77-6-303. Determination of compensation. (1) In determining the value of the improvements described in 77-6-302, consideration must be given to their original cost, their present condition, their suitability for the uses ordinarily made of the land on which they are located, and to the general state of cultivation of the land, its productive capacity as affected by former use, and its condition with reference to the infestation of noxious weeds. Consideration must be given to all actual improvements and to all known effects that the use and occupancy of the land have had upon its productive capacity and desirability for the new lessee.

(2) However, if any of the improvements consist of the original plowing of the land and 1 year's crops have been raised on the land after the plowing, the compensation for the improvement may not exceed $2.50 per acre, and if two or more crops have been raised on the land after the original plowing, the original plowing may not be considered as an improvement to the land.

77-6-306. Arbitrators to fix value of improvements. (1) If the owner of any improvements on state lands of the type authorized by law at the time they were placed on state lands desires to sell these improvements to the new lessee and they are unable to agree on the value of the improvements pursuant to 77-6-302, the value must be ascertained and fixed by three arbitrators, one of whom is appointed by the owner of the improvements, one by the new lessee, and the third by the two appointed arbitrators. If any party refuses to appoint an arbitrator within 15 days of being requested to do so by the director of the department, the director may appoint an arbitrator for that party. An arbitrator appointed by the director has the same duties and powers as if appointed by one of the parties. The value of the improvements must be ascertained and fixed pursuant to 77-6-302.

(2) The reasonable compensation that the arbitrators may fix for their services must be paid in equal shares by the owner of the improvements and the new lessee.

(3) The value of the improvements ascertained and fixed is binding on both parties. If either party is dissatisfied with the valuation, the party may within 10 days appeal from the decision to the department. The department shall examine the records pertaining to the costs of the improvements, and except as provided in subsection (4), its decision is final. The department shall charge and collect the actual cost of the reexamination to the owner and the new lessee in the proportion as, in its judgment, justice may demand.

(4) If either party is dissatisfied with the valuation fixed by the department, the party may within 30 days after receipt of the department's decision petition the district court in the county in which the majority of the state land is located for judicial review of the decision.

To authorize transfer of a lease, a decree of foreclosure must specifically refer to the lease or the leased premises, but neither the board nor the department is required to be named as a party to the action. The plaintiff shall, however, file a copy of the complaint with the department at the time it is filed with the court.

Part 5
Rental Provisions

77-6-501. Agricultural leases. (1) For agricultural land, all leases except lease renewals upon which the lessee has made improvements at the lessee's expense, as provided in subsection

(3), must be continued or made upon a crop share rental basis of not less than one-fourth of the annual crops to the state or the usual landlord's share prevailing in the district, whichever is greater. The board may, however, approve special crop share rentals of less than one-fourth for high production cost crops, such as but not limited to potatoes and sugar beets, or for high production cost methods when these methods would result in more income to the state. The board may not delegate the authority to approve special crop share rentals.

(2) Except in the case of cash lease renewals under subsection (3), if it is in the best interests of the state, the department may authorize a lease upon other bases than crop share, but in these cases, the rental must at least equal the value of the usual landlord's share prevailing in the district under similar circumstances, and the department shall set forth in the records the conditions of the case and the rental to be charged.

(3) Subject to 77-1-134, in a case in which the lessee has made substantial improvements for irrigation purposes to the lease at the lessee's own expense, the department shall authorize a cash lease renewal at not less than $15 an acre on the portion of the lease that has been improved.

(4) For all agricultural leases issued through competitive bidding provided for under 77-6-202 or 77-6-205, the department shall require on any competitive bid greater than a one-third crop share a minimum annual guarantee of not less than $15 an acre.

77-6-506. Date when rental due — penalty — cancellation for nonpayment. (1) For a grazing lease, for the grazing portion of a lease containing both agricultural and grazing land, and for agricultural leases not based on a crop share, the grazing rental for the first year of the lease must be paid at or before the time of the execution of the lease; however, in the case of a lease that takes effect on and after October 1 and before the expiration of the coming February, both the rental for the fractional year and for the next full year beginning March 1 must be paid and collected at the time of issuing the lease. If the United States is the lessee of state lands for grazing purposes, the rental is payable at the end of each year of the lease. The rental for each succeeding year on a lease issued after July 1, 1999, with the exception of a lease that involves the United States as the lessee, is due and payable before March 1. If the rental is not paid before March 1, a $25 penalty must be imposed on the lessee. If the full rental and the $25 penalty are not paid by April 1, the entire lease is canceled.

(2) For an agricultural lease and for the agricultural portion of a lease containing both grazing and agricultural land, when the rental is paid on a crop share basis or on a crop share/cash basis, the rental is due in cash on or before November 15 of the year in which the crop is harvested. If the rental is not paid on or before November 15 of the year of crop harvest, a $25 penalty must be imposed on the lessee. If the full rental and the $25 penalty are not paid on or before December 31 of the year in which the crop is harvested, the entire lease is canceled. The department may extend the deadline in writing. If the lessee does not make the rental payment by the date of extension, the entire lease is canceled. Any rental payment made after November 15 of the year in which the crop is harvested, including payment made after an extension of the deadline, must include the $25 penalty.

(3) For all state land leases and licenses other than those described in subsections (1) and (2), the department shall impose a $25 penalty for failure to make a rental payment by any deadline established by statute, by rule, or in the lease or license.

(4) At least 2 weeks prior to the final deadline for payment under subsection (1) or (2), the department shall send by certified mail to each lessee who has not made payment a letter notifying the lessee that the lease is canceled if payment and the $25 penalty are not received by the final deadline. The notice must be sent to the lessee at the address given in the lease.

(5) When a lease is canceled under subsection (1) or (2), the department shall notify the lessee of the cancellation by letter at the address given in the lease.

(6) The department may, within 30 days of cancellation, reinstate a canceled agricultural, grazing, or other surface lease upon payment of the rental that is owing, plus a penalty not to exceed three times the annual rental, except that a penalty imposed under this subsection may not be less than $500.

(7) A canceled lease that is not reinstated must be made available for lease as provided in 77-6-202.

(8) The penalties collected pursuant to this section must be deposited into the same trust account as the rentals from the state land to which the penalties apply.

77-6-507. Formula for fixing annual rental. (1) In this section:

(a) "animal unit" means one cow, one horse, five sheep, or five goats;

(b) "animal-unit-month carrying capacity" means that amount of natural feed necessary for the complete subsistence of one animal unit for 1 month.

(2) The board shall establish the per annum rental rate per section of all grazing lands that are the property of the state by multiplying a factor established by the board pursuant to 77-6-502 times the average price per pound of beef cattle on the farm in Montana for the previous year times the animal-unit-month carrying capacity of the land.

(3) The carrying capacity of the land to be used in the above formula must be in accordance with the determinations of the department made under 77-6-201.

(4) The average price per pound of beef cattle on the farm in Montana must be taken from statistics published by the United States department of agriculture current at the time of computation of the rental or from other reliable sources current at that time.

(5) In establishing the rental rate described in subsection (2), the board shall consider applicable elements that include but are not limited to those set forth in 77-1-106.
